

Contents

| | | |
|----------|--|----|
| 1 | Introduction | 1 |
| 1.1 | Cold Atmospheric Plasma | 1 |
| 1.2 | Plasma Device Used in This Study | 3 |
| 1.3 | Plasma Chemistry | 6 |
| 1.3.1 | Characteristics of the Plasma Device FlatPlaSter 2.0 | 8 |
| 1.4 | Plasma Liquid Chemistry | 9 |
| 1.5 | State of the Art/Tumor Treatment with CAP | 9 |
| 1.6 | Glioma | 11 |
| 1.7 | Glioblastoma | 11 |
| 1.8 | Epidemiology and Histology | 12 |
| 1.9 | Treatment of Glioblastoma | 12 |
| 1.10 | Therapy Resistance | 13 |
| 1.11 | Objective | 14 |
| | References | 15 |
| 2 | Results | 19 |
| 2.1 | Effects of CAP on Liquids | 19 |
| 2.1.1 | CAP Effects on Medium | 19 |
| 2.1.2 | Storage of Pre-Treated Medium Reduces the CAP Efficacy | 19 |
| 2.1.3 | Treatment of Glioma Cells in Minimized Amounts of Medium | 21 |
| 2.2 | Effects of CAP on TMZ-Resistant and -Sensitive Glioma Cell Lines | 22 |
| 2.2.1 | CAP Treatment Inhibits Cell Proliferation in MGMT Positive and MGMT Negative Glioma Cell Lines | 22 |
| 2.2.2 | Induction of Apoptosis is Present to a Minor Extent After CAP Treatment | 22 |
| 2.2.3 | Cytolysis is Only Induced by Long CAP Treatment Durations | 23 |
| 2.2.4 | Strong Induction of Cell Cycle Arrest in MGMT Positive and MGMT Negative Glioma Cells by CAP Treatment | 25 |

| | | |
|----------|--|-----------|
| 2.2.5 | Induction of Cell Cycle Arrest by CAP Application is a Long Lasting Effect in Glioma Cells. | 26 |
| 2.2.6 | CAP Reduces the Clonogenic Potential of Glioma Cells | 26 |
| 2.2.7 | CAP Application Impairs Migration of Glioma Cells . . . | 27 |
| 2.3 | Combined Treatment with CAP and Chemotherapy. | 29 |
| 2.3.1 | Concomitant Treatment with CAP and TMZ has a Synergistic Effect on Cell Viability in MGMT Positive and MGMT Negative Cells | 29 |
| 2.3.2 | Combined Therapy Induces Prolonged G2/M Phase Cell Cycle Arrest | 29 |
| 2.4 | CAP Displays Cell Selectivity Towards Tumor Cells. | 30 |
| 2.4.1 | Cell Cycle Distribution in Primary Astrocytes | 30 |
| 2.4.2 | Treatment of LN18pEGFP in Organotypic Brain Slice Cultures | 32 |
| 2.4.3 | Staining for p-Cdc25c Reveals Activation of the ATM/ATR Signaling Pathway by CAP Application in OSCs | 34 |
| 3 | Discussion | 35 |
| 3.1 | Effects of CAP on Liquids | 36 |
| 3.2 | Effects of CAP on TMZ-Resistant and -Sensitive Glioma Cell Lines | 37 |
| 3.3 | Combined Treatment with CAP and Chemotherapy. | 39 |
| 3.4 | CAP Displays Cell Selectivity Towards Tumor Cells. | 40 |
| | References | 43 |
| 4 | Assessment and Outlook. | 47 |
| | References | 49 |

| | Appendix B: Supplementary Data | 63 |
| | Curriculum Vitae | 73 |

Biophysical Effects of Cold Atmospheric Plasma on Glial
Tumor Cells

Köritzer, J.

2014, XIV, 74 p. 38 illus., 12 illus. in color., Hardcover

ISBN: 978-3-319-06223-5
