

Contents

1	General Formulation of Spectral Approximation	1
1.1	The Tau and Galerkin Spectral Methods	1
1.2	Theoretical Foundation of Spectral Collocation	10
	References	16
2	Tau and Galerkin Methods for Fourth Order GEPs	19
2.1	The ChT Method	20
2.2	The ChG Method	25
2.3	ChT Methods for GEPs with λ Dependent Boundary Conditions	30
2.3.1	Second Order S-L Problems with Parameter Dependent Boundary Conditions	30
2.3.2	The Stability of some Elastic Systems	30
2.3.3	A Modified ChT Method for a Particular O-S Problem	32
	References	37
3	The Chebyshev Collocation Method	41
3.1	ChC Method Versus ChG and ChT Methods in Solving Fourth Order GEPs	42
3.2	The Viola's Eigenvalue Problem	50
3.3	Linear Hydrodynamic Stability of Thermal Convection with Variable Gravity Field	53
3.4	Linear Hydrodynamic Stability of EHD Convection Between Two Parallel Walls	58
3.5	Multiparameter Mathieu's Problem	61
3.6	Improvements Induced by <i>JD</i> Methods	73
	References	82
4	The Laguerre Collocation Method	85
4.1	LC Solutions to a Third Order Linear Boundary Value Problem on the Half-Line	86
4.2	The Falkner-Skan Problem	88
4.3	The Laguerre Differentiation Matrices	89

4.4	The LC algorithm	91
4.5	Numerical Solutions to Falkner-Skan Problem	92
4.6	Second Order Nonlinear Singular Boundary Value Problems on the Half-Line	95
4.7	Second Order Eigenvalue Problems on Half-Line	100
4.8	Fourth Order Eigenvalue Problems on Half-Line	102
4.9	The Movement of a Pile	106
	References	108
5	Conclusions and Further Developments	111
5.1	Lessons Learned Along the Way	111
5.2	Further Developments	114
	Appendix A: Algebraic Two-Parameter Eigenvalue Problems	115
	Index	119

Spectral Methods for Non-Standard Eigenvalue
Problems

Fluid and Structural Mechanics and Beyond

Gheorghiu, C.-I.

2014, XII, 120 p. 52 illus., 49 illus. in color., Softcover

ISBN: 978-3-319-06229-7
