Basic Structure of 4-web (1 illustration).....	vi
Preface (Second Edition)	vii
Preface	ix
Introduction (2 Illustrations).....	xv
Chapter 1. 3-Sphere (13 illustrations)	1
§1 Spheres	
§2 Why is it that we cannot see a 3-sphere?	
§3 Spheres and discs	
§4 Gluing discs	
§5 Slicing spheres	
§6 Comments	
Chapter 2. Dante's 3-Sphere Universe (10 illustrations)	11
§7 Aristotle universe	
§8 Dante's journey	
§9 Angelic sphere	
§10 Dante's 3-sphere	
§11 Locally glued areas	
§12 Dante organizes 3-sphere slices	
§13 Comments	
Chapter 3. Einstein and the 3-Sphere (6 illustrations)	25
§14 Imagination boggles	
§15 Projecting S^1	
§16 Projecting S^2	
§17 Einstein's view	
§18 Comments	
Chapter 4. Einstein's Universe (7 illustrations)	35
§19 Hollow pipe	
§20 $R \times S^2$ as a solid pipe?	
§21 $R \times S^3$	
§22 Comments	

Chapter 5. Images of S^1 and S^2 (24 illustrations).....	41
§23 Picturing a one-sphere	
§24 Two-web graph paper	
§25 Picturing a two-sphere	
§26 Three-web graph paper	
§27 Comments	
Chapter 6. Four-web Graph Paper (18 illustrations).....	53
§28 What is a hypercube?	
§29 Why is it that we cannot see a hypercube?	
§30 The 4-web and 4-web grids	
§31 Moving the 4-web into 3-space	
§32 Comments	
Chapter 7. The Partial Picture (8 illustrations).....	65
§33 Camera position	
§34 First picture	
§35 Walking around our 3-sphere image	
§36 Comments	
Chapter 8. Generating the Hyper-Sphere Art (3 illustrations).....	73
§37 Overview of chapter	
§38 4-Web grids	
§39 Consistency of spheres	
§40 Points of intersection	
§41 From hyper-space into human view	
§42 Comments	
Chapter 9. Prelude to Chapters 10 and 11 (3 illustrations).....	85
§43 The fresco, Creation of Adam	
§44 Comments	
Chapter 10. Great 2-spheres (13 illustrations).....	91
§45 Three great circles on a 2-sphere	
§46 Four great 2-spheres	
§47 The linear transformation L	
§48 Planar example	
§49 Great 2-sphere images	
§50 The $w = 1/4$ great 2-sphere	
§51 The $z = 1/4$ great 2-sphere	

§52 The $y = 1/4$ and $x = 1/4$ great 2-spheres	
§53 Comments	
Chapter 11. Images of Great 2-spheres (9 illustrations)	109
§54 The $w = 1/4$ case	
§55 The $z = 1/4$ case	
§56 The $y = 1/4$ case	
§57 The $x = 1/4$ case	
§58 Topological images	
§59 Images of joins	
§60 Lower-dimensional example	
§61 Joins of great 2-spheres	
§62 Comments	
Chapter 12. Appendix 1: Supplement for Chapters 1 and 2 (8 illustrations)	121
§A1 Flexing a disc	
§A2 3-disc flex step	
§A3 Using a mirror to glue discs	
§A4 Patterns and the 3-sphere	
§A5 Slices of the 3-sphere	
§A6 Hyperplane slices of the 3-sphere	
§A7 Dante's 3-sphere construct	
Chapter 13. Appendix 2: Supplement for Chapters 3 and 4 (6 illustrations)	131
§A8 Non-Euclidean geometry	
§A9 Context of Einstein's quotes	
§A10 Doppler shift	
§A11 Red shift	
§A12 Big Bang	
§A13 Cosmic Background Radiation	
§A14 Concerns about Einstein's Universe	
§A15 Chronometric Cosmology	
§A16 Final paragraph of quote	
§A17 Parallel universes and God the observer	
§A18 Universal universe	
Chapter 14. Appendix 3: Inside S^3 and Questions (4 illustrations)	163
§A19 Inside a 3-sphere	
§A20 Physics without measurements?	

Chapter 15. Appendix 4: Mathematics and Art (1 illustration)..... 171

Bibliography 175

Index..... 179

Art Meets Mathematics in the Fourth Dimension

Lipscomb, S.

2014, XVII, 184 p. 147 illus., 28 illus. in color.,

Hardcover

ISBN: 978-3-319-06253-2
