

Contents

1	Introduction	1
1.1	Effective Theory of Gravity	3
1.2	Unitarity	6
1.2.1	Unitarity of a Superposition of States	8
1.2.2	Example: Unitarity of WW Scattering	9
	References	12
2	Unitarity of Gravity Coupled to Models of Particle Physics	15
2.1	Unitarity of Linearised General Relativity	15
2.1.1	$j = 2$ Partial Wave Amplitude	16
2.1.2	$j = 0$ Partial Wave Amplitude	17
2.2	Unitarity of Models of Particle Physics	17
2.3	Running of the Planck Mass and Renormalisation	
	Group Improved Unitarity Bound	18
2.3.1	Model with Large Number of Fields	22
	References	23
3	Unitarity of Models with Extra Dimensions	25
3.1	Extra Dimensions and Kaluza-Klein Modes	25
3.1.1	Extra Dimensional Models as Effective Theories with a Low Cutoff	26
3.1.2	Kaluza-Klein Modes	27
3.1.3	Partial Wave Amplitude for KK Graviton Exchange	31
3.1.4	Width of KK Gravitons	32
3.2	Unitarity of KK Graviton Resonances	32
3.2.1	Sum of Breit-Wigner Resonances	32
3.2.2	Beyond the Breit-Wigner Approximation	34
3.3	Unitarity in the ADD Model	36
3.3.1	Introduction to the ADD Model	36
3.3.2	Unitarity in the ADD Model	38
3.3.3	KK Sum and Unitarity in the Zero Width Approximation	39
3.3.4	KK Sum and Unitarity Including Breit-Wigner Width	42
3.3.5	Summary of the Unitarity Bounds	44

3.4	Unitarity in the Randall-Sundrum Model	46
3.4.1	Introduction to the Randall-Sundrum Model.	46
3.4.2	Unitarity from Graviton Exchange	49
3.4.3	The Radion and Unitarity.	50
3.5	Unitarity in the Linear Dilaton Model	52
3.5.1	Introduction to the Linear Dilaton Model.	52
3.5.2	Unitarity from Graviton Exchange	54
3.5.3	The Radion and Dilaton Modes and the Associated Unitarity Bounds.	55
3.5.4	Higgs-Radion Mixing and the Associated Unitarity Bounds	59
	References	62
4	Higgs Inflation	65
4.1	Inflation and the Higgs Boson as the Inflaton	65
4.2	Unitarity of Higgs inflation.	69
4.2.1	Frame Dependence	70
4.2.2	Background Dependence	71
4.2.3	Unitarising Higgs Inflation.	72
4.3	Asymptotic Safety and Higgs Inflation.	73
4.4	Unitarity of New Higgs Inflation.	74
	References	76
5	Bound on the Non-minimal Coupling of the Higgs Boson to Gravity	79
5.1	The Decoupling Effect.	79
5.2	Higgs Boson Production and Decay.	81
5.3	Effects of a Large Non-minimal Coupling on Missing Energy and the Higgs Mass	82
5.3.1	Comment on a Recent Publication	83
	References	84
6	Conclusions	85
	Reference	89
	Appendix A: Polarisations of External Particles	91
	Appendix B: Wigner d-Functions.	93
	Appendix C: Integrals	95
	Appendix D: Transforming Between Einstein and Jordan Frames.	97
	Appendix E: Feynman Rules	99

Bounds on the Effective Theory of Gravity in Models of
Particle Physics and Cosmology

Atkins, M.

2014, XII, 100 p. 11 illus., 2 illus. in color., Hardcover

ISBN: 978-3-319-06366-9
