

Contents

Part I Topics in Quantum Chemistry

Relativistic Quantum Theory of Many-Electron Systems.	3
Benjamin Simmen and Markus Reiher	
Spurious Modes in Dirac Calculations and How to Avoid Them	31
Mathieu Lewin and Éric Séré	
Tensor Product Approximation (DMRG) and Coupled Cluster Method in Quantum Chemistry	53
Örs Legeza, Thorsten Rohwedder, Reinhold Schneider and Szilárd Szalay	
Quantum Cluster Equilibrium	77
Barbara Kirchner, Frank Weinhold, Joachim Friedrich, Eva Perlť and Sebastian B. C. Lehmann	
Linear Response Methods in Quantum Chemistry	97
Tobias Watermann, Arne Scherrer and Daniel Sebastiani	

Part II Topics in Density Functional Theory and Related Approaches

Progress on New Approaches to Old Ideas: Orbital-Free Density Functionals	113
Valentin V. Karasiev, Debajit Chakraborty and S. B. Trickey	
Time-Dependent Density Functional Theory	135
Nikos L. Doltsinis	
Density Functional Theory for Strongly-Interacting Electrons.	153
Francesc Malet, André Mirtschink, Klaas J. H. Giesbertz and Paola Gori-Giorgi	

Towards the Computational Design of Compounds from First Principles	169
O. Anatole von Lilienfeld	
Application of (Kohn–Sham) Density-Functional Theory to Real Materials.	191
Luca M. Ghiringhelli	
The Quantum Energy Agrees with the Müller Energy up to Third Order.	207
Heinz Siedentop	
Mathematical Aspects of Density Functionals and Density Matrix Functionals in Quantum Chemistry	219
Volker Bach	
Some (Important?) Unsolved Mathematical Problems in Molecular Simulation	235
Claude Le Bris	
 Part III Topics in Computer Science	
The Computational Complexity of Density Functional Theory	245
James Daniel Whitfield, Norbert Schuch and Frank Verstraete	
Computational Techniques for Density Functional Based Molecular Dynamics Calculations in Plane-Wave and Localized Basis Sets	261
Alexandar T. Tzanov and Mark E. Tuckerman	
 Part IV Information Theory in Many-Electron Descriptions	
Towards the Information-Theoretic Construction of an Orbital-Free Kinetic-Energy Functional	287
Ian P. Hamilton	
Lieb-Robinson Bounds and the Simulation of Time-Evolution of Local Observables in Lattice Systems.	301
Martin Kliesch, Christian Gogolin and Jens Eisert	

Part V Green Function-Based Approaches

Electronic Structure Calculations with LDA+DMFT	321
Eva Pavarini	

The <i>GW</i> Approximation for the Electronic Self-Energy	343
Arno Schindlmayr	

Part VI Topics in Quantum Monte Carlo and Related Approaches

Levy–Lieb Principle Meets Quantum Monte Carlo	361
Luigi Delle Site	

The New Resonating Valence Bond Method for Ab-Initio Electronic Simulations	377
Sandro Sorella and Andrea Zen	

Mathematical Perspective on Quantum Monte Carlo Methods	393
Eric Cancès	

Part VII Epilogue

On Some Open Problems in Many-Electron Theory	413
Volker Bach and Luigi Delle Site	

Many-Electron Approaches in Physics, Chemistry and
Mathematics

A Multidisciplinary View

Bach, V.; Delle Site, L. (Eds.)

2014, IX, 417 p. 59 illus., 47 illus. in color., Hardcover

ISBN: 978-3-319-06378-2
