

Contents

1	Brief Introduction to Chemical Kinetics	1
1.1	The Nature of Chemical Reactions	1
1.2	Reaction Rate: A Very Simple Example	2
1.3	Dynamic Equations	3
1.4	Chemical Equilibrium	4
1.5	Second Order Chemical Kinetics	4
1.6	The General Case	5
1.7	Summary	6
2	Brief Introduction to Thermodynamics	7
2.1	The First and Second Laws of Thermodynamics	7
2.2	Thermodynamics of Chemical Reactions	9
2.3	Understanding the Chemical Potential Concept	11
2.4	Summary	14
3	Different Approaches to Analyzing a Simple Chemical Reaction	15
3.1	The Chemical Kinetics Approach	15
3.2	Chemical Master Equation	17
3.3	Gillespie Algorithm	20
3.4	Thermodynamics	23
3.5	The Fourth Musketeer, Linking Approaches	25
3.6	Sketching the Energy Landscape	27
3.7	Summary	28
4	Molecule Synthesis and Degradation	29
4.1	Poisson Process	29
4.2	Biomolecule Synthesis as a Poisson Process	31
4.3	Exponential Decay	33
4.4	A Simple Birth–Death Process	36
4.5	Gillespie Algorithm	39
4.6	Thermodynamic Interlude	40

4.7	Thermodynamic Interpretation of the Production-Decay Process	43
4.8	The General Form of the Chemical Master Equation and Gillespie Algorithm	46
4.9	Summary	48
5	Enzymatic Reactions	51
5.1	Separation of Time Scales	51
5.2	Enzymatic Production and Linear Degradation	54
5.3	Thermodynamics of Enzymatic Reactions.....	56
5.4	Summary	59
6	Receptor-Ligand Interaction	61
6.1	Ligand-Receptor Interaction	61
6.2	Stochastic Kinetic Analysis of a Single Receptor Molecule	62
6.3	Multiple Receptor Molecules.....	65
6.4	Deterministic Kinetic Analysis	67
6.5	Thermodynamic Analysis	70
6.6	Summary	76
7	Cooperativity	77
7.1	The Importance of Cooperativity.....	77
7.2	One Receptor-Two Ligands, Stochastic Kinetic Analysis.....	77
7.3	Deterministic Description	82
7.4	Two Different Binding Sites, a Single Ligand	83
7.5	Thermodynamic Analysis	87
7.6	Summary	90
8	Gene Expression and Regulation	91
8.1	A Model for Constitutive Gene Transcription	91
8.2	A Fast-Regulation Model for Transcription	93
8.3	A Slow-Regulation Model for Transcription	95
8.4	Gene Expression (Transcription and Translation): Stochastic Description	99
8.5	Gene Expression: Deterministic Description	103
8.6	Gene Expression: Thermodynamic Interpretation	105
8.7	Summary	106
9	Ion Channel Dynamics and Ion Transport Across Membranes	107
9.1	One Molecule Flipping Between Two Compartment Model.....	107
9.2	N Molecules Flipping Between Two Compartments	109
9.3	Constant Concentration Gradient Across the Wall Separating Both Compartments	112
9.4	Two Compartments Connected by a Channel with a Driving Force	113
9.5	A Randomly Gating Channel.....	114
9.6	N Randomly Gating Channels	116

Contents	xiii
9.7 Ion Channel Regulation.....	118
9.8 Summary	122
References	123
Index	125

Chemical Kinetics, Stochastic Processes, and
Irreversible Thermodynamics

Santillán, M.

2014, XIII, 126 p. 16 illus. in color., Softcover

ISBN: 978-3-319-06688-2
