## Part I Nitric Oxide: Metabolism, Identification and Detection

<b>1</b>	<b>An Update to the Understanding of Nitric Oxide Metabolism in Plants</b> . . . . .	<b>3</b>
	Andrea Galatro and Susana Puntarulo	
<b>2</b>	<b>Biosynthesis of Nitric Oxide in Plants</b> . . . . .	<b>17</b>
	Tamás Rószér	
<b>3</b>	<b>Function of Peroxisomes as a Cellular Source of Nitric Oxide and Other Reactive Nitrogen Species.</b> . . . .	<b>33</b>
	Luis A. del Río, Francisco J. Corpas, Juan B. Barroso, Eduardo López-Huertas and José M. Palma	
<b>4</b>	<b>Role of Plant Mitochondria in Nitric Oxide Homeostasis During Oxygen Deficiency.</b> . . . .	<b>57</b>
	Halley Caixeta Oliveira and Ione Salgado	
<b>5</b>	<b>Production of Nitric Oxide by Marine Unicellular Red Tide Phytoplankton, <i>Chattonella marina</i></b> . . . . .	<b>75</b>
	Daekyung Kim and Tatsuya Oda	
<b>6</b>	<b>Identification of Nitrosylated Proteins (SNO) and Applications in Plants</b> . . . . .	<b>85</b>
	Jean-Benoît Peltier, Abasse Fares and Michel Rossignol	
<b>7</b>	<b>Nitric Oxide: Detection Methods and Possible Roles During Jasmonate-Regulated Stress Response</b> . . . . .	<b>127</b>
	Palmiro Poltronieri, Marco Taurino, Stefania Bonsegna, Stefania De Domenico and Angelo Santino	
<b>8</b>	<b>S-Nitrosoglutathione Reductase: Key Regulator of Plant Development and Stress Response</b> . . . . .	<b>139</b>
	Mounira Chaki and Christian Lindermayr	

<b>9 Nitro-Fatty Acids: Synthesis, Properties, and Role in Biological System . . . . .</b>	<b>153</b>
Homero Rubbo and Andrés Trostchansky	
 <b>Part II Nitric Oxide: Properties, Mode of Action and Functional Role in Stress Physiology</b>	
<b>10 Nitric Oxide and Reactive Nitrogen Species. . . . .</b>	<b>165</b>
Magdalena Arasimowicz-Jelonek, Jolanta Floryszak-Wieczorek, Dariusz Abramowski and Karolina Izbiańska	
<b>11 Nitric Oxide and Other Signaling Molecules: A Cross Talk in Response to Abiotic Stress . . . . .</b>	<b>185</b>
Wei-Biao Liao and Ji-Hua Yu	
<b>12 Cytoprotective Role of Nitric Oxide Under Oxidative Stress . . . .</b>	<b>199</b>
Y. S. Bakakina, E. V. Kolesneva, L. V. Dubovskaya and I. D. Volotovski	
<b>13 Phytohormones and Nitric Oxide Interactions During Abiotic Stress Responses. . . . .</b>	<b>211</b>
Paulo T. Mito, Luciano Freschi and Helenice Mercier	
<b>14 Tolerance of Plants to Abiotic Stress: A Role of Nitric Oxide and Calcium. . . . .</b>	<b>225</b>
M. Nasir Khan, Firoz Mohammad, M. Mobin and M. Ali Saqib	
<b>15 Abiotic Stress Tolerance in Plants: Exploring the Role of Nitric Oxide and Humic Substances . . . . .</b>	<b>243</b>
V. Mora, M. Olaetxea, E. Bacaicoa, R. Baigorri, M. Fuentes, A. M. Zamarreño and J. M. Garcia-Mina	
<b>16 Nitric Oxide in Relation to Plant Signaling and Defense Responses . . . . .</b>	<b>265</b>
Mui-Yun Wong, Mansour Salati and Yee-Min Kwan	
<b>17 The Role of Nitric Oxide in Programmed Cell Death in Higher Plants. . . . .</b>	<b>281</b>
Hu-Yi He, Ming-Hua Gu and Long-Fei He	
<b>Index . . . . .</b>	<b>297</b>

Nitric Oxide in Plants: Metabolism and Role in Stress  
Physiology

Khan, M.N.; Mobin, M.; Mohammad, F.; Corpas, F.J.  
(Eds.)

2014, XVI, 302 p. 39 illus., 17 illus. in color., Hardcover

ISBN: 978-3-319-06709-4
