

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Wireless Communication Networks	1
1.2	Economic Incentive Mechanisms	1
1.3	Auction Models in Spectrum Allocation	3
1.4	Book Organization	4
<b>2</b>	<b>Auction Mechanisms</b>	7
2.1	Overview	7
2.2	Definitions in Auction Mechanisms	8
2.3	Research Literature	9
2.4	Our Starting Points	11
2.4.1	Auction for Heterogeneous Spectrums	11
2.4.2	Spectrum Group-Buying Framework	12
2.4.3	Flexible Auction	12
2.5	Special Characters of Spectrum Auction	13
2.5.1	Interference and Reusability	13
2.5.2	Super-additive and Sub-additive	16
2.5.3	Group Structure	17
	References	17
<b>3</b>	<b>Truthful Double Auction Mechanism for Heterogeneous Spectrums</b>	19
3.1	Model Description and Design Targets	20
3.1.1	Problem Formulation	20
3.1.2	Design Target	21
3.2	Challenges of Heterogeneous Spectrum Auction Design	21
3.2.1	Spatial Heterogeneity	21
3.2.2	Frequency Heterogeneity	22
3.2.3	Market Manipulation	23
3.3	Auction Design: TAHES	23
3.3.1	Overview	24
3.3.2	Auction Procedure	24

3.3.3	Illustrative Example .....	28
3.3.4	Proofs of Economic Properties .....	29
3.4	Numerical Results .....	31
3.4.1	Simulation Settings .....	31
3.4.2	Truthfulness of TAHES .....	32
3.4.3	Impact on System Performance .....	32
3.5	Conclusions .....	36
	References .....	37
<b>4</b>	<b>Spectrum Group-Buying Framework .....</b>	<b>39</b>
4.1	Group-Buying Behavior of Users with Limited Budget .....	39
4.2	System Model .....	42
4.2.1	Problem Formulation .....	42
4.2.2	Objectives of Designing the Auction Framework .....	44
4.3	Three-Layer Auction Framework .....	44
4.3.1	Stage I: Group Budget Calculation for the Outer Auction .....	45
4.3.2	Stage II: The Inner Auction for Distributing Channels to SAPs .....	48
4.3.3	Stage III: The Outer Auction's Winner Determination and Pricing .....	51
4.4	Economic Properties and Time Complexity .....	51
4.4.1	Truthfulness .....	51
4.4.2	Time Complexity .....	53
4.5	Evaluation .....	53
4.6	Conclusion .....	56
	References .....	56
<b>5</b>	<b>Flexauc Auction: Serving Dynamic Demand in Wireless Market .....</b>	<b>57</b>
5.1	Bid According to Dynamic Demands .....	57
5.2	Problem Formulation .....	60
5.3	Flexible Auction Design .....	61
5.3.1	Users' Demand Strategies .....	61
5.3.2	WSPs' Pricing Strategies .....	62
5.3.3	WSPs' Bidding Strategies .....	63
5.3.4	Auction Design .....	65
5.3.5	Spectrum Partition .....	67
5.4	Economic Properties and Time Complexity .....	69
5.4.1	Truthfulness .....	69
5.4.2	Efficiency .....	70
5.4.3	Time Complexity .....	70
5.5	Evaluation .....	71
5.6	Conclusion .....	74
	References .....	74
<b>6</b>	<b>Conclusions .....</b>	<b>77</b>
<b>A</b>	<b>Proof of Theorems in Chapter 5 .....</b>	<b>79</b>
