1	Dynamical Systems	1
1.1	Introduction	1
1.2	Dynamical Systems and Mathematical Models	1
1.3	Kinematic Interpretation of a System of Differential Equations	3
1.4	Definition of a Dynamical System: Classification	4
1.5	Phase Portraits of Typical Oscillatory Systems	7
1.5.1	Conservative Oscillator	7
1.5.2	Damped Linear Oscillator	9
1.6	Self-Sustained Oscillatory Systems	11
1.7	Regular and Chaotic Attractors	13
1.8	Discrete-Time Systems: Return Maps	16
1.8.1	Stretching Map	20
1.8.2	Logistic Map	20
1.8.3	Sine Map	20
1.8.4	Henon Map	20
1.8.5	Lozi Map	20
1.9	Summary	21
	References	21
2	Stability of Dynamical Systems: Linear Approach	23
2.1	Introduction	23
2.2	Definition of Stability	24
2.3	Linear Analysis of Stability	25
2.3.1	Stability of Solutions of a First-Order Differential Equation	25
2.3.2	Stability of a Dynamical System in \mathbb{R}^N	27
2.4	Stability of Phase Trajectories in Discrete-Time Systems	33
2.5	Summary	34
	References	35

3	Bifurcations of Dynamical Systems	37
3.1	Introduction	37
3.2	Double Equilibrium Bifurcation	39
3.3	Soft and Hard Bifurcations: Catastrophes	40
3.4	Triple Equilibrium Bifurcation	41
3.5	Andronov–Hopf Bifurcation	43
3.6	Bifurcations of Limit Cycles	44
3.6.1	Saddle-Node Bifurcation	44
3.6.2	Period-Doubling Bifurcation	45
3.6.3	Two-Dimensional Torus Birth (Death) Bifurcation (Neimark–Saker Bifurcation)	46
3.6.4	Symmetry-Breaking Bifurcation	47
3.7	Nonlocal Bifurcations: Homoclinic Trajectories and Structures	48
3.7.1	Separatrix Loop of a Saddle Equilibrium Point	48
3.7.2	Saddle-Node Separatrix Loop	50
3.7.3	Homoclinic Trajectory Appearance of a Saddle Limit Cycle	51
3.8	Summary	52
	References	52
4	Dynamical Systems with One Degree of Freedom	53
4.1	Introduction	53
4.2	Limit Sets and Attractors in the Phase Plane: The Andronov–Poincaré Limit Cycle	54
4.3	Structural Stability of Systems in the Phase Plane: Andronov–Pontryagin Systems	56
4.3.1	Definition of Robustness of a Dynamical System	56
4.3.2	Definition of Structural Stability of a Dynamical System	57
4.3.3	Andronov–Pontryagin Theorem	57
4.4	Oscillators with One Degree of Freedom	58
4.4.1	Froude Pendulum	58
4.4.2	Fastened Weight on a Moving Belt	60
4.4.3	RC -Oscillator with Wien Bridge	62
4.4.4	Oscillatory Circuit with Active Nonlinear Element	63
4.5	Analysis of the van der Pol Equation: Onset of Self-Sustained Oscillations	65
4.5.1	Amplitude and Phase Equations for the Self-Sustained Oscillator	66
4.6	Oscillator with Hard Excitation of Self-Sustained Oscillations	69
4.6.1	Analysis of the Stability of Equilibrium States	69
4.6.2	Truncated Equations for the Amplitude and Phase for the Oscillator with Hard Excitation	70

4.6.3	Bifurcation Diagram of the Oscillator with Hard Excitation	71
4.7	Summary.....	73
	References.....	73
