
Contents

1	Transaction Cost	1
1.1	What Is Transaction Cost?	1
1.2	A Huge Number of Instances of Transaction Cost Reduction . . .	3
1.2.1	Instances Continuously Increase and Evolve	3
1.2.2	Partial List of Cases	4
1.2.3	Decrease of Digital Processing Cost as a Driver of Reducing Social Transaction Costs	19
1.3	Industry Structures from Perspectives of Transaction Cost . . .	21
1.3.1	Transactions are Universal Beyond Industries	21
1.3.2	Structural Changes of Transactions with Industries Level	24
1.4	Where and How Transaction Costs Are Incurred	25
1.4.1	Structure of Transactions and Transaction Cost Incurrence	26
1.4.2	Transaction Costs Are Incurred on the Customer Side As Well	31
1.4.3	Transaction Costs Are Incurred at Transaction Interfaces	32
1.4.4	Reduction of Transaction Costs by Fixing Transaction Interfaces	34
1.4.5	Costs that Are Not Transaction Costs	34
1.5	Reduction of Transaction Costs Leads to Increase of Sales, Enhancement of Product Development, and Development of Resources	36
1.5.1	Efficiency and Effectiveness	36
1.5.2	Objective Evaluation of Effectiveness in Management Is Impossible	39
1.5.3	Evaluation of Efficiency Is Much Easier	41
1.5.4	Value of Transaction Cost Analysis in Improvement of Effectiveness	42
1.5.5	BSC as a Means for Effective Assessment	44

2	Transaction Interface: Organization, Process, and System	45
2.1	Enhancement of Organizational Competitiveness Corresponds to Establishment of Interfaces	45
2.1.1	The Organization Is a Nexus of Interfaces	45
2.1.2	Fixing Transaction Interfaces That Are <i>Seemingly Irrelevant</i>	47
2.2	What Is Transaction Interface?	49
2.2.1	Interface Between Organizations/Departments/Individuals	49
2.2.2	Interfaces Between Mechanical Parts	52
2.3	Examples of Transaction Interfaces in Organizations	54
2.3.1	Interfaces for a Cross-Functional Team	54
2.3.2	Design Concept	55
2.3.3	Strategy and Policy	56
2.3.4	Mission, Corporate Philosophy, and Shared Values . . .	56
2.3.5	Customs and Tacit Knowledge	57
2.3.6	Trust	58
2.4	Examples of Transaction Interfaces in Markets	58
2.5	Layered Structure of Transaction Interface	60
3	Standard as Interface	65
3.1	Standard Corresponds to Interface	65
3.1.1	Discussion of Standard from Perspectives of Interface . . .	65
3.1.2	The Term <i>Standard</i> Has Various Aspects	67
3.1.3	Commonalities in Various Standards	70
3.1.4	Interface Standard	71
3.1.5	Standard as Product with Majority of Market Share . . .	74
3.1.6	Standards that Are Not Accepted by the Majority	75
3.1.7	Positive Feedback Structure During the Standardization Process	76
3.1.8	Drastically Increased Significance of Standard Due to the Structural Change by the Internet	78
3.2	Values of Standards	80
3.2.1	Variance in Values of Standards According to Stakeholder's Position	80
3.2.2	Values for Standard Advocators Besides Direct Revenues	81
3.3	Design Methodology, Cost, and ROI of Standards	84
3.4	Closed Standards and Open Standards (Level of Openness of Standards)	85
3.4.1	Opening Property Rights of Standards	85
3.4.2	Examples of Reducing Transaction Costs by Opening Property Rights	87

3.5	De Facto Standard Strategy	90
3.5.1	Enhancing Comprehension of Standards for Forming Effective Strategies	90
3.5.2	Accelerated Spread of the Zero-Price Business Model	91
3.5.3	Summary of the De Facto Standard Strategy	93
4	Module and Interface	97
4.1	What Is Modularity?	97
4.1.1	The Arguments About Modularity in Academia and Its Background	97
4.1.2	Intuitive Comprehension of Modularity	99
4.1.3	Definition of Modularity	108
4.1.4	Advantages of Modularity in the Global Changes	110
4.1.5	Requirements for Designing Interfaces of Modules . . .	114
4.1.6	Degree of Modularity	116
4.1.7	A Module as a Composite of Components in the Automotive Industry	119
4.1.8	A Module as a Composite of Components in the Electronic Parts Industry	121
4.1.9	Organizations as Modules	122
4.2	Design of Modules: Methodology, Cost, and ROI	123
4.3	Activation of SMEs by Shifting from Subcontracting to Winners by Applying Modular Structure	124
5	Coevolution of Markets and Organizations	127
5.1	Evolution of Organizations	127
5.2	Obstacles to the Advancement to Higher Stages	134
5.3	Synchronized Growth of IT Systems and Organizations	138
5.4	Growth of the Market (Society)	139
5.5	Coevolutions of Markets, Societies, Organizations, and Individuals	141
6	Methodologies for Designing and Managing Interfaces, Modules, Standards, and Processes	143
6.1	Common Requirements for Design Methodologies of Interfaces, Modules, Standards, and Processes	143
6.2	Methodologies for Design	146
6.2.1	Return on Investment Analysis as Asset	146
6.2.2	Proper Design for Satisfying Users' Needs	148
6.2.3	Proper Selection of Objects to Be Fixed	148
6.2.4	Design as "Simple Is Best"	150
6.3	Required Capabilities for the Designers	151
6.4	Marketing Methodology for Promoting Uses	156
6.5	Methodologies for Operation	157
6.5.1	Steady Implementation of the Effective Cycle	157
6.5.2	Accomplishment and Continuation of the Cycle	160

6.5.3	Avoidance of Bureaucratic Rigidification: Reconstructing Organizations for Flexible Decision Making	160
6.5.4	Appointment of Managers Responsible for the Effective Cycle	162
6.6	Background of Rejections of Interfaces and Countermeasures . . .	163
6.6.1	General Rationales for Rejecting Interfaces	163
6.6.2	Mechanism of Rejection and Exclusion of Modularization	168
6.6.3	Difference of Benefits and Attitudes by Stakeholders . . .	177
6.7	Essential Issues Behind the Rejections	179
6.7.1	Differences in Raison d'être of Organizations	179
6.7.2	Examples of the Two Groups in Comparison	186
7	Transaction Cost in Economics	191
7.1	What Is Transaction Cost Economics?	191
7.2	Williamson's Theory of Transaction Cost Economics	192
7.3	Unrealistic Presumptions in TCE Theory	194
7.4	Historical Background of the Emergence of TCE	204
7.4.1	TCE, Which Proposed Existence of Governance Function of Firms	204
7.4.2	Factors Contributing to the Increase in Transaction Costs that Were Neglected by Williamson	205
7.4.3	The Historical Background Behind Williamson's Radical Contributions	208
7.5	Comparing TCE and Modularization Theory	209
7.6	Possibilities for Further Development of TCE Theory	212
8	Application Examples of Transaction Cost Measurement and Analysis to Management	217
8.1	Transaction Cost Management as a New Management Methodology	217
8.1.1	Introduction of Quantitative Analysis into Organizational Value-Added Activities	217
8.1.2	Standardized and Systematic Approach Is Possible . . .	218
8.2	Transaction Cost Configuration Elements	219
8.3	Transactions Have a Multilevel Structure	221
8.4	Transaction Cost Analysis and Applications	225
8.4.1	Basic Concept of Analysis and Applications	225
8.4.2	Example of Business Visualization Based on Transaction Costs	227
8.4.3	Example of Visualizing Communication in a Meeting . .	233
8.5	Organizational Problems that Obstruct Business Activity Visualization	237

9	Logical Thinking/Creative Thinking	239
9.1	What Is Creativity?	239
9.2	Interindividual Transactions of Information	241
9.2.1	Knowledge Management as Transactions	241
9.2.2	Introduction of Frameworks in Information Transfer and Discussion: Extraction of Commonalities	243
9.2.3	Practical Examples in Discussions	247
9.2.4	The Significant Role of Facilitators in Meetings	249
9.3	Intraindividual Transactions of Information (Thinking Methodology)	250
9.3.1	Information-Processing Structure in the Thinking Process	250
9.3.2	Methodology to Enhance Capabilities in the Thinking Process	252
10	Innovation and Transaction Cost	255
10.1	What Is Innovation?	255
10.2	Promotion of Innovation Through Reduction of Transaction Costs	257
10.2.1	Difficulties of Innovations from Transaction Perspectives	257
10.2.2	Improvement of Transactions: Venture-Related Innovation in the Society	258
10.2.3	Transactions for Business Innovation Within a Company	259
10.3	Structure of Innovation Breakdown	260
	Epilogue	263
	Index	265

Transaction Cost Management
Strategies and Practices for a Global Open Economy
Suematsu, C.
2014, XVII, 273 p. 31 illus., Hardcover
ISBN: 978-3-319-06888-6
