

Contents

1	Introduction	1
1.1	Materials	1
1.1.1	Rubber Types	2
1.1.2	Vulcanization	3
1.1.3	Fillers	4
1.1.4	Reinforcement Mechanisms	9
1.1.5	Mechanical Behavior	13
1.2	X-Ray Scattering	20
1.2.1	Nature and Sources of X-Rays	21
1.2.2	Scattering and Diffraction	22
1.2.3	Small-Angle X-Ray Scattering	24
1.2.4	Wide-Angle X-Ray Diffraction	28
1.3	Crystallization in Natural Rubber	31
1.3.1	General Aspects of Crystallization in Natural Rubber	31
1.3.2	Kinetics of Crystallization	33
1.4	Cavitation	35
	References	37
2	Motivation and Objectives	47
3	Experimental	51
3.1	Materials and Samples	51
3.1.1	Compounding	51
3.1.2	Vulcanization	52
3.1.3	Sample Geometry	53
3.2	Synchrotron Experiments	54
3.2.1	Beamline Setup	54
3.2.2	Quasistatic Tensile Experiments	57
3.2.3	Cyclic Dynamic Tensile Experiments	59
3.2.4	Tensile Impact Experiments	60
3.2.5	Biaxial Tensile Experiments	61
3.2.6	Static Crack Tip Scans	61
3.2.7	Dynamic Crack Tip Scans	62
3.2.8	Crystallinity Determination by WAXD	63

3.2.9	Study of Filler Orientation by SAXS	65
3.2.10	Cavitation Analysis by USAXS	67
3.3	Mechanical Testing	68
3.4	Optical Volumetric Studies	69
3.5	Scanning Electron Microscopy	70
	References	71
4	Results.	73
4.1	Crystallization Under Quasistatic Load.	73
4.1.1	General Structure-Property Relationships	73
4.1.2	Strain Amplification in Filled Rubbers	78
4.1.3	Local Structure Around a Crack Tip	80
4.1.4	In-situ Observation of Static Crack Growth and Deflection	82
4.1.5	Crystallization Under Biaxial Load	83
4.2	Kinetics of Strain-Induced Crystallization in Natural Rubber . . .	85
4.2.1	Tensile Impact Experiments	86
4.2.2	Dynamic Cyclic Experiments	90
4.3	Crystallinity Around a Crack Tip Under Dynamic Load.	92
4.3.1	Comparison Between Static and Dynamic Loading	92
4.3.2	Influence of R-Ratio	93
4.4	Filler Orientation.	94
4.5	Cavitation.	96
4.5.1	Cavitation Studies by USAXS	96
4.5.2	Volumetric Changes Determined by Optical Methods . . .	98
4.6	Morphological Studies by Scanning Electron Microscopy.	99
4.6.1	Real-Time Observation of Crack Growth.	99
4.6.2	Structure of Carbon Black Around a Crack Tip	99
4.6.3	Strain Field on the Microscale	100
4.6.4	Adhesion of Zinc Oxide.	100

In-situ Structure Characterization of Elastomers during
Deformation and Fracture

Brüning, K.

2014, XIV, 124 p. 82 illus., 51 illus. in color., Hardcover

ISBN: 978-3-319-06906-7
