

# Contents

<b>Computing an Upper Bound for the Longest Edge in an Optimal TSP-Solution. . . . .</b>	<b>1</b>
Hans Achatz and Peter Kleinschmidt	
<b>Electricity Storage Systems and Their Allocation in the German Power System . . . . .</b>	<b>7</b>
Sonja Babrowski, Patrick Jochem and Wolf Fichtner	
<b>Misspecified Dependency Modelling: What Does It Mean for Risk Measurement? . . . . .</b>	<b>15</b>
Theo Berger	
<b>Primal MINLP Heuristics in a Nutshell . . . . .</b>	<b>23</b>
Timo Berthold	
<b>Layout Optimisation of Decentralised Energy Systems Under Uncertainty . . . . .</b>	<b>29</b>
Valentin Bertsch, Hannes Schwarz and Wolf Fichtner	
<b>Analysis of Micro–Macro Transformations of Railway Networks . . . .</b>	<b>37</b>
Marco Blanco and Thomas Schlechte	
<b>A Human Resource Model for Performance Optimization to Gain Competitive Advantage . . . . .</b>	<b>43</b>
Joachim Block and Stefan Pickl	
<b>Re-Optimization of Rolling Stock Rotations . . . . .</b>	<b>49</b>
Ralf Borndörfer, Julika Mehrgardt, Markus Reuther, Thomas Schlechte and Kerstin Waas	
<b>Branch-and-Price on the Split Delivery Vehicle Routing Problem with Time Windows and Alternative Delivery Periods . . . . .</b>	<b>57</b>
Heiko Breier and Timo Gossler	

<b>Welfare Maximization of Autarkic Hybrid Energy Systems . . . . .</b>	<b>67</b>
Katja Breitmoser, Björn Geißler and Alexander Martin	
<b>Determining Optimal Discount Policies for a Supplier in B2B Relationships. . . . .</b>	<b>75</b>
Viktoryia Buhayenko and Erik van Eikenhorst	
<b>Exact and Compact Formulation of the Fixed-Destination Travelling Salesman Problem by Cycle Imposition Through Node Currents . . . . .</b>	<b>83</b>
Mernout Burger	
<b>0–1 Multiband Robust Optimization . . . . .</b>	<b>89</b>
Christina Büsing, Fabio D’Andreagiovanni and Annie Raymond	
<b>A Branch-and-Price Approach for a Ship Routing Problem with Multiple Products and Inventory Constraints . . . . .</b>	<b>97</b>
Rutger de Mare, Remy Spliet and Dennis Huisman	
<b>Data Driven Ambulance Optimization Considering Dynamic and Economic Aspects. . . . .</b>	<b>105</b>
Dirk Degel, Lara Wiesche and Brigitte Werners	
<b>Risk-Adjusted On-line Portfolio Selection. . . . .</b>	<b>113</b>
Robert Dochow, Esther Mohr and Günter Schmidt	
<b>Quantified Combinatorial Optimization . . . . .</b>	<b>121</b>
Thorsten Ederer, Ulf Lorenz and Thomas Opfer	
<b>On the Modeling of Recharging Stops in Context of Vehicle Routing Problems . . . . .</b>	<b>129</b>
Stefan Frank, Henning Preis and Karl Nachtigall	
<b>Demand Fulfillment in an Assemble-to-Order Production System . . . .</b>	<b>137</b>
Sebastian Geier and Bernhard Fleischmann	
<b>Integrating Keyword Advertising and Dynamic Pricing for an Online Market Place. . . . .</b>	<b>145</b>
Thomas Goertz, Jella Pfeiffer, Henning Schmidt and Franz Rothlauf	
<b>Characterizing Relatively Minimal Elements via Linear Scalarization. . . . .</b>	<b>153</b>
Sorin-Mihai Grad and Emilia-Loredana Pop	

<b>An MBLP Model for Scheduling Assessment Centers . . . . .</b>	161
Joëlle Grüter, Norbert Trautmann and Adrian Zimmermann	
<b>DEA Modeling for Efficiency Optimization of Indian Banks with Negative Data Sets. . . . .</b>	169
Pankaj Kumar Gupta and Seema Garg	
<b>The Inventory Management of Fresh Vegetables Using Inventory Balance and Across of Its Supply Chain. . . . .</b>	177
Adi Djoko Guritno, Henry Yuliando and Endy Suwondo	
<b>Moving Bins from Conveyor Belts onto Pallets Using FIFO Queues . . . . .</b>	185
Frank Gurski, Jochen Rethmann and Egon Wanke	
<b>A Generalization of Odd Set Inequalities for the Set Packing Problem. . . . .</b>	193
Olga Heismann and Ralf Borndörfer	
<b>New Lower Bounds for the Three-Dimensional Strip Packing Problem. . . . .</b>	201
Kirsten Hoffmann	
<b>A New Method for Parameter Estimation of the GNL Model Using Real-Coded GA . . . . .</b>	209
Yasuhiro Iida, Kei Takahashi and Takahiro Ohno	
<b>Inventory Control with Supply Backordering. . . . .</b>	217
Marko Jakšič	
<b>Sequencing Problems with Uncertain Parameters and the OWA Criterion . . . . .</b>	223
Adam Kasperski and Paweł Zieliński	
<b>Application of Scheduling Theory to the Bus Evacuation Problem . . .</b>	231
Corinna Kaufmann	
<b>Modelling Delay Propagation in Railway Networks . . . . .</b>	237
Fabian Kirchhoff	
<b>Sensitivity Analysis of BCC Efficiency in DEA with Application to European Health Services . . . . .</b>	243
Andreas Kleine, Andreas Dellnitz and Wilhelm Rödder	

<b>Competition for Resources. . . . .</b>	<b>249</b>
Max Klimm	
<b>Measurement of Risk for Wind Energy Projects: A Critical Analysis of Full Load Hours . . . . .</b>	<b>255</b>
André Koukal, Stefan Lange and Michael H. Breitner	
<b>An Integer Programming Approach to the Hospitals/Residents Problem with Ties. . . . .</b>	<b>263</b>
Augustine Kwanashie and David F. Manlove	
<b>Learning in Highly Polarized Conflicts. . . . .</b>	<b>271</b>
Sigifredo Laengle and Gino Loyola	
<b>Marginal Cost of Capacity for the Case of Overlapping Capacity Investments. . . . .</b>	<b>279</b>
Christian Lohmann	
<b>Supply Chain Coordination Under Demand Uncertainty: Analysis of General Continuous Quantity Discounts . . . . .</b>	<b>287</b>
Hamid Mashreghi and Mohammad Reza Amin-Naseri	
<b>An Integer Programming Model for the Hospitals/Residents Problem with Couples . . . . .</b>	<b>293</b>
Iain McBride and David F. Manlove	
<b>Techno-economic Analysis and Evaluation of Recycling Measures for Iron and Steel Slags. . . . .</b>	<b>301</b>
Christoph Meyer, Matthias G. Wichmann and Thomas S. Spengler	
<b>Dynamical Supply Networks for Crisis and Disaster Relief: Networks Resilience and Decision Support in Uncertain Environments . . . . .</b>	<b>309</b>
Silja Meyer-Nieberg, Erik Kropat and Patrick Dolan Weber	
<b>A Column Generation Approach to Home Care Staff Routing and Scheduling . . . . .</b>	<b>317</b>
Susumu Morito, Daiki Kishimoto, Hiroki Hayashi, Atsushi Torigoe, Shigeo Okamoto, Yuki Matsukawa and Nao Taniguchi	
<b>A Dynamic Customer-Centric Pricing Approach for the Product Line Pricing Problem . . . . .</b>	<b>325</b>
Michael Neugebauer	

<b>Mathematical Formulations for the Acyclic Partitioning Problem . . . .</b>	<b>333</b>
Jenny Nossack and Erwin Pesch	
<b>Minimizing Risks for Health at Assembly Lines . . . . .</b>	<b>341</b>
Alena Otto	
<b>A Multi-Objective Online Terrain Coverage Approach. . . . .</b>	<b>347</b>
Michael Preuß	
<b>Hot Strip Mill Scheduling Under Consideration of Energy Consumption. . . . .</b>	<b>355</b>
Karen Puttkammer, Matthias G. Wichmann and Thomas S. Spengler	
<b>Capacitated Network Design . . . . .</b>	<b>363</b>
Christian Raack	
<b>Robustness Analysis of Evolutionary Algorithms to Portfolio Optimization Against Errors in Asset Means . . . . .</b>	<b>369</b>
Omar Rifki and Hirotaka Ono	
<b>Two-Stage Robust Combinatorial Optimization with Priced Scenarios . . . . .</b>	<b>377</b>
Roman Rischke	
<b>Workload Balancing in Transportation Crew Rostering . . . . .</b>	<b>383</b>
Güvenç Şahin and Fardin Dashty Saridarq	
<b>An Optimal Placement of a Liaison with Short Communication Lengths Between Two Members of the Same Level in an Organization Structure of a Complete K-ary Tree. . . . .</b>	<b>389</b>
Kiyoshi Sawada	
<b>Clustering for Data Privacy and Classification Tasks . . . . .</b>	<b>397</b>
Klaus B. Schebesch and Ralf Stecking	
<b>A Decision Support Concept for Advanced Treatment Planning for Breast Cancer . . . . .</b>	<b>405</b>
Alexander Scherrer, Patrick Rüdiger, Andreas Dinges, Karl-Heinz Küfer, Ilka Schwidde and Sherko Kümmel	
<b>Comparison of Heuristics Towards Approaching a Scheduling and Capacity Planning MINLP for Hydrogen Storage in Chemical Substances . . . . .</b>	<b>413</b>
Simon Schulte Beerbühl, Magnus Fröhling and Frank Schultmann	

<b>Influence of Fluctuating Electricity Prices due to Renewable Energies on Heat Storage Investments . . . . .</b>	421
Katrin Schulz, Matthias Schacht and Brigitte Werners	
<b>The Effects of Customer Misclassification on Cross-Training in Call Centers . . . . .</b>	429
Andreas Schwab and Burak Büke	
<b>Inventory Management with Transshipments Under Fill Rate Constraints . . . . .</b>	437
Andreas Serin and Bernd Hillebrand	
<b>Solution Method for the Inventory Distribution Problem . . . . .</b>	443
Takayuki Shiina	
<b>Application of Sampling Plan Methods: Case of Indonesian Sugar Company . . . . .</b>	451
Endy Suwondo, Henry Yuliando and Adi Djoko Guritno	
<b>Transportation Costs and Carbon Emissions in a Vendor Managed Inventory Situation. . . . .</b>	459
Marcel Turkensteen and Christian Larsen	
<b>Fuel Consumption Costs of Routing Uncertainty . . . . .</b>	465
Stephan Unger and William Cheung	
<b>Optimization of Sales and Operations Planning at Shell Chemicals Europe . . . . .</b>	473
Thijs van Dongen and Dave van den Hurck	
<b>Time-Dependent Dynamic Location and Relocation of Ambulances . . . . .</b>	481
Lara Wiesche	
<b>Inventory Replenishment Models with Advance Demand Information for Agricultural Online Retailers . . . . .</b>	487
Haoxuan Xu, Yeming Gong, Chengbin Chu and Jinlong Zhang	
<b>Coordinating a Three-Echelon Telecom Supply Chain with Spanning and Pair-Wise Revenue Sharing Contracts . . . . .</b>	495
Azarm Yeganehfallah, Hamid Mashreghi and Mohammad Reza Amin-Naseri	

**The Material Loss and Failure Process in Sugar Production  
in Indonesia: A Case . . . . . 503**  
Henry Yuliando, Adi Djoko Guritno and Endy Suwondo

**Author Index . . . . . 511**

Operations Research Proceedings 2013

Selected Papers of the International Conference on  
Operations Research, OR2013, organized by the  
German Operations Research Society (GOR), the Dutch  
Society of Operations Research (NGB) and Erasmus  
University Rotterdam, September 3-6, 2013

Huisman, D.; Louwerse, I.; Wagelmans, A.P.M. (Eds.)

2014, XIII, 513 p. 100 illus., Softcover

ISBN: 978-3-319-07000-1
