1	Preamble	1
	References	5
 Part I Introduction to the Basic Elements		
2	Quantum Information	9
2.1	Why Quantum Information	9
2.1.1	Quantum Computation	10
2.1.2	Quantum Communication	11
2.1.3	Quantum Simulation	11
2.1.4	Quantum Metrology	12
2.2	Basic Elements of Quantum Information	12
2.2.1	The Quantum Bit	12
2.2.2	The Density Matrix	13
2.2.3	Bi-Partite Systems and Entanglement	13
2.3	Quantum Gates	14
2.4	Quantum Processes and Time Evolution	15
2.4.1	Unitary Evolution of Closed Systems	15
2.4.2	Nonunitary Evolution: Quantum Maps	16
2.5	Quantum State Tomography	17
2.6	Comparison Between Theory and Experiment	18
2.6.1	Quantum State Fidelity	18
2.6.2	Trace-Distance	19
2.6.3	Comparison Between Processes	19
2.6.4	Comparison Between Probability Distributions: Similarity	20
	References	21
3	Quantum Information with Photonics	23
3.1	Experimental Tools for Quantum Information via Quantum Optics	23

3.1.1	Preparation	23
3.1.2	Manipulation	25
3.1.3	Analysis.	26
3.2	Optical Beam Splitter: The Hong–Ou–Mandel Effect.	26
3.2.1	Entangled States on a Beam Splitter	27
	References	28
4	Integrated Waveguide Technology	29
4.1	Optical Waveguides	29
4.1.1	Two-Dimensional Waveguides	30
4.1.2	Coupling Between Waveguides.	31
4.1.3	The Coupler	32
4.2	Integrated Circuit Fabrication Techniques.	32
4.2.1	Lithography	33
4.2.2	Ultrafast Laser Writing	35
4.3	What About Polarization and Entanglement on Integrated Circuits?	39
	References	40
 Part II Integrated Devices for Quantum Information		
5	Polarization Dependent and Independent Devices	45
5.1	Ultrafast Laser Written Directional Coupler	45
5.1.1	Device Fabrication	47
5.1.2	Waveguide Birefringence Characterization.	47
5.2	Polarization Entangled States Measurement on a Chip.	48
5.2.1	Experimental Setup	49
5.2.2	Results.	50
5.3	Exploiting Three-Dimensional Capabilities for Polarization Independent Circuits Realization	53
5.4	Polarization Dependent Devices: Directional Couplers as Partial Polarizing Beam Splitter	54
	References	56
6	Quantum Computation: Integrated Quantum Gates for Polarization Encoded Qubits.	57
6.1	Introduction	57
6.2	Integrated CNOT Gate	57
6.2.1	Devices Fabrication.	59
6.2.2	Quantum Measurements.	60
	References	62

7 Process Characterization	65
7.1 Introduction	65
7.2 Quantum Process Tomography	66
7.3 QPT of a Partially Transmitting Polarizing Beam Splitter.	68
7.3.1 Experimental QPT of a PPBS.	69
7.3.2 Trace-Preserving Approximation.	72
7.3.3 Quantum Process Tomography of the Integrated CNOT Gate	73
7.4 Variational Quantum Process Tomography	75
7.4.1 Variational Quantum Process Tomography: Basic Theory	76
7.4.2 Experimental VQT of CZ Gate.	81
References	83

Part III Quantum Simulation

8 Introduction to Quantum Simulation	87
8.1 Analogic and Digital Quantum Simulator	88
8.2 Quantum Simulation with Quantum Optics	88
8.2.1 A Photonic Quantum Simulator	89
8.3 Quantum Simulation by Quantum Walks	90
8.3.1 Classical Random Walk	90
8.3.2 Discrete-Time Quantum Walk	92
References	93
9 Bosonic and Fermionic Quantum Walk	97
9.1 Optical Implementation of Quantum Walk	97
9.1.1 Quantum Walk by Quantum Optics: Experimental Setups	98
9.1.2 Discrete-Time Quantum Walk Optical Scheme	99
9.1.3 Integrated Quantum Walk Circuit	100
9.2 Experimental Bosonic and Fermionic Quantum Walk	101
9.2.1 Single-Particle Quantum Walk	102
9.2.2 Two-Particle Quantum Walk	103
9.2.3 Equivalence Between Entangled States and Boson–Fermion Quantum Walk	106
9.3 Conclusion	108
References	108
10 Quantum Transport in Presence of Disorder	111
10.1 Static Disorder and Anderson Localization	111
10.1.1 An Introduction to Anderson Localization	112
10.1.2 Discrete-Time Quantum Walk in Presence of Disorder.	113

10.2 Anderson Localization of Polarization-Entangled Photons in an Integrated Quantum Walk	114
10.2.1 Integrated Quantum Walk Circuit: Phase Shifter Realization	115
10.2.2 Quantum Walk in Presence of Static Disorder	117
10.3 Relative Distance Versus Two-Photon Mean Position	123
10.4 Quantum Walk in Presence of Dynamic and Fluctuating Disorder	127
10.5 Conclusion	129
References	130
11 Conclusion	133
References	135
About the Author	137
List of Publications	139

Integrated Devices for Quantum Information with
Polarization Encoded Qubits

Sansoni, L.

2014, XII, 140 p. 48 illus., 19 illus. in color., Hardcover

ISBN: 978-3-319-07102-2
