

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Introduction	1
1.2	Speaker Recognition	2
1.3	Types of Speaker Recognition	4
1.3.1	Speaker Identification	4
1.3.2	Speaker Verification	5
1.4	Challenging Issues in Speaker Recognition	6
1.5	Issue Addressed in Book	7
1.6	Objective and Scope of Work	10
1.7	Organization of the Book	10
1.8	Contribution of the Book	11
	References	11
<b>2</b>	<b>Robust Speaker Verification: A Review</b>	13
2.1	Feature Compensation	14
2.2	Robust Feature Extraction	16
2.3	Model Compensation	18
2.4	Robust Speaker Modeling	20
2.5	Motivation for the Present Work	22
	References	23
<b>3</b>	<b>Speaker Verification in Noisy Environments Using Gaussian Mixture Models</b>	29
3.1	Introduction	29
3.2	GMM-UBM Framework for Speaker Verification	30
3.3	Development of GMM-UBM Based Speaker Verification Systems	33
3.3.1	Simulation of Background	33
3.3.2	Preprocessing	34
3.3.3	Feature Extraction	34
3.3.4	Speaker Modeling	35
3.3.5	Performance Evaluation	35

3.4	Feature Mapping for Speaker Verification in Varying Background Environment .....	39
3.4.1	Multiple Background Models Based on Vocal Tract Length .....	41
3.4.2	Feature Mapping Using Multiple Background Models .....	42
3.5	Development of Speaker Verification Systems in Feature Mapping Framework .....	43
3.6	Summary .....	45
	References .....	46
<b>4</b>	<b>Stochastic Feature Compensation for Robust Speaker Verification .....</b>	<b>49</b>
4.1	Stochastic Feature Compensation (SFC) .....	50
4.2	SFC Using Independent Probability Models .....	51
4.2.1	Multivariate Gaussian-Based Cepstral Normalization (RATZ) .....	52
4.2.2	Stereo Piece-Wise Linear Compensation for Environment (SPLICE) .....	54
4.2.3	Multivariate Model Based Cepstral Normalization (MMCN) .....	55
4.3	SFC Using Joint Probability Models .....	58
4.3.1	Stereo-Based Stochastic Mapping (SSM) .....	59
4.3.2	Trajectory-Based Stochastic Mapping (TRAJMAP) .....	61
4.4	Development of Proposed SV Systems .....	64
4.4.1	Simulation of Background Environment .....	64
4.4.2	Feature Extraction and Speaker Modeling .....	66
4.4.3	Feature Compensation .....	66
4.4.4	Effect of Feature Compensation in Cepstral Domain .....	67
4.4.5	Performance Evaluation .....	70
4.5	Summary .....	74
	References .....	75
<b>5</b>	<b>Robust Speaker Modeling for Speaker Verification in Noisy Environments .....</b>	<b>77</b>
5.1	GMM-SVM Combined Approach for Speaker Verification .....	78
5.1.1	Support Vector Machines .....	79
5.1.2	Construction of GMM Supervectors .....	79
5.1.3	SVM Kernels .....	80
5.1.4	SVM Scoring .....	82
5.1.5	Experimental Setup .....	82
5.1.6	Performance Evaluation .....	83
5.2	Utterance Partitioning for Improving GMM-SVM Based Speaker Verification Performance .....	91
5.3	Total Variability Modeling for Speaker Verification .....	100
5.3.1	i-Vector Extraction .....	101
5.3.2	SVM Training .....	102

5.3.3	Inter-session Compensation .....	102
5.3.4	Score Calculation .....	104
5.3.5	Experimental Setup .....	104
5.4	Adaptive Boosting for Improved Speaker Verification	
	Performance in Noisy Environments .....	107
5.4.1	Proposed Boosting Algorithm (DataBoost-UP) .....	108
5.4.2	Performance Evaluation .....	110
5.5	Summary .....	112
	References .....	113
<b>6</b>	<b>Summary and Conclusion</b> .....	<b>115</b>
6.1	Summary of the Book .....	115
6.2	Major Contribution of the Book .....	116
6.3	Scope for Future Work .....	117
	Reference .....	118
<b>A</b>	<b>Mathematical Details of Stochastic Feature Compensation Methods</b> ..	<b>119</b>
A.1	MMSE Estimators for Feature Compensation .....	119
A.1.1	RATZ .....	120
A.1.2	SPLICE .....	120
A.1.3	MEMLIN .....	121
A.2	Expectation Maximization Algorithms for Feature Compensation ..	122
A.2.1	RATZ .....	123
A.2.2	SPLICE .....	124
A.2.3	TRAJMAP .....	125
<b>B</b>	<b>Gaussian Mixture Model</b> .....	<b>129</b>
B.1	Training the GMMs .....	130
B.1.1	Expectation Maximization (EM) Algorithm .....	130
B.2	Testing .....	132
	References .....	132
<b>C</b>	<b>MFCC Features</b> .....	<b>133</b>
	References .....	136
<b>D</b>	<b>Total Variability Training</b> .....	<b>137</b>
