

Contents

1	Sensitivity Analysis of Multibody Dynamic Systems Modeled by ODEs and DAEs	1
	Daniel Dopico, Adrian Sandu, Corina Sandu and Yitao Zhu	
2	A Lagrangian–Lagrangian Framework for the Simulation of Rigid and Deformable Bodies in Fluid.	33
	Arman Pazouki, Radu Serban and Dan Negrut	
3	Strategies for Adaptive Model Reduction with DCA-Based Multibody Modeling of Biopolymers	53
	Jeremy J. Laflin, Kurt S. Anderson and Imad M. Khan	
4	A Mortar Method Combined with an Augmented Lagrangian Approach for Treatment of Mechanical Contact Problems.	69
	Federico J. Cavalieri, Olivier Bröls and Alberto Cardona	
5	Contact Dynamics Formulation Using Minimal Coordinates	93
	Abhinandan Jain	
6	Modelling and Integration Concepts of Multibody Systems on Lie Groups	123
	Andreas Müller and Zdravko Terze	
7	Solvability of Geometric Integrators for Multibody Systems. . . .	145
	Marin Kobilarov	
8	Variational Lie Group Formulation of Geometrically Exact Beam Dynamics: Synchronous and Asynchronous Integration . . .	175
	Thomas Leitz, Sina Ober-Blöbaum and Sigrid Leyendecker	
9	On the Use of Geometrically Exact Shells for Dynamic Tire Simulation	205
	Michael Roller, Peter Betsch, Axel Gallrein and Joachim Linn	

10	Application of a Gyrostatic Rigid Body Formulation in the Context of a Direct Transcription Method for Optimal Control in Multibody Dynamics	237
	Christian Becker and Peter Betsch	
11	Development of Tether Space Mobility Device	255
	Shoichiro Takehara, Takahiro Nishizawa, Masaya Kawarada, Kazunori Hase and Yoshiaki Terumichi	
12	Design Methodology of a Complex CKC Mechanical Joint with an Energetic Representation Tool “Multibond Graph”: Application to the Helicopter	275
	Benjamin Boudon, François Malburet and Jean-Claude Carmona	
13	Comparison and Field Test Validation of Various Multibody Codes for Wind Turbine Modelling.	301
	János Zierath, Roman Rachholz and Christoph Woernle	
14	A Real-Time Multibody Dynamics Model for an Unmanned Robot Vehicle Based on the Subsystem Synthesis Method	333
	Myoung-Ho Kim, Hee Chan Kang and Sung-Soo Kim	
15	History of Benchmark Problems in Multibody Dynamics.	357
	Werner Schiehlen	

Multibody Dynamics

Computational Methods and Applications

Terze, Z. (Ed.)

2014, VIII, 368 p. 162 illus., Hardcover

ISBN: 978-3-319-07259-3
