

# Contents

<b>1</b>	<b>Effect of Structure and Microstructure on the Thermoelectric Properties of <math>\text{Yb}_{0.19}\text{Co}_4\text{Sb}_{12}</math> Alloy .....</b>	<b>1</b>
	A. Castellero, M. Ostorero, A. Ziggiotti, M. Brignone, and M. Baricco	
<b>2</b>	<b>Thermoelectric Properties of Hot-Pressed <math>\text{K}_2\text{Bi}_{8-x}\text{Sb}_x\text{Se}_{13}</math> Materials .....</b>	<b>11</b>
	T. Kyratsi and M. Ioannou	
<b>3</b>	<b>Effect of Open Die Pressing on the Chemical-Physical Properties of <math>\text{Zn}_4\text{Sb}_3</math> Compound.....</b>	<b>19</b>
	R. Carlini, C. Fanciulli, A. Castellero, F. Passaretti, M. Baricco, and G. Zanicchi	
<b>4</b>	<b>Phase Selection and Microstructure Refinement of Melt-Spun <math>\text{Zn}_4\text{Sb}_3</math>-Type Compound .....</b>	<b>29</b>
	R. Carlini, A. Castellero, C. Fanciulli, F. Passaretti, M. Baricco, and G. Zanicchi	
<b>5</b>	<b>The Role of Sodium-Rich Pretreatments in the Enhanced Sintering of Sodium Cobalt Oxide Thermoelectric Ceramics .....</b>	<b>37</b>
	E.M. Jakubczyk, C.L. Sansom, and R.A. Dorey	
<b>6</b>	<b>Novel Process for Metal Silicide Nanostructures Regarding Cheap and Large-Scale Material Synthesis.....</b>	<b>43</b>
	A. Schönecker, P.-Y. Pichon, J. König, M. Jägle, M. den Heijer, and B. Kraaijveld	
<b>7</b>	<b>A Flexible Measurement System for the Characterization of Thermoelectric Materials.....</b>	<b>53</b>
	M. Schönhoff, F. Assion, and U. Hilleringmann	

<b>8</b>	<b>A Comparison of Thermoelectric Devices Evaluation Results Obtained with a Harman Method Based and a Porcupine Method Based <math>zT</math> Meters .....</b>	<b>61</b>
	A. De Marchi, V. Giaretto, S. Caron, A. Tona, and A. Muscio	
<b>9</b>	<b>Sintered Nano-Ag as Joining Material for Thermoelectric Modules.....</b>	<b>71</b>
	K. Brinkfeldt, J. Simon, K. Romanjek, S. Noel, M. Edwards, J. Räthel, M. Da Silva, and D. Andersson	
<b>10</b>	<b>Anodized Aluminum as Effective and Cheap Alternative Substrate for Thermoelectric Generators.....</b>	<b>83</b>
	F. Assion, V. Geneiß, M. Schönhoff, C. Hedayat, and U. Hilleringmann	
<b>11</b>	<b>Silica-Based Materials for Thermoelectric-Legs Embedding .....</b>	<b>89</b>
	A. Famengo, S. Boldrini, S. Battiston, S. Fiameni, A. Miozzo, M. Fabrizio, and S. Barison	
<b>12</b>	<b>Finite Element Approach for the Evaluation and Optimization of Silicide-Based TEG.....</b>	<b>99</b>
	A. Miozzo, S. Boldrini, S. Battiston, A. Famengo, S. Fiameni, T. Sakamoto, and S. Barison	
<b>13</b>	<b>Reliable Thermoelectric Generators for Space Missions .....</b>	<b>109</b>
	S.V. Novikov, E.Z. Parparov, and M.I. Fedorov	
<b>14</b>	<b>Challenges in Dimensioning of an Optimized Thermoelectric Generator for Waste Heat Recovery in Cars.....</b>	<b>117</b>
	M. Rauscher, T. Richter, F. Finsterwalder, and D. Schramm	
<b>15</b>	<b>Assessment of Thermoelectric Power Generation for Hybrid Electric Vehicles Based on Tracked Data .....</b>	<b>129</b>
	M. Morschel, B. Hesse, G. Bastian, and D. Schramm	
<b>16</b>	<b>Thermoelectric Generator for Low Temperature Applications.....</b>	<b>137</b>
	M. Follmer, B. Steiner, and D. Knospe	
<b>17</b>	<b>Waste Heat Recovery in Steelworks Using a Thermoelectric Generator.....</b>	<b>143</b>
	T. Kuroki, K. Kabeya, K. Makino, H. Kaibe, H. Hachiuma, and A. Fujibayashi	
<b>18</b>	<b>Thermoelectric Generator Power Converter System Configurations: A Review.....</b>	<b>151</b>
	E.A. Man, E. Schaltz, and L. Rosendahl	
<b>19</b>	<b>Transient Thermal Response of Heat Sinks and Its Implication on Power Control Strategies.....</b>	<b>167</b>
	N. Youn, Y.P. Kim, and D. Wee	

<b>20</b>	<b>Feasibility Study on Screen Printing as a Fabrication Technique for Low-Cost Thermoelectric Devices .....</b>	<b>177</b>
	I.A. Dimitriadou, A. Fulham, M.C. Robbins, K. Simpson, R.A. Dorey, P. Jones, S. Bernadet, J. Laroche, S. Piles Guillem, C. Potyrala, and J. Wood	
<b>21</b>	<b>Improving Thermoelectric Cooling by Light Emission.....</b>	<b>183</b>
	G. Min	
<b>22</b>	<b>Simulation of Power Management Electronics and Energy Storage Unit for MEMS Thermoelectric Generator.....</b>	<b>189</b>
	L. Janak, Z. Hadas, Z. Ancik, and P. Kopecek	
<b>23</b>	<b>Experimental Validation of a Multiphysics Model for the Optimization of Thermoelectric Generators.....</b>	<b>197</b>
	C. Favarel, J.P. Bedecarrats, T. Kousksou, and D. Champier	
<b>24</b>	<b>Electrical and Configuration Characterization of Thermoelectric Generator Modules.....</b>	<b>205</b>
	M.A. Ashari, A.A. Abd. Rahman, and S. Sulaiman	
<b>25</b>	<b>Modelica® Library for Dynamic Simulation of Thermoelectric Generators.....</b>	<b>213</b>
	M. Nesarajah, L. Exel, and G. Frey	
<b>26</b>	<b>Modeling and Design of Tubular Thermoelectric Generator Used for Waste Heat Recovery .....</b>	<b>219</b>
	H. Tjoa, B. Plochmann, and G. Fischerauer	
	<b>Index.....</b>	<b>227</b>

Proceedings of the 11th European Conference on  
Thermoelectrics

ECT 2013

Amaldi, A.; Tang, F. (Eds.)

2014, XVII, 228 p. 130 illus., 99 illus. in color.,

Hardcover

ISBN: 978-3-319-07331-6
