

Contents

1	Introduction	1
1.1	Overview of Maritime Wideband Networks	1
1.2	Maritime Video Applications	2
1.3	Challenges to Video Transmission Scheduling	4
1.4	Our Contributions	5
	References	6
2	Background and Literature Survey	9
2.1	Preliminaries: Milestone of Maritime Wideband Network	9
2.2	Video Transmission Scheduling	10
2.3	Energy Modeling Based Video Transmission Scheduling	11
2.4	Summary	13
	References	13
3	Video Transmission Scheduling in Maritime Wideband Communication Networks	15
3.1	System Model	15
3.1.1	Store-Carry-and-Forward Routing	16
3.1.2	Network Resources	16
3.1.3	Video Service	17
3.1.4	Time-Capacity Mapping	18
3.2	Problem Formulation	19
3.2.1	Formulation of Multi-Vessel Cooperation Delivery	19
3.2.2	Capacity Based Formulation	20
3.3	Proposed Algorithms	20
3.3.1	Time-Capacity Mapping Based Two Phase Algorithm for Two Machines	21
3.3.2	Interval Graph Theory Based Job Relay Selection Algorithm	22
3.3.3	Performance Analysis	23
3.4	Performance Evaluation	25
3.5	Summary	30
	References	30

4	Green Energy and Content Aware Scheduling in Maritime Wideband Communication Networks	33
4.1	System Model	33
4.2	Energy and Content Aware Time-step-based Formulation	35
4.3	Energy and Content Aware Video Transmission Scheduling Framework	36
4.3.1	Leaky Bucket Energy Buffer Based Decentralized Online Algorithm for Single Vessel	37
4.3.2	Energy Buffer Based Combinatorial Decentralized-Backward Centralized Algorithm for Two Vessels	42
4.3.3	Time Complexity Analysis	45
4.4	Performance Evaluation	46
4.5	Summary	49
	References	49
5	Conclusions and Future Directions	51
5.1	Conclusions	51
5.2	Future Research Directions	52
	References	52

Maritime Wideband Communication Networks

Video Transmission Scheduling

Yang, T.; Shen, X.S.

2014, IX, 52 p. 13 illus., 3 illus. in color., Softcover

ISBN: 978-3-319-07361-3
