

Contents

- 1 Introduction 1**
 - 1.1 Preamble 2
 - 1.2 Book Structure 3
 - 1.2.1 Scope and Outline 3
 - 1.2.2 Intended Audience 4
 - References 4
- 2 IPv6 Networks 5**
 - 2.1 Basics of IP Networks 6
 - 2.2 IPv6 Address 8
 - 2.2.1 Format 8
 - 2.2.2 Types of Addresses and IPv6 Messages 9
 - 2.2.3 Stateless Autoconfiguration 10
 - 2.2.4 DNS Configuration 11
 - 2.3 IPv6 Packet Headers 11
 - 2.3.1 Base IPv6 Header 12
 - 2.3.2 Extension Headers 14
 - 2.4 Migration to IPv6 16
 - 2.5 Summary 17
 - References 17
- 3 Software-Defined Networking 19**
 - 3.1 Introduction 19
 - 3.2 Conventional Routing Paradigm 20
 - 3.2.1 Computational Workload of Routers 21
 - 3.3 Decoupling Control and Data Planes 22
 - 3.3.1 Architectural Designs 23
 - 3.3.2 How Is SDN Useful in Research? 24
 - 3.4 Programmable Networks 25
 - 3.4.1 Global Environment for Networking Investigation 26
 - 3.4.2 How Many Controllers and Where? 27

3.5	OpenFlow Protocol	28
3.5.1	OpenFlow Network Architecture	28
3.5.2	OpenFlow Operation	30
3.6	Summary	31
	References	31
4	Opportunistic Networking	33
4.1	Defining “Opportunity”	33
4.2	Opportunistic Channel Access	34
4.2.1	Cognitive Radio Networks	34
4.2.2	Channel Sharing: D2D, M2M and IoT	36
4.3	Mobile Relay Networks	38
4.3.1	Vehicular Relays	39
4.4	Opportunistic Vehicular Communication	39
4.4.1	802.11-Based Vehicular Networks	40
4.4.2	Challenges in Opportunistic Vehicular Networks	41
4.5	Summary	42
	References	43
5	LTE Networks	45
5.1	Background	47
5.2	LTE Network	48
5.2.1	Network Architecture	48
5.2.2	Protocol Stack	49
5.3	Resource Grid	50
5.3.1	Frame Structure	51
5.3.2	LTE Configurations	52
5.4	LTE-Advanced Networks	53
5.4.1	Coordinated Multipoint (CoMP)	53
5.4.2	Carrier Aggregation	54
5.4.3	Relaying Provisions	56
5.5	Summary	58
	References	58
6	5G Communication Technology	59
6.1	5G Expectations and Limitations	60
6.2	UE Relaying	61
6.3	Device-to-Device Communication	62
6.3.1	Modes of Operation	64
6.3.2	Other D2D Technologies: Wi-Fi Direct	65

Contents	xi
6.4 D2D Communication Underlying LTE-A	66
6.4.1 Transmit Power Control.	66
6.4.2 Resource Allocation	67
6.5 Summary	68
References	69
7 Executive Summary	71
7.1 IP Networks	71
7.2 Cellular Networks	72
Appendix A: Exercise Questions	73
Index	75
