

Contents

Part I Rab Subfamily

1	Prenylation of RabGTPases, Their Delivery to Membranes, and Rab Recycling	3
	Roger S. Goody, Yaowen Wu, and Aymelt Itzen	
2	Rab Proteins and the Organization of Organelle Membrane Domains	17
	Marnix Wieffer, Marisa P. McShane, and Marino Zerial	
3	Effectors of Rab GTPases: Rab Binding Specificity and Their Role in Coordination of Rab Function and Localization	39
	Lena Katharina Oesterlin, Olena Pylypenko, and Bruno Goud	
4	A Rab Effector Called the Exocyst and Related Vesicle Tether Complexes	67
	Peter Jay Novick	
5	Rab GEFs and GAPs: The Enigma Variations	81
	Francis A. Barr	

Part II Ran

6	Ran in Nucleocytoplasmic Transport	109
	Murray Stewart	
7	Ran in Mitosis	125
	Oliver J. Gruss	

Part III Arf Subfamily

- 8 Arf Proteins and Their Regulators: At the Interface Between Membrane Lipids and the Protein Trafficking Machinery** 151
Catherine L. Jackson
- 9 Small G Proteins: Arf Family GTPases in Vesicular Transport . . .** 181
Frank Adolf and Felix T. Wieland
- 10 ARF-Like (ARL) Proteins** 215
Richard A. Kahn, Michael P. East, and Joshua W. Francis
- 11 ArfGAPs: Not Only for the Termination** 253
Shigeru Hashimoto, Ari Hashimoto, Hirokazu Sugino,
Ayumu Yoshikawa, Haruka Handa, Masanao Yoshino,
Yutaro Otsuka, and Hisataka Sabe

Part IV RAGs

- 12 Rag GTPases** 277
Jenna L. Jewell and Kun-Liang Guan
- Index** 293

Ras Superfamily Small G Proteins: Biology and
Mechanisms 2

Transport

Wittinghofer, A. (Ed.)

2014, VI, 298 p. 35 illus. in color., Hardcover

ISBN: 978-3-319-07760-4
