## Part I Description, Illustration and Comments of the Results

|          |   |           |
|----------|---|-----------|
| <b>1</b> | <b>The Viabilist Portfolio Performance and Insurance Approach . . . .</b> | <b>3</b>  |
| 1.1      | The VPPI Robot-Insurer. . . . .   | 3         |
| 1.1.1    | The Inputs of the Asset-Liabilities Insurance Problem. . .                | 4         |
| 1.1.2    | Outputs of Asset-Liability Insurance Problem. . . . .                     | 6         |
| 1.2      | The VPPI Risk Eradication Measure . . . . .                               | 7         |
| 1.2.1    | The Hedging Exit Time Function . . . . .                                  | 7         |
| 1.2.2    | The Mobile Horizon MGI . . . . .  | 8         |
| 1.3      | Running the VPPI Management Rule. . . . .                                 | 10        |
| 1.3.1    | Insured Shares of the Portfolio . . . . .                                 | 10        |
| 1.3.2    | Performance Measures. . . . .   | 12        |
| 1.3.3    | The VPPI Ratchet Mechanism . . . . .                                      | 14        |
| 1.3.4    | The Diversification Paradox . . . . .                                     | 18        |
| 1.3.5    | Mathematical Formulation of the VPPI Rule . . . . .                       | 19        |
| 1.4      | The VPPImpulse Management Robot-Forecaster . . . . .                      | 20        |
| 1.5      | The VPPI Management Software. . . . .                                     | 22        |
| 1.5.1    | The Flow Chart of the VPPI Algorithm. . . . .                             | 23        |
| 1.5.2    | The Flow Chart of the VPPImpulse Software. . . . .                        | 24        |
| <b>2</b> | <b>Technical and Quantitative Analysis of Tubes. . . . .</b>              | <b>27</b> |
| 2.1      | Tychastic Gauge and Derivatives of the Price Tubes . . . . .              | 28        |
| 2.2      | Forecasting the Price Tube . . . . .                                      | 30        |
| 2.3      | Sensitivity to the Tychastic Gauge. . . . .                               | 38        |
| 2.4      | Trend Reversal: From Bear to Bull and Back . . . . .                      | 40        |
| 2.4.1    | Trendometer. . . . .  | 40        |
| 2.4.2    | Trend Jerkiness and Eccentricities. . . . .                               | 41        |
| 2.4.3    | Detecting Extrema and Measuring Their Jerkiness . . . . .                 | 45        |
| 2.4.4    | Differential Connection Tensor of a Family of Series . . .                | 48        |
| 2.5      | Dimensional Rank Analysis . . . . .                                       | 57        |
| 2.6      | Detecting Patterns of Evolutions . . . . .                                | 59        |
| 2.7      | Classification of Indicators Used in Technical Analysis . . . . .         | 61        |

|  |  |     |
|--|--|-----|
| <b>3</b>                               | <b>Uncertainty on Uncertainties</b>                                  | 63  |
| 3.1                                    | Heterodox Approaches   | 64  |
| 3.1.1                                  | A priori Defined Management Rules                                    | 64  |
| 3.1.2                                  | The Uncertain Hand   | 66  |
| 3.1.3                                  | Quantitative and Qualitative Insurance Evaluations and Measures      | 67  |
| 3.2                                    | Forecasting Mechanism Factories                                      | 69  |
| 3.2.1                                  | Are Statistical Measures of Risk Solve Solvency II?                  | 69  |
| 3.2.2                                  | Fractals, Black Swans and Black Duals                                | 70  |
| 3.2.3                                  | Trends and Fluctuations in Nonstandard Analysis                      | 71  |
| 3.2.4                                  | Analytical Factories   | 72  |
| 3.3                                    | The Legacy of Ingenhousz   | 73  |
| 3.3.1                                  | Stochastic Uncertainty   | 74  |
| 3.3.2                                  | Tychastic Uncertainty  | 75  |
| 3.3.3                                  | Contingent Uncertainty and Its Redundancy                            | 77  |
| 3.3.4                                  | Impulse Contingent Uncertainty: Anticipation                         | 78  |
| 3.3.5                                  | Correcting Stochastic Systems by Tychastic Systems                   | 78  |
