

Contents

1	Introduction	1
2	Preliminaries	7
2.1	On Lie Groups and Their Representations	7
2.1.1	Classical Groups over the Classical Fields	8
2.1.2	Linear Representations of a Group	10
2.1.3	The Infinitesimal Version of Lie Groups and Their Representations	13
2.1.4	The Adjoint and the Coadjoint Representations	15
2.2	On the Lie Groups $SU(2)$ and $SO(3)$	16
2.2.1	Basic Definitions	16
2.2.2	Hopf Map and Stereographic Projection	18
2.2.3	Prelude to the Irreducible Unitary Representations of $SU(2)$	21
3	Quantum Spin Systems and Their Operator Algebras	25
3.1	Basic Definitions of Quantum Spin Systems	25
3.1.1	Standard Basis and Standard Matrix Representations	27
3.2	The Tensor Product and the Space of Operators	30
3.2.1	$SU(2)$ -Invariant Decomposition of the Tensor Product	31
3.3	$SO(3)$ -Invariant Decomposition of the Operator Algebra	36
3.3.1	The Irreducible Summands of the Operator Algebra	38
3.3.2	The Coupled Standard Basis of the Operator Algebra	40
3.3.3	Decomposition of the Operator Product	46

4	The Poisson Algebra of the Classical Spin System	55
4.1	Basic Definitions of the Classical Spin System	55
4.2	SO(3)-Invariant Decomposition of the Poisson Algebra	62
4.2.1	The Irreducible Summands of the Polynomial Algebra	62
4.2.2	The Standard Basis of Spherical Harmonics	63
4.2.3	Decompositions of the Classical Products	67
5	Intermission	71
6	Symbol Correspondences for a Spin-j System	77
6.1	General Symbol Correspondences for a Spin- j System	77
6.1.1	Definition of Spin- j Symbol Correspondences	77
6.1.2	The Moduli Space of Spin- j Symbol Correspondences	79
6.2	Explicit Constructions of Spin- j Symbol Correspondences	80
6.2.1	Symbol Correspondences via Standard Basis	81
6.2.2	Symbol Correspondences via Operator Kernel	82
6.2.3	Symbol Correspondences via Hermitian Metric	90
6.2.4	Symbol Correspondences via Coherent States	95
7	Multiplications of Symbols on the 2-Sphere	105
7.1	Twisted Products of Spherical Symbols	105
7.1.1	Standard Twisted Products of Cartesian Symbols on S^2	106
7.1.2	Twisted Products for General Symbol Correspondences	108
7.2	Integral Representations of Twisted Products	113
7.2.1	General Formulae and Properties of Integral Trikerels	114
7.2.2	Recursive Trikerels and Transition Kernels	121
7.2.3	Other Formulae Related to Integral Trikerels	127
8	Beginning Asymptotic Analysis of Twisted Products	135
8.1	Low- l High- j -Asymptotics of the Standard Twisted Product	136
8.2	Asymptotic Types of Symbol Correspondence Sequences	139
8.2.1	Symbol Correspondence Sequences of Poisson Type	139
8.2.2	Symbol Correspondence Sequences of Non-Poisson Type	141
8.2.3	Refined Types of Symbol Correspondence Sequences	147
8.3	Some Final Discussions and Considerations	151
8.3.1	Discussions on Our Approach	151
8.3.2	“Empirical” Considerations	153

9	Conclusion	159
10	Appendix: Further Proofs	163
10.1	A Proof of Proposition 3.2.6	163
10.2	A Proof of Proposition 3.3.12	164
10.3	A Proof of Proposition 3.3.24	167
10.4	A Proof of Proposition 4.2.8	168
10.5	A Proof of Proposition 6.2.34	173
10.6	A Proof of Proposition 6.2.54	174
10.7	A Proof of Proposition 7.1.6	176
10.8	A Proof of Proposition 7.2.28	178
10.9	A Proof of Proposition 7.2.30	183
10.10	A Proof of Theorem 8.1.1	184
	10.10.1 The 0th Order Term	188
	10.10.2 The 1st Order Term	189
	Bibliography	193
	Index	197

Symbol Correspondences for Spin Systems

de M. Rios, P.; Straume, E.

2014, IX, 200 p., Hardcover

ISBN: 978-3-319-08197-7

A product of Birkhäuser Basel
