

Contents

1	Introduction	1
1.1	Digital Communications Systems	2
1.1.1	Error Control Coding	3
1.1.2	Block and Convolutional Codes	4
1.2	Motivations	4
1.3	Aims and Objectives	5
1.4	Original Contributions	6
1.5	Book Layout	6
	References	7
2	Theoretical Background	9
2.1	Algebraic Geometric Codes	9
2.1.1	Construction of AG Code Parameters	10
2.1.2	Designing AG Encoder	12
2.1.3	Designing AG Decoder	13
2.1.4	Complete Hard-Decision Decoding Algorithm for AG Codes Constructed From Hermitian Curves	22
2.2	Turbo Codes	23
2.2.1	Turbo Encoder	24
2.2.2	Interleaver	25
2.2.3	Turbo Decoder	25
2.3	Block Turbo Codes	26
2.4	Summary	27
	References	27
3	Literature Review	31
3.1	Construction and Decoding of AG Codes	31
3.2	Iterative Decoding of Block Turbo Codes	34
3.3	Irregular Iterative Decoding of Block Turbo Codes	36
3.4	Summary	37
	References	37

4	Algebraic-Geometric Non-binary Block Turbo Codes	41
4.1	AG Non-binary Block Turbo Code Encoder	41
4.2	AG Non-binary Block Turbo Code Decoder	42
4.2.1	Extracting Soft Information From the Hard Output of AG Decoder Using Chase-Pyndiah Algorithm	45
4.3	BER Performance of AG Block Turbo Codes Versus RS Block Turbo Codes	46
4.4	Summary	54
	References	55
5	Irregular Decoding of Algebraic-Geometric Block Turbo Codes	57
5.1	Irregular AG Block Turbo Code Encoder	57
5.2	Irregular AG Non-binary Block Turbo Code Decoder	62
5.3	BER Performance of AG Irregular Block Turbo Codes Versus AG Block Turbo Codes	64
5.4	Summary	67
	References	68
6	Conclusions	69
6.1	Open Research Issues.	70

Forward Error Correction Based On Algebraic-Geometric
Theory

Alzubi, J.; Alzubi, O.; M. Chen, Th.

2014, XII, 70 p. 33 illus., 20 illus. in color., Softcover

ISBN: 978-3-319-08292-9
