

Contents

1	Introduction	1
1.1	The Need for Highly Nonlinear Optical Materials	1
1.2	Nonlinear Optical Phenomena in Terms of Response Functions	3
1.3	Brief Account of Nonlinear Optical Processes	5
1.3.1	Second Harmonic Generation	5
1.3.2	Optical Rectification	5
1.3.3	Electric Field Induced Second Harmonic	6
1.3.4	Self-focusing	6
1.3.5	Two Photon Absorption	6
1.3.6	Electro-Optic Kerr Effect	7
	References	7
2	Response Functions	9
2.1	Causal Response	9
2.2	Kramers-Kronig	10
2.3	Symmetry Relations	11
2.3.1	Permutation Symmetries	11
2.3.2	Structural Symmetries	12
2.4	Quantum Field Theory Response Formalism	13
2.5	Diagrammatic Technique for Susceptibilities	16
	References	19
3	Density Functional Perturbation Theory	21
3.1	The Original Sternheimer Method	21
3.2	Modified Sternheimer Method	22
3.3	Greens Function Approach to DFPT	23
3.4	Dyson Equation of DFPT	25
3.5	Dynamic Sternheimer Equation	26

3.6	Sternheimer Method for Nonlinear Response	27
3.7	Algorithm for Solving DFPT Equations	30
3.7.1	Sternheimer Equation Iteration	30
3.7.2	Self Consistent Iteration	31
3.7.3	Linear Polarizability	32
3.7.4	First Hyperpolarizability	32
3.8	Illustration of the Modified Sternheimer Method	34
	References	34
4	Real Time Method	35
4.1	Adiabatic Local Density Approximation	35
4.2	Real-Time Evolution	36
4.3	Real-Space Implementation	37
4.4	The Real Time Algorithm	38
	References	38
5	Response Functions from Real Time TDDFT	41
5.1	Method I: Reduction to a Linear System	41
5.1.1	Time Dependent Density	42
5.1.2	Extraction in Case of Isotropic Symmetry	44
5.1.3	Generalization	45
5.2	Locality of Nonlinear Response Under Monochromatic Excitation	47
5.3	Method II: Direct Evaluation	50
5.4	The Role of the Convolution Integral $\mathcal{G}(\omega)$ in Calculations of Response Functions	53
5.5	Method III: Differentiation in Frequency Domain	53
5.6	Conclusion	55
	References	55
6	Nonlinear Response in Atoms, Molecules and Clusters	57
6.1	Numerical Considerations	57
6.2	Comparison to Experiment and DFPT Calculations	60
6.3	Silver Dimer	61
6.4	Summary	63
	References	63
7	Extension to Condensed Matter and Outlook	65
7.1	Calculations in Dense Media	65
7.2	Calculations in Case of Periodic Solids	65
7.3	Future Directions	66
	References	67
	Index	69

Non-Linear Optical Response in Atoms, Molecules and
Clusters

An Explicit Time Dependent Density Functional
Approach

Goncharov, V.

2014, XI, 70 p. 11 illus., 8 illus. in color., Softcover

ISBN: 978-3-319-08319-3
