

Contents

1	Introduction	1
1.1	Appearance and Substance: Several Preliminary Observations on Packaging	2
	References	5
2	Packaging and Food: A Complex Combination	7
2.1	Packaging and Food: An Introduction	9
2.2	Functional Requirements	11
2.2.1	Preservation and Protection Requirements	13
2.2.2	Requirements for Transportation and Storage	15
2.2.3	Operational Requirements	16
2.2.4	Requirements for Packaging Disposal	17
2.2.5	Communication Requirements	18
2.2.6	Environmental Requirements	24
2.2.7	Regulatory Requirements	24
2.2.8	Food Packaging Materials: Composition, Production, Chemical Features and Correlations with Packaging Design	27
	References	53
3	The Instrumental Role of Food Packaging	57
3.1	Introduction	58
3.2	Foods and Functions	60
3.3	Protection and Preservation Requirements	61
3.4	Transport and Storage Requirements	65
3.4.1	Food Product: Fried Potato Chips in Thermosealed Pouches	66
3.4.2	Fried Potato Chips in Thermosealed Pouches: Possible Packaging Solutions	67
3.4.3	Fried Potato Chips in Thermosealed Pouches: Comparison Between Two Similar Bags	69

3.4.4	Fried Potato Chips in Different Thermosealed Pouches: Risks and Advantages	71
3.4.5	Possible Differences with Relation to Mechanical Resistances and Safety Risks	73
3.5	Usage Requirements	75
3.5.1	Food Product: Bottled Red Wine in Asymmetrical-Shaped Bottles	77
3.5.2	Bottled Red Wines: The Horizontal Storage and Dedicated Bottles	79
3.6	Disposal Requirements	83
	References	83
4	Packaging, A Communicative Medium	87
4.1	Packaging and Communication: An Introduction	88
4.2	Food and Communication	89
4.3	Appellative Function	92
4.3.1	Case Study. Coloured Beers in Transparent Glass Bottles	95
4.4	Identification	100
4.5	Persuasive Function	100
4.6	Informative Function	101
4.6.1	Food Product: Bottled Red Wine in Asymmetrical-Shaped Bottles with Photosensible Labels and Evaluation of UV Light	103
4.6.2	Bottled Red Wines: Photosensible Labels	104
	References	105
5	Packaging and Quality	109
5.1	Food Packaging and Environmental Ethics	110
5.1.1	Numerical Reduction of Packaging Units	111
5.1.2	Mono-material Packaging and Possible Separation into Basic Components	113
5.1.3	Packaging Life Cycle Extension	114
5.1.4	Reduction of Weights and Sizes	115
5.1.5	Environmentally Sustainable Labelling	116
5.2	Packaging, Quality and Total Sustainability	117
	References	118

The Importance of Packaging Design for the Chemistry
of Food Products

Brunazzi, G.; Parisi, S.; Pereno, A.

2014, VI, 119 p. 14 illus., 6 illus. in color., Softcover

ISBN: 978-3-319-08451-0
