1	Introduction and Summary	1
	References	7
2	What Is a Disaster? An Economic Point of View	9
2.1	Defining the Economic Cost of Extreme Events	10
2.1.1	Direct and Indirect Costs	10
2.1.2	Defining a Baseline	17
2.1.3	Assessment Purpose and Scope	18
2.2	Output Losses and Their Drivers	19
2.2.1	From Asset Losses to Output Losses	20
2.2.2	“Ripple Effects”	27
2.2.3	Non-linearity in Output Losses and Poverty Traps.....	33
2.2.4	Building Back Better? The Productivity Effect	36
2.2.5	The Stimulus Effect of Disasters.....	39
2.3	From Output Losses to Welfare Losses	41
2.4	Assessing Disaster Losses	43
2.4.1	Measuring Indirect Losses Using Econometric Analyses	43
2.4.2	Modeling Indirect Losses.....	43
2.5	Conclusion and the Definition of <i>Resilience</i>	46
	References	47
3	Disaster Risks: Evidence and Theory	51
3.1	Defining Risk	51
3.2	The Current Patterns of Risk	55
3.3	Current Trends	59
3.4	“Good” and “Bad” Risk-Taking	63
3.4.1	Good Risk-Taking	63
3.4.2	Bad Risk-Taking	64
3.4.3	Consequences of Risk Management Policies.....	65

3.5	Technical Insight: Economic Growth and Disaster Losses.....	67
3.5.1	Risk and Development.....	67
3.5.2	A Balanced Growth Pathway.....	68
3.5.3	The Safety vs. Productivity Trade-Off.....	69
3.5.4	Optimal Protection and Risk-Taking.....	71
3.6	Conclusion	73
	References	75
4	Trends in Hazards and the Role of Climate Change	77
4.1	Scenarios for Climate Change Analysis	77
4.2	Climate Change Scenarios.....	79
4.2.1	Changes in Average Climate Conditions	79
4.2.2	Forecasting Natural Variability.....	81
4.3	“Downscaling” Global Climate Scenarios to Extreme Event Scenarios	83
4.3.1	Statistical Methods	83
4.3.2	Physical Models	85
4.4	Consequences in Terms of Extremes.....	86
4.4.1	Heat Waves and Cold Spells	86
4.4.2	Droughts.....	87
4.4.3	Storms and High Winds	87
4.4.4	River Floods.....	89
4.4.5	Coastal Floods	90
4.4.6	Can We Attribute Extreme Events to Climate Change?	90
4.5	How Would These Changes in Hazard Translate into Changes in Losses?	91
4.6	Conclusion	94
	References	95
5	Climate Change Impact on Natural Disaster Losses	99
5.1	Methodology for Local Assessment of Climate Change Impacts on Disaster Risks	100
5.2	Case Study: Hurricanes and the U.S. Coastline	107
5.2.1	The Hazard: Climate Change and Hurricanes	108
5.2.2	Exposure, Vulnerability and Resilience: Climate Change and Hurricane Losses.....	111
5.2.3	Adaptation Options	112
5.3	Case Study: Sea Level Rise and Storm Surges in Copenhagen	113
5.3.1	The Hazard: Extreme Sea Levels in Copenhagen	114
5.3.2	The Exposure: Population and Assets at Risk	115
5.3.3	The Vulnerability: Flood Direct Losses	115
5.3.4	The Resilience: Direct and Indirect Losses.....	115
5.3.5	Adaptation Options	117
5.4	Case Study: Heavy Precipitations in Mumbai	120
5.4.1	The Hazard: Heavy Precipitations and Extreme Run-offs in Mumbai	121

5.4.2	The Exposure: Population and Assets in Mumbai	122
5.4.3	The Vulnerability: Direct Losses.....	122
5.4.4	The Resilience: Indirect and Total Losses	122
5.4.5	Adaptation Options	123
5.4.6	Impact on Marginalized Populations	124
5.5	Lessons from the Case Studies	126
5.6	Conclusion on the Future of Natural Disasters and the Role of Climate Change.....	127
	References	128
6	Methodologies for Disaster Risk Management in a Changing Environment.....	131
6.1	The Disaster Risk Management “Policy Mix”.....	131
6.2	Disaster Risk Management for Climate Change Adaptation.....	134
6.2.1	Reactive vs Proactive Risk Management	134
6.2.2	The Adaptation Gap	137
6.3	Case Study: A Cost-Benefit Analysis of New Orleans Coastal Protections.....	139
6.3.1	A First Cost-Benefit Assessment.....	139
6.3.2	Sensitivity Analysis.....	147
6.3.3	Cost-Benefit Analysis Under Uncertainty	155
6.4	Case Study: Early Warning Systems in Developing Countries	156
6.4.1	Benefits from Early Warning and Preparation Measures	157
6.4.2	Economic Benefits from Hydromet Information	165
6.4.3	How to Improve Early Warning, and at What Cost?	167
6.4.4	Conclusions on Investments in Hydrometeorological Information and Early Warning	171
6.5	Conclusion	172
	References	173
7	Decision Making for Disaster Risk Management in a Changing Climate.....	177
7.1	Methodologies for Robust Decision-Making	180
7.1.1	Robust Decision-Making	180
7.1.2	Advantages over Other Approaches	184
7.2	Robust Strategies for Disaster Risk Management	186
7.2.1	No-Regret Strategies.....	186
7.2.2	Reversible Strategies.....	189
7.2.3	Safety-Margin Strategies	190
7.2.4	Soft Strategies.....	191
7.2.5	Strategies That Reduce Decision-Making Time Horizons	192
7.2.6	Taking into Account Conflicts and Synergies	192

Natural Disasters and Climate Change

An Economic Perspective

Hallegatte, S.

2014, XXII, 194 p. 43 illus., 32 illus. in color., Hardcover

ISBN: 978-3-319-08932-4
