Part I Biographical Studies

Leon Henkin	3
María Manzano and Enrique Alonso	
1 Life	3
2 Graduate Studies at Columbia University	7
3 Doctorate Studies with Alonzo Church	8
3.1 The Princeton Mathematics Community in the 1930s	9
3.2 The Second World War	10
4 Service to the Department and to the University	11
5 His Research	12
5.1 Completeness	12
5.2 Algebraic Logic	13
5.3 Identity	14
5.4 Nominalism	14
5.5 Mathematical Induction	14
5.6 Mathematical Education	15
5.7 A Problem Concerning Provability	15
5.8 Language with Only a Finite Number of Variables	15
6 Henkin the Teacher	15
7 The Roles of Action and Thought in Mathematics Education	17
8 The Never Ending Story	19
8.1 Bertrand Russell’s Request	19
8.2 Henkin’s Boolean Models: Peter Andrews’ Proposed Homework	20
References	21

Pairing Logical and Pedagogical Foundations for the Theory of Positive Rational Numbers—Henkin’s Unfinished Work	73
Nitsa Movshovitz-Hadar	
1 Introduction	73
2 Five Pairs of Deductive-Didactical Presentations	76
2.1 Pair I: Axiomatic Method 1 and Pedagogical Comments	76
2.2 Pair II: Axiomatic Method 2 and Pedagogical Comments . . .	80
2.3 Pair III: Axiomatic Method 3 and Pedagogical Comments . . .	81
2.4 Pair IV: Definitional Method 1 (Classical) and Pedagogical Comments	85
2.5 Pair V: Definitional Method 2 (Nonclassical) and Pedagogical Comments	88
3 Closing Remarks	91
Leon Henkin the Reviewer	93
Concha Martínez Vidal and José Pedro Úbeda Rives	
1 Introduction	93
2 Logic Systems	94
2.1 Type Theory	95
2.2 Metalogic	96
3 Algebraic Logic	101
3.1 Algebraic Treatment of Logic Systems	102
3.2 Applications of Logic to Algebra	107
4 Philosophy of Logic and Mathematics	109
4.1 Basic Logical Notions	111
4.2 Semantic Notions and Semantic Issues in Logic	111
4.3 Alternative Logics	112
4.4 The Foundations of Mathematics	114
4.5 Mathematical Education and the Foundations of Mathematics .	116
5 Manuals	117
6 Conclusion	118
7 Reviews by Leon Henkin	121
References	124

8 Appendix: References by Period of Time	146
8.1 1950–1960	146
8.2 1960–1970	147
8.3 1970–1980	147
References	148

Henkin on Completeness	149
María Manzano	
1 Introduction	149
2 Henkin's Declared Influences	150
3 Henkin's Completeness Papers	153
3.1 Completeness in the Theory of Types	154
3.2 The Completeness of the First-Order Functional Calculus	160
3.3 A Theory of Propositional Types	162
4 Completeness Proofs in Henkin's Course	166
4.1 Herbrand's Theorem Yields Completeness	166
4.2 An Extension of the Craig–Lyndon Interpolation Theorem	168
5 Henkin's Expository Papers on Completeness	168
5.1 Truth and Provability	169
5.2 Completeness	171
References	174
 Part III Extensions and Perspectives in Henkin's Work	
The Countable Henkin Principle	179
Robert Goldblatt	
1 The Abstract Henkin Principle	180
2 The Countable Case	183
3 Classical Applications	184
3.1 Completeness for First-Order Logic	184
3.2 Omitting Types	185
3.3 C-Completeness and C-Consistency	186
3.4 Completeness for Infinitary Conjunction	187
4 Richer Extension Theorems	189
5 Classical Deducibility	190
6 Probabilistic Modal Logic	191
7 The Baire Category Connection	199
References	200
