1 Introduction 1
References. 6

2 Assessment of Water Availability Under Climate Change Scenarios in Thailand 9
2.1 Introduction 9
2.2 Study Area 11
2.3 Methodology 11
2.3.1 Data Collection. 11
2.3.2 Methodological Framework 13
2.3.3 Ratio Method of Bias Correction 14
2.3.4 Hydrological Model 15
2.4 Results and Discussion 15
2.4.1 Comparison of RCM and Bias Corrected Values 15
2.4.2 Projected Rainfall Anomalies 16
2.4.3 Calibration and Validation of HEC-HMS 17
2.4.4 Projection of Decadal Water Availability at HRU Scale 17
2.4.5 Projection of Decadal Water Availability at National Scale 20
2.5 Conclusions 21
References. 22

3 Climate Change Impact on Reservoir Inflows of Ubolratana Dam in Thailand. 25
3.1 Introduction 25
3.2 Study Area 26
3.2.1 Characteristics of Ubolratana Dam 27
3.2.2 Flood Problems in Ubolratana Reservoir 27
3.2.3 Data Collection. 28

3.3 Methodology 28
3.3.1 Extraction of Climate Projection Data 29
3.3.2 Bias Correction. 30
3.3.3 Hydrological Model 30
3.4 Results and Discussion 32
3.4.1 Performance of Bias Correction for RCM Data. 32
3.4.2 Projection of Rainfall 34
3.4.3 Projection of Temperature 35
3.4.4 Runoff Modelling 36
3.5 Conclusions 39
References. 40

4 Assessment of Climate Change Impacts on Flood Hazard Potential in the Yang River Basin, Thailand 43
4.1 Introduction 43
4.2 Materials and Methods 45
4.2.1 Study Area and Data Description 45
4.2.2 SRES Scenarios and GCMs 47
4.2.3 Bias Correction of RCM Data 48
4.2.4 Goodness-of-Fit Indicators of RCM Outputs. 48
4.2.5 Hydrological Modelling. 49
4.2.6 Frequency Analysis and Designed Hydrographs 50
4.2.7 Hydraulic Modelling 51
4.2.8 Flood Frequency Analysis 52
4.2.9 Flood Hazard Mapping 52
4.2.10 Change Analysis. 52
4.3 Results and Discussion 53
4.3.1 Model Performance Evaluation. 53
4.3.2 Projected Changes in Floods 59
4.4 Conclusions 63
References. 63

5 Assessment of Climate Change Impacts on Irrigation Water Requirement and Rice Yield for Ngamoeyeik Irrigation Project in Myanmar 67
5.1 Introduction 67
5.2 Study Area 69
5.3 Materials and Methods 70
5.3.1 Field Layout and Measurements 71
5.3.2 Climate Change Scenario Generation. 73
5.3.3 Transferring Coarse Resolution Climate Data to Basin Level 74
5.3.4 AquaCrop 4.0. 74

5.4 Results and Discussion 76
5.4.1 Simulated and Observed Climate Data 76
5.4.2 Projection of Future Climate Variables 78
5.4.3 Crop Model Set up 81
5.4.4 Projection of Future Irrigation Water Requirement (IWR) 86
5.4.5 Projection of Future Rainfed Paddy Yield 87
5.5 Conclusions 88
References 89

6 Adaptation Strategies for Rice Cultivation Under Climate Change in Central Vietnam 93
6.1 Introduction 94
6.2 Material and Methods 95
6.2.1 Study Area Description 95
6.2.2 Data Collection 96
6.2.3 Generation of Climate Change Scenarios 99
6.2.4 Crop Modeling 101
6.2.5 Agro-adaptation Measures 101
6.2.6 Methodological Limitations 102
6.3 Results and Discussion 102
6.3.1 SDSM Calibration and Validation 102
6.3.2 Projection of Future Climate 103
6.3.3 Projection of Climate Change Impact on Rice Yield 106
6.3.4 Evaluation of Agro-adaptation Measures 109
6.4 Conclusions 116
