

Contents

1	A Historical Account	1
1.1	Catalan's <i>Note Extraite</i>	1
1.2	Particular Cases	3
1.3	Cassels' Relations	5
1.4	Analysis: Logarithmic Forms	5
1.5	Algebra: Cyclotomic Fields	7
1.6	Numerical Results	7
1.7	The Final Attack	8
2	Even Exponents	11
2.1	The Equation $x^p = y^2 + 1$	11
2.2	Units of Real Quadratic Rings	13
2.3	The Equation $x^2 - y^q = 1$ with $q \geq 5$	15
2.4	The Cubic Field $\mathbb{Q}(\sqrt[3]{2})$	19
2.5	The Equation $x^2 - y^3 = 1$	21
3	Cassels' Relations	27
3.1	Cassels' Divisibility Theorem and Cassels' Relations	27
3.2	Binomial Power Series	29
3.3	Proof of the Divisibility Theorem	31
3.4	Hyrö's Lower Bounds	34
4	Cyclotomic Fields	37
4.1	Degree and Galois Group	37
4.2	Integral Basis and Discriminant	39
4.3	Decomposition of Primes	41
4.4	Units	41
4.5	The Real Cyclotomic Field and the Class Group	42
4.6	Cyclotomic Extensions of Number Fields	44
4.7	General Cyclotomic Fields	45

5	Dirichlet L-Series and Class Number Formulas	49
5.1	Dirichlet Characters and L -Series	49
5.2	Dedekind ζ -Function of the Cyclotomic Field	52
5.3	Calculating $L(1, \chi)$ for $\chi \neq 1$	56
5.4	Class Number Formulas	61
5.5	Composite Moduli	62
6	Higher Divisibility Theorems	65
6.1	The Most Important Lemma	65
6.2	Inkeri's Divisibility Theorem	66
6.3	A Deviation: Catalan's Problem with Exponent 3	69
6.4	The Group Ring	70
6.5	Stickelberger, Mihăilescu, and Wieferich	72
7	Gauss Sums and Stickelberger's Theorem	75
7.1	Stickelberger's Ideal and Stickelberger's Theorem	75
7.2	Gauss Sums	78
7.3	Multiplicative Combinations of Gauss Sums	81
7.4	Prime Decomposition of a Gauss Sum	83
7.5	Proof of Stickelberger's Theorem	86
7.6	Kummer's Basis	87
7.7	The Real and the Relative Part of Stickelberger's Ideal	90
7.8	Proof of Iwasawa's Class Number Formula	93
8	Mihăilescu's Ideal	97
8.1	Definitions and Main Theorems	97
8.2	The Algebraic Number $(x - \zeta)^\Theta$	100
8.3	The q th Root of $(x - \zeta)^\Theta$	102
8.4	Proof of Theorem 8.2	104
8.5	Proof of Theorem 8.4	106
8.6	Application to Catalan's Problem I: Divisibility of the Class Number	109
8.7	Application to Catalan's Problem II: Mihăilescu's Ideal vs Stickelberger's Ideal	110
8.8	On the Real Part of Mihăilescu's Ideal	113
9	The Real Part of Mihăilescu's Ideal	117
9.1	The Main Theorem	117
9.2	Products of Binomial Power Series	119
9.3	Mihăilescu's Series $(1 + \zeta T)^{\Theta/q}$	121
9.4	Proof of Theorem 9.2	125
10	Cyclotomic Units	129
10.1	The Circulant Determinant	129
10.2	Cyclotomic Units	132

11 Selmer Group and Proof of Catalan's Conjecture	135
11.1 Selmer Group	135
11.2 Selmer Group as Galois Module	138
11.3 Units as Galois Module	139
11.4 q -Primary Cyclotomic Units	142
11.5 Proof of Theorem 11.5	143
12 The Theorem of Thaine	145
12.1 Introduction	145
12.2 Preparations	146
12.3 Proof of Theorem 12.2	150
12.4 Reduction of a Multiplicative Group Modulo a Prime Ideal	154
12.5 Reduction of a Multiplicative Group Modulo a Prime Number and Proof of Theorem 12.3	156
13 Baker's Method and Tijdeman's Argument	159
13.1 Introduction: Thue, Gelfond, and Baker	159
13.2 Heights in Finitely Generated Groups	163
13.3 Almost n th Powers	165
13.4 Effective Analysis of Classical Diophantine Equations	167
13.5 The Theorem of Schinzel and Tijdeman and the Equation of Pillai	173
13.6 Tijdeman's Argument	176
Appendix A: Number Fields	183
A.1 Embeddings, Integral Bases, and Discriminant	183
A.2 Units, Regulator	184
A.3 Ideals, Factorization	184
A.4 Norm of an Ideal	185
A.5 Ideal Classes, the Class Group	185
A.6 Prime Ideals, Ramification	186
A.7 Galois Extensions	187
A.8 Valuations	188
A.9 Dedekind ζ -Function	190
A.10 Chebotarev Density Theorem	191
A.11 Hilbert Class Field	193
Appendix B: Heights	197
Appendix C: Commutative Rings, Modules, and Semi-simplicity	203
C.1 Cyclic Modules	203
C.2 Finitely Generated Modules	204
C.3 Semi-simple Modules	206
C.4 Semi-simple Rings	207
C.5 The "Dual" Module	210

Appendix D: Group Rings and Characters	213
D.1 The Weight Function and the Norm Element	213
D.2 Characters of a Finite Abelian Group.....	214
D.3 Conjugate Characters	216
D.4 Semi-simplicity of the Group Ring	217
D.5 Idempotents	219
Appendix E: Reduction and Torsion of Finite G-Modules	221
E.1 Telescopic Rings	221
E.2 Products of Telescopic Rings	222
E.3 Elementary Divisors and Finitely Generated Modules	224
E.4 Reduction and Torsion.....	225
Appendix F: Radical Extensions	227
F.1 Field Generated by a Single Root	227
F.2 Kummer's Theory	228
F.3 General Radical Extensions	230
F.4 Equivariant Kummer's Theory	231
References	235
Author Index	241
Subject Index	243

The Problem of Catalan

Bilu, Y.; Bugeaud, Y.; Mignotte, M.

2014, XIV, 245 p. 3 illus., Hardcover

ISBN: 978-3-319-10093-7
