

Contents

1	Situational Awareness, Sensemaking, and Situation Understanding in Cyber Warfare.....	1
	Yan Yufik	
2	Neuromorphic Computing for Cognitive Augmentation in Cyber Defense.....	19
	Robinson E. Pino and Alexander Kott	
3	Automated Cyber Situation Awareness Tools and Models for Improving Analyst Performance	47
	Massimiliano Albanese, Hasan Cam, and Sushil Jajodia	
4	Data Mining in Cyber Operations.....	61
	Misty Blowers, Stefan Fernandez, Brandon Froberg, Jonathan Williams, George Corbin, and Kevin Nelson	
5	Trusted Computation Through Biologically Inspired Processes	75
	Gustave W. Anderson	
6	Dynamic Logic Machine Learning for Cybersecurity	85
	Leonid Perlovsky and Olexander Shevchenko	
7	Towards Neural Network Based Malware Detection on Android Mobile Devices	99
	Wei Yu, Linqiang Ge, Guobin Xu, and Xinwen Fu	
8	Sustainability Problems and a Novelty in the Concept of Energy	119
	Simon Berkovich	

**9 Memristors as Synapses in Artificial Neural Networks:
Biomimicry Beyond Weight Change 135**
Andrew J. Lohn, Patrick R. Mickel, James B. Aimone,
Erik P. Debenedictis, and Matthew J. Marinella

**10 Low Power Neuromorphic Architectures to Enable
Pervasive Deployment of Intrusion Detection Systems 151**
Tarek M. Taha, Raqibul Hasan, Chris Yakopcic,
and Mark R. McLean

**11 Memristor SPICE Model Simulation and Device
Hardware Correlation 169**
Robinson E. Pino, Antonio S. Oblea, and Kristy A. Campbell

12 Reconfigurable Memristor Based Computing Logic 175
Robinson E. Pino and Youngok K. Pino

13 Cyber Security Considerations for Reconfigurable Systems 183
James Lyke and Arthur Edwards

Cybersecurity Systems for Human Cognition
Augmentation

Pino, R.E.; Kott, A.; Shevenell, M. (Eds.)

2014, XVI, 209 p. 113 illus., Hardcover

ISBN: 978-3-319-10373-0
