

# Contents

<b>1</b>	<b>Insight and Reason</b>	1
1.1	Introduction	1
1.2	Testing for Intelligence	3
1.2.1	The Imitation Game	3
1.3	Intelligence Tests	5
1.4	Discontinuity Theory	7
	References	10
<b>2</b>	<b>Information and Intelligence</b>	13
2.1	Introduction	13
2.2	Information	13
2.3	Insight	17
2.3.1	The Distinction Between Information and Knowledge	18
2.4	Induction	19
2.5	Deduction	21
2.6	Lookup or Generate?	23
	References	25
<b>3</b>	<b>Identifying Intelligence</b>	27
3.1	Introduction	27
3.1.1	Stone Soup: A Folk Story	27
3.2	Uncertainty	28
3.3	Selecting an Action	28
3.4	Nature's Intelligence	38
	References	41
<b>4</b>	<b>Knowledge Science</b>	43
4.1	Introduction	43
4.2	A Taxonomic Approach	44
4.2.1	Tacit Knowledge	47
4.2.2	Declarative Knowledge	47

4.2.3	Heuristic Knowledge .....	49
4.2.4	Inferential Knowledge .....	49
4.3	Intelligent Inference .....	51
4.4	Knowledge Acquisition .....	53
4.4.1	Abstracting to a Representation .....	53
4.5	Knowledge as Data and Processing .....	55
4.6	The Boundaries of Knowledge Representation .....	57
	References .....	58
<b>5</b>	<b>Modelling Experiments .....</b>	<b>61</b>
5.1	Introduction .....	61
5.2	Experiment, Inference and Theory Change .....	62
5.2.1	Experiments and Experimenters .....	62
5.3	Rationality, Inference Rules and Epistemic Practices .....	63
5.4	Dynamic, Socially Mediated Inference .....	64
5.5	Experiments as Mediating Models .....	66
5.6	Static and Iterative Models .....	67
5.7	Abductive Systems in Science .....	68
	References .....	70
<b>6</b>	<b>Modelling Inference .....</b>	<b>73</b>
6.1	Simulation Methods .....	73
6.2	Confidence Adjustment .....	74
6.3	The Impact of Evidence: Hypotheses .....	75
6.4	The Impact of Opinion: Consultation .....	76
6.5	A Simple Example of Confidence Adjustment .....	76
6.6	Confidence, Indifference and Change .....	78
6.7	Agents and Groups .....	81
6.8	The Choice of an Action .....	81
6.8.1	Evaluating Actions .....	81
6.9	Choosing Actions .....	84
6.10	Running the Program .....	86
6.11	Other Examples .....	87
6.12	Belief and Truth .....	88
	References .....	89
<b>7</b>	<b>Simulating Belief and Action .....</b>	<b>91</b>
7.1	Modelling Inferences About Observations .....	91
7.2	Why Inference Can't be Modelled .....	93
7.3	A Historical Example .....	95
7.4	Simulating Experimental Science .....	98
7.5	How Experiments Mediate Between Hypotheses and Phenomenology .....	98

7.6	Evidence-Driven Belief-Revision .....	100
7.6.1	Non-consultation Run (Solo) .....	101
7.6.2	Consultation Run for Two Agents (Actor1 & 2) .....	101
7.7	Conclusions .....	103
	References .....	106
<b>8</b>	<b>Programming and Meaning .....</b>	<b>107</b>
8.1	A Grand Challenge .....	107
8.1.1	Meeting the Criteria .....	108
8.1.2	Problems with Referential Semantics .....	110
8.2	Inferring Internal Experience .....	111
8.3	A Philosophical Paradigm of Meaning for Computing .....	112
8.3.1	Objects .....	113
8.3.2	A Rational Set .....	115
8.3.3	Social Consequences .....	117
	References .....	117
<b>9</b>	<b>Irrational Reasoning .....</b>	<b>119</b>
9.1	Dual Semantics .....	119
9.2	The Paradigm Leap .....	121
9.3	Examples of Irrational Sets .....	122
9.3.1	The Problem of Rules .....	122
9.3.2	The Problem of Irrational Sets .....	123
9.3.3	Some Predictions from this Thesis .....	124
9.4	Inferential Semantics .....	125
9.5	The Real Challenge .....	126
9.6	A Science of Mechanisms .....	127
	References .....	128
<b>10</b>	<b>Knowledge for Design .....</b>	<b>129</b>
10.1	Knowledge-Based Systems .....	129
10.2	The Role of a Model .....	133
10.3	The Limits of Logic .....	137
	References .....	140
<b>11</b>	<b>Measures of Intelligence .....</b>	<b>141</b>
11.1	IQ as a Measure of Intelligence .....	141
11.2	Sequence Extrapolation as a Model .....	143
11.3	Learning in Retroduction and Induction .....	144
11.4	The Basic Concepts .....	145
11.4.1	INTER .....	145
11.4.2	PERIODIC .....	147
11.4.3	POLY .....	148
11.4.4	PRIME .....	150
11.4.5	FACTORIAL .....	151
	References .....	151

<b>12</b>	<b>Implementing Intelligence</b> .....	153
12.1	Features of Intelligence .....	153
12.2	Implementation of Intelligence .....	154
12.2.1	The Deductive Process .....	158
12.2.2	The Inductive Process .....	159
12.3	Feedback Assessment .....	159
12.4	Experiments and Discussion .....	160
12.5	Conclusion .....	163
12.5.1	Intelligence Quality Specification .....	163
	References .....	164
<b>13</b>	<b>Figuratively Speaking</b> .....	165
13.1	The Problem with Reference .....	165
13.2	Tropic Communication .....	166
13.3	The Conceptual Model .....	167
13.4	The Functional Model .....	168
13.4.1	Background .....	168
13.5	The Initial Model .....	169
13.6	The Abstracted Initial Model .....	171
13.7	The Basic Functional Model .....	173
13.8	A Commented Run of the Model .....	178
13.9	The Single Experience .....	179
13.10	Consult .....	179
13.11	Future Development .....	180
13.12	Conclusions .....	181
	References .....	181
<b>14</b>	<b>Seeking Allies</b> .....	183
14.1	Exchanging Information .....	183
14.2	The Experiment .....	184
14.3	The Computer Model .....	185
14.4	Analysis of the Experimental Results .....	186
14.5	Model Running Results Analysis .....	189
14.6	Model Data Input and Results Analysis .....	190
14.7	Assessing the Results .....	193
14.8	Ally Choice .....	195
14.9	Last Words .....	196
	References .....	198

Natural and Artificial Reasoning  
An Exploration of Modelling Human Thinking  
Addis, T.  
2014, XII, 199 p. 59 illus., Hardcover  
ISBN: 978-3-319-11285-5
