1	Introduction to Rational Decision Making	1
1.1	Introduction	1
1.2	What is Rational Decision Making?	2
1.3	Flexibly-Bounded Rational Decision Making	3
1.4	Correlation Machine	4
1.5	Causal Machine	5
1.6	Introduction to Artificial Intelligence	8
1.6.1	Neural Networks	8
1.6.2	Fuzzy Sets	9
1.6.3	Rough Sets	10
1.6.4	Hopfield Networks	10
1.6.5	Support Vector Machines	11
1.6.6	Genetic Algorithm	11
1.6.7	Particle Swarm Optimization	11
1.6.8	Simulated Annealing	12
1.7	Summary and Outline of the Book	12
	Conclusions	12
	References	13
2	Causal Function for Rational Decision Making: Application to Militarized Interstate Dispute	19
2.1	Introduction	19
2.2	Defining Causality	21
2.3	Models of Causality	22
2.3.1	Transmission Theory of Causality	22
2.3.2	Probability Theory of Causality	22
2.3.3	Projectile Theory of Causality	23
2.3.4	Causal Calculus	23
2.3.5	Manipulation Theory of Causality	23
2.3.6	Process Theory of Causality	23
2.3.7	Counterfactual Theory	24
2.3.8	Structural Learning	24

2.4	Causal Function	24
2.5	Causal Machine for Rational Decision Making	25
2.6	Interstate Conflict	26
2.7	Rough Sets Causal Function	27
2.7.1	Information System	28
2.7.2	The Indiscernibility Relation	28
2.7.3	Information Tables and Data Representation	29
2.7.4	Decision Rules Induction	29
2.7.5	The Lower and Upper Approximation of Sets	29
2.7.6	Set Approximation	31
2.7.7	The Reduct	31
2.7.8	Boundary Region	32
2.7.9	Rough Membership Functions	32
2.7.10	Discretization Using Equal-Width-Bin (EWB) Partitioning	32
2.7.11	Rough Set Formulation	33
2.7.12	Interstate Conflict	34
2.8	Rough Set Causal Machine	34
	Conclusions	34
	References	35
3	Correlation Function for Rational Decision Making:	
	Application to Epileptic Activity	39
3.1	Introduction	39
3.2	Defining Correlation	40
3.3	Correlation Function	40
3.4	Correlation Function for Rational Decision Making	41
3.5	Modelling Epileptic Activity	41
3.6	Support Vector Machine (SVM) Correlation Function	45
3.7	Application to Epileptic Activity	50
	Conclusions	51
	References	52
4	Missing Data Approaches for Rational Decision Making:	
	Application to Antenatal Data	55
4.1	Introduction	55
4.2	Missing Data Approach	56
4.3	Multi-layer Perceptron Neural Network	58
4.3.1	Training the Multi-Layered Perceptron	60
4.3.2	Back-Propagation Method	60
4.3.3	Scaled Conjugate Method	62
4.4	Genetic Algorithm	63
4.4.1	Initialization	64
4.4.2	Selection	64

4.4.3	Reproduction, Crossover and Mutation	65
4.4.4	Termination	66
4.5	Application to Antenatal Data	66
	Conclusions	68
	References	68
5	Rational Counterfactuals and Decision Making: Application to Interstate Conflict	73
5.1	Introduction	73
5.2	Counterfactuals	74
5.3	Rational Counterfactual Machine	76
5.4	Neuro-Fuzzy Model	77
5.4.1	Basic Fuzzy Logic Theory	77
5.4.2	Neuro-fuzzy Models	80
5.5	Simulated Annealing (SA)	82
5.6	Investigation and Results	85
	Conclusions	86
	References	87
6	Flexibly-Bounded Rationality in Interstate Conflict	91
6.1	Introduction	91
6.2	Rational Decision Making	92
6.2.1	Inference and Rational Decision Making	92
6.2.2	Theory of Rational Choice	94
6.2.3	Theory of Rational Counterfactuals	94
6.2.4	Bounded-Rational Decision Making	94
6.3	Flexibly-Bounded Rational Decision Making	95
6.4	Missing Data Estimation	96
6.5	Intelligent Machines: Bayesian Multi-Layer Perceptron Network	97
6.6	Particle Swarm Optimization	102
6.7	Experimental Investigations: Interstate Conflict	105
	Conclusions	106
	References	106
7	Filtering Irrelevant Information for Rational Decision Making	111
7.1	Introduction	111
7.2	Cocktail Party Problem: How People Deal With Irrelevant Information?	113
7.3	Marginalization of Irrationality Theory	114
7.4	Automatic Relevance Determination Theory	117
7.5	Principal Component Analysis	121
7.6	Independent Component Analysis: Blind Source Separation	124
	Conclusions	126
	References	126

8	Group Decision Making	131
8.1	Introduction	131
8.2	Types of Group Decision Making	131
8.3	Artificial Intelligence for Group Decision Making	132
8.3.1	Equally Weighted Ensemble: Support Vector Machines for Land Cover Mapping	133
8.3.2	Statically Weighted Ensemble: Condition Monitoring in Structures	135
8.3.3	Dynamically Weighted Mixtures of Experts: Platinum Price Prediction	137
8.3.4	Learn++: Wine Recognition	140
8.3.5	Incremental Learning Using Genetic Algorithm: Optical Character Recognition	144
	Conclusions	147
	References	147
9	Conclusion	151
9.1	Introduction	151
	Conclusions and Further Work	152
	References	154
	Appendices	157
A.1	Fourier Transform, Wavelet Transform, Modal Properties and Pseudo-Modal Energies	157
A.1.1	Fourier Transform	157
A.1.2	Wavelet Transform	158
A.1.3	Modal Properties	159
A.1.4	Pseudo-Modal Energies	159
B.1	Committee of Networks	161
B.1.1	Introduction	161
B.1.2	Equal Weights	162
B.1.3	Variable Weights	163
B.1.4	Committee Gives More Reliable Solution	165
