1	Fundamentals of Physical Layer Network Coding	1
1.1	Preliminaries of Physical Layer Network Coding	1
1.2	Data Detection	3
1.3	Virtual Unidirectional Relaying	4
1.4	Soft Combination of Uplink and Downlink	5
1.5	Conclusions	7
	References	7
2	Background on Channel Estimation	9
2.1	Channel Estimation in Point-to-Point System	9
2.1.1	Estimation of Deterministic Channel	9
2.1.2	Estimation of Random Channel	11
2.2	Channel Estimation in AF Based URS	12
2.2.1	Space Time Coding in AF Based URS	13
2.2.2	Channel Estimation	14
2.3	Challenges of Channel Estimation for PLNC	16
	References	17
3	Channel Estimation for PLNC Under Frequency Flat Fading Scenario	19
3.1	System Model	19
3.2	Maximum Likelihood Estimation	20
3.2.1	Channel Estimation	20
3.2.2	Training Sequence Design	23
3.3	Linear Maximum Signal-to-Noise Ratio Based Estimation	25
3.3.1	Channel Estimation	25
3.3.2	Training Sequence Design	27
3.4	Numerical Results	29
3.5	Summary	31
	Appendix 1: Derivation of CRLB	32
	References	33

4	Channel Estimation for PLNC Under Frequency Selective Fading Scenario	35
4.1	System Model	35
4.1.1	OFDM Transmission in PLNC	36
4.1.2	Relay Processing	37
4.1.3	Maximum Likelihood Data Detection	38
4.1.4	Channel Estimation Strategy	39
4.1.5	Specialities of PLNC	40
4.2	Block Training Based Channel Estimation	40
4.2.1	Channel Estimation	40
4.2.2	Training Sequence Design	40
4.2.3	Identifiability and Individual Channel Extraction	41
4.3	Pilot Tone Based Channel Estimation	43
4.3.1	Channel Estimation	43
4.3.2	Identifiability and Individual Channel Extraction	43
4.3.3	Pilot Tone Design	44
4.4	Numerical Results	47
4.4.1	Training with One OFDM Block	47
4.4.2	Training with PTs	50
4.5	Summary	51
	Appendix 1: Block Training Based Estimation	52
	Appendix 2: PT Based Estimation	55
	References	56
5	Channel Estimation for PLNC Under Time-Selective Fading Scenario	59
5.1	System Model	59
5.1.1	Time Varying Relay Channels	59
5.1.2	Transmission Strategy	61
5.1.3	Channel Estimation Strategy	62
5.2	Channel Estimation and Training Design	64
5.2.1	Channel Estimation	65
5.2.2	Training Sequence Design	65
5.2.3	Parameter Selection	68
5.2.4	Extracting the Single Hop BEM Coefficient	69
5.3	Numerical Results	71
5.3.1	Channel Estimation and Training Design	71
5.3.2	Data Detection	74
5.4	Summary	75
	Appendix: Proof of Theorem 5.1	75
