1	Scattering by a Single Particle	1
	Overview	1
	Introduction to Light Scattering	1
	Scattering Mechanisms	3
	The Nature of Light	5
	The Effect of Particle Size and Light Wavelength	7
	Light Scattering by a Single, Isolated Particle	8
	Comparing Scattering Parameters	12
	The Magnitude of Light Deflection	15
	Light Scattering in Different Media	17
	The Optimal TiO_2 Particle Size	21
	Undertone	23
	Exotic Particle Architecture	25
	Mie Limitations	27
	Summary	28
	References	29
2	Scattering by Groups of Particles	31
	Overview	31
	The Need to go Beyond Mie Theory	31
	Dependent Light Scattering	33
	PVC and TiO_2 PVC	34
	The CPVC	35
	Crowding Versus Nonideal Spacing	37
	Light Scattering in Paint Films	39
	Points of Possible Confusion	41
	S_{TiO_2} and S_{coat}	42
	Causes and Control of Nonideal Spacing	46
	State of TiO_2 Dispersion	46
	Resin Particle Size	47
	Effect of Extender Particle Size on Nonideal Spacing	49
	Formulating at High-Effective PVC	51
	Nano-Spacers	51
	The Optimal TiO_2 Particle Size Revisited	54

Wet Hide	55
