1 Distributed Cogeneration. Civic Power Engineering. New Ideas 1
1.1 New Energy Policy of the European Union. Civic Energy Generation 1
1.2 Installations for Distributed Energy. The Examples of DES/RES Devices and Technologies 4
1.3 Domestic CHP ORC Units 5
1.4 Autonomous Energy Regions (ARE) 10
1.5 Research Center in Jabłonna 13
1.6 Concluding Remarks 15
References 16

2 Introduction to Microturbines Vibration Analysis 17
2.1 Characteristics of Microturbines 17
2.2 Introduction to Vibrations of Mechanical Systems 20
2.2.1 The Equation of Motion 20
2.2.2 Free Vibrations 21
2.2.3 Damping of Vibrations in Mechanical Systems 22
2.2.4 Forced Vibrations 23
2.3 Vibrations of Rotating Systems 23
2.3.1 Hydrodynamic Instability 26
2.3.2 Kinetostatic Analysis 27
2.3.3 Analysis in the Scope of Linear Dynamics 28
2.3.4 Analysis in the Scope of Non-linear Dynamics 30
2.4 Modern Research Methods and Tools 31
2.4.1 Software 31
2.4.2 Test and Measurement Apparatus 34
References 36

3 Unconventional Bearings 39
3.1 General Information about Microbearings 40
3.2 Bearings Lubricated with a Low-Boiling Medium 42

3.2.1 Hydrodynamic Bearings . . . 44
3.2.2 Hybrid Bearings . . . 46
3.3 Foil Bearings . . . 48
3.3.1 Geometry of Foil Bearings . . . 50
3.3.2 Numerical Model of the Foil Bearing Structure . . . 60
3.3.3 Verification of the Structural Model . . . 71
3.3.4 Modelling the Fluid-Structure Interaction . . . 81
3.3.5 Experimental Verification of the Model . . . 84
3.4 Other Bearing Methods . . . 103
3.4.1 High-Speed Rolling Bearings . . . 103
3.4.2 Magnetic Bearings . . . 106
References . . . 110

4 Modelling and Analysis of Vibrations of Microturbines . . . 113
4.1 Radial Microturbine . . . 114
4.1.1 Analysis of Rotor with Slide Bearings . . . 115
4.1.2 Analysis of Rotor with Gas Bearings . . . 118
4.1.3 Analysis of Rotor with Foil Bearings . . . 126
4.1.4 Modal Analysis of the Rotor . . . 130
4.1.5 Modal Analysis of the Microturbine . . . 132
4.1.6 Analysis of Kinetostatic Stresses . . . 135
4.1.7 Analysis of Thermal Loads . . . 137
4.1.8 Analysis of Stiffness of Bearing Supports . . . 143
4.2 Axial Microturbine . . . 149
4.2.1 Analysis of Rotor with Slide Bearings . . . 150
4.2.2 Analysis of Rotor with Rolling Bearings . . . 153
4.2.3 Modal Analysis of the Rotor . . . 156
4.2.4 Modal Analysis of the Microturbine . . . 158
4.2.5 Analysis of Kinetostatic Stresses . . . 161
4.3 Summary . . . 162
References . . . 163

5 Measurements of Vibrations of Microturbine Elements . . . 165
5.1 Experimental Modal Analysis of the Rotor . . . 166
5.1.1 Method of Testing . . . 168
5.1.2 Test Results . . . 171
5.2 Vibrations of the Rotor with Ceramic Rolling Bearings . . . 174
5.2.1 Method of Testing . . . 174
5.2.2 Test Results . . . 176
5.3 Vibrations of the Radial Microturbine . . . 187
5.4 Vibrations of an Ultrasonic Microturbine . . . 194
5.4.1 Time Courses . . . 197
5.4.2 Frequency Analysis . . . 199
5.4.3 Evaluation of the Dynamic State . . . 202

5.5 Vibrations of the Microturbine Supporting Structure. 204
5.5.1 Method of Testing. 205
5.5.2 Test Results. 206

Steam Microturbines in Distributed Cogeneration

Kiciński, J.; Żywica, G.

2014, XI, 219 p. 284 illus., Hardcover
ISBN: 978-3-319-12017-1
