

Contents

Part I Text Mining Techniques and Methodologies

Building Large Resources for Text Mining: The Leipzig Corpora Collection	3
Uwe Quasthoff, Dirk Goldhahn, and Thomas Eckart	
Learning Textologies: Networks of Linked Word Clusters	25
Hristo Tanev	
Simple, Fast and Accurate Taxonomy Learning	41
Zornitsa Kozareva	
A Topology-Based Approach to Visualize the Thematic Composition of Document Collections	63
Patrick Oesterling, Christian Heine, Gunther H. Weber, and Gerek Scheuermann	
Towards a Network Model of the Coreness of Texts: An Experiment in Classifying Latin Texts Using the TTLab Latin Tagger	87
Alexander Mehler, Tim vor der Brück, Rüdiger Gleim, and T. Geelhaar	

Part II Text Mining Applications

A Structuralist Approach for Personal Knowledge Exploration Systems on Mobile Devices	115
Stefan Bordag, Christian Hänig, and Christian Beutenmüller	
Natural Language Processing Supporting Interoperability in Healthcare	137
Frank Oemig and Bernd Blobel	

Deception Detection Within and Across Cultures	157
Veronica Perez-Rosas, Cristian Bologa, Mihai Burzo, and Rada Mihalcea	
Sentiment Analysis: What's Your Opinion?	177
Jonathan Sonntag and Manfred Stede	
Multi-perspective Event Detection in Texts Documenting the 1944 Battle of Arnhem	201
Marten Düring and Antal van den Bosch	
Towards a Historical Text Re-use Detection	221
Marco Büchler, Philip R. Burns, Martin Müller, Emily Franzini, and Greta Franzini	

Text Mining

From Ontology Learning to Automated Text Processing
Applications

Biemann, C.; Mehler, A. (Eds.)

2014, X, 238 p. 50 illus., 23 illus. in color., Hardcover
