

# Contents

## Part I Research Issues

<b>One Artefact: Many Phenomena .....</b>	<b>3</b>
Domenico Parisi	
<b>Taming the Complexity of Natural and Artificial Evolutionary Dynamics .....</b>	<b>19</b>
Riccardo Poli and Christopher R. Stephens	

## Part II Biological Modeling

<b>Models of Gene Regulation: Integrating Modern Knowledge into the Random Boolean Network Framework .....</b>	<b>43</b>
Christian Darabos, Mario Giacobini, Jason H. Moore, and Marco Tomassini	
<b>Attractors Perturbations in Biological Modelling: Avalanches and Cellular Differentiation .....</b>	<b>59</b>
Marco Villani and Roberto Serra	
<b>Automatic Design of Boolean Networks for Modelling Cell Differentiation .....</b>	<b>77</b>
Stefano Benedettini, Andrea Roli, Roberto Serra, and Marco Villani	
<b>Towards the Engineering of Chemical Communication Between Semi-Synthetic and Natural Cells .....</b>	<b>91</b>
Pasquale Stano, Giordano Rampioni, Luisa Damiano, Francesca D’Angelo, Paolo Carrara, Livia Leoni, and Pier Luigi Luisi	

### Part III Mind and Society

<b>Cumulative Learning Through Intrinsic Reinforcements .....</b>	<b>107</b>
Vieri G. Santucci, Gianluca Baldassarre, and Marco Mirolli	
<b>Development of Categorisation Abilities in Evolving Embodied Agents: A Study of Internal Representations with External Social Inputs .....</b>	<b>123</b>
Francesco Pugliese	
<b>Regulatory Traits: Cultural Influences on Cultural Evolution .....</b>	<b>135</b>
Alberto Acerbi, Stefano Ghirlanda, and Magnus Enquist	
<b>Building Up Serious Games with an Artificial Life Approach: Two Case Studies .....</b>	<b>149</b>
Onofrio Gigliotta, Orazio Miglino, Massimiliano Schembri, and Andrea Di Ferdinando	

### Part IV Applications

<b>The Effects of Multivalency and Kinetics in Nanoscale Search by Molecular Spiders .....</b>	<b>161</b>
Oleg Semenov, Darko Stefanovic, and Milan N. Stojanovic	
<b>Towards the Use of Genetic Programming for the Prediction of Survival in Cancer .....</b>	<b>177</b>
Marco Giacobini, Paolo Provero, Leonardo Vanneschi, and Giancarlo Mauri	
<b>A Neuro-Evolutionary Approach to Electrocardiographic Signal Classification.....</b>	<b>193</b>
Antonia Azzini, Mauro Dragoni, and Andrea G.B. Tettamanzi	
<b>Self-Organisation and Evolution for Trust-Adaptive Grid Computing Agents .....</b>	<b>209</b>
Yvonne Bernard, Lukas Klejnowski, David Bluhm, Jörg Hähner, and Christian Müller-Schloer	
<b>Honest vs Cheating Bots in PATROL-Based Real-Time Strategy MMOGs .....</b>	<b>225</b>
Stefano Sebastio, Michele Amoretti, Jose Raul Murga, Marco Picone, and Stefano Cagnoni	

### Part V Evolution

<b>Distribution Search on Evolutionary Many-Objective Optimization: Selection Mappings and Recombination Rate .....</b>	<b>241</b>
Hernán Aguirre, Akira Oyama, and Kiyoshi Tanaka	

**Concurrent Implementation Techniques Using Differential  
Evolution for Multi-Core CPUs: A Comparative Study  
Using Statistical Tests ..... 261**  
Kiyoharu Tagawa

Evolution, Complexity and Artificial Life

Cagnoni, S.; Mirolli, M.; Villani, M. (Eds.)

2014, XVII, 280 p. 97 illus., 38 illus. in color., Hardcover

ISBN: 978-3-642-37576-7
