

Contents

1	General Introduction	1
1.1	Research Background	2
1.1.1	Nitrate Contamination of Groundwater	2
1.1.2	Sources of Groundwater Nitrate	3
1.1.3	Health Risks to Humans	5
1.2	In Situ Remediation Approaches for Nitrate Contaminated Groundwater	6
1.2.1	Physical Adsorption	6
1.2.2	Biological Denitrification	8
1.2.3	Chemical Reduction	14
1.2.4	Combined Approaches	17
1.3	Permeable Reactive Barriers for Nitrate Removal	18
1.3.1	Denitrification Reactive Media	18
1.3.2	Field Application Cases	19
1.4	Conclusions	19
	References	20
2	Heterotrophic-Autotrophic Denitrification	27
2.1	Introduction	28
2.2	Materials and Methods	29
2.2.1	Materials and Chemicals	29
2.2.2	Enrichment Culture Protocol to Establish a Denitrifying Bacterial Population	30
2.2.3	Batch Experiments	30
2.2.4	Analytical Methods	33
2.2.5	Data Processing Methods	33
2.3	Results and Discussion	34
2.3.1	Deoxygenation Capacity of the Heterotrophic-Autotrophic Denitrification Process	34
2.3.2	Contributions of Chemical Reduction, Heterotrophic Denitrification and Autotrophic Denitrification to the Performance of the Heterotrophic-Autotrophic Denitrification Process	35

2.3.3	Effects of Environmental Parameters on the Heterotrophic-Autotrophic Denitrification Process.	41
2.3.4	Long-term Performance of the Heterotrophic-Autotrophic Denitrification Process.	50
2.3.5	Kinetics of NO ₃ -N Denitrification by the Heterotrophic-Autotrophic Denitrification Process.	51
2.3.6	Mechanisms for Dissolved Oxygen Removal and NO ₃ -N Denitrification in the Heterotrophic-Autotrophic Denitrification Process.	53
2.3.7	Comparison of Denitrification Capacity Among Different Denitrification Approaches.	54
2.4	Conclusions	56
	References	57
3	Heterotrophic-Autotrophic Denitrification Permeable Reactive Barriers.	61
3.1	Introduction	62
3.2	Materials and Methods.	64
3.2.1	Materials and Chemicals	64
3.2.2	Inoculation.	64
3.2.3	Experimental Setup and Operation	64
3.2.4	Analytical Methods and Instruments	65
3.2.5	Data Processing Methods.	67
3.3	Results and Discussion.	67
3.3.1	Start-up	67
3.3.2	Temporal Variations of Water Quality Indices	69
3.3.3	Spatial Variations of Water Quality Indices	78
3.3.4	Effects of Operating Parameters on the Heterotrophic-Autotrophic Denitrification Permeable Reactive Barrier Performance	86
3.3.5	Comparison of Denitrification Capacity Among Different Denitrification Processes	89
3.4	Conclusions	89
	References	90
4	Bacterial Community in the Inoculum	93
4.1	Introduction	94
4.2	Materials and Methods.	94
4.2.1	Sample Collection for Gene Analysis	94
4.2.2	Total DNA Extraction and Polymerase Chain Reaction Amplification of 16S rRNA Genes	95
4.2.3	Polymerase Chain Reaction Product Purification, Ligation and Transformation	95

4.2.4	Cloning and Sequencing	96
4.2.5	Sequence Analysis of 16S rRNA	96
4.2.6	Phylogenetic Analysis	96
4.2.7	Nucleotide Sequence Accession Numbers	97
4.3	Results and Discussion.	97
4.3.1	Total DNA Extraction	97
4.3.2	Polymerase Chain Reaction Amplification of 16S rRNA Genes	98
4.3.3	Bacterial Community Structure and Phylogenetic Analysis Based on a 16S rRNA Gene Library	98
4.4	Conclusion	102
	References	102
