

Contents

Part I Central Neurological Impairments

- 1 Emerging Perspectives in Stroke Rehabilitation 3**
Guillermo Asín Prieto, Roberto Cano-de-la-Cuerda,
Eduardo López-Larraz, Julien Metrot, Marco Molinari
and Liesjet E. H. van Dokkum
- 2 Emerging Rehabilitation in Cerebral Palsy 23**
Stefan Lambrecht, Oiane Urra, Svetlana Grosu
and Soraya Pérez Nombela
- 3 Spinal Cord Stimulation for Parkinson's Disease 51**
Juan Pablo Romero-Muñoz, Francisco Miguel Rivas Montero,
Ilaria Fojadelli and Romulo Fuentes

Part II Spinal and Brain Plasticity

- 4 Spinal Cord Plasticity and Neuromodulation 67**
Stefano Piazza, Johannes Brand and Carlos Escolano
- 5 Neural Interfaces as Tools for Studying Brain Plasticity 89**
A. Aranceta-Garza, S. Kumpulainen, M. Canela-Repuela,
D. Boere, Juan López Coronado, Teodoro García Egea,
G. E. Francisco and J. L. Contreras-Vidal
- 6 Neuromodulation on Cerebral Activities 103**
Sylvain Cremoux, Jaime Ibanez Pereda, Serdar Ates
and Alessia Dessì
- 7 Challenges in Measurement of Spasticity
in Neurological Disorders 117**
Marta Pajaro-Blázquez, Pawel Maciejasz, John McCamley,
Ivan Collantes-Vallar, Dorin Copaci and William Zev Rymer

- 8 Motor Control and Emerging Therapies for Improving Mobility in Patients with Spasticity** 147
 Sabata Gervasio, Catherine Macleod,
 Elisabeth Bravo Esteban-Herreros, Lin Meng
 and María Carratalá Tejada

Part III Emerging Technologies

- 9 Reverse-Engineer the Brain: Perspectives and Challenges** 173
 Eloy Urendes Jiménez, Antonio Flores Caballero,
 Francisco Molina Rueda, Javier Iglesias Giménez and Roberto Oboe
- 10 Robotic Rehabilitation: Ten Critical Questions about Current Status and Future Prospects Answered by Emerging Researchers** 189
 Antonio J. del-Ama, Alicia Cuesta, Vijaykumar Rajasekaran,
 Fernando Trincado, HyunKi In and David Reinkensmeyer
- 11 Upper Limb Neuroprostheses: Recent Advances and Future Directions** 207
 Aikaterini D. Koutsou, Susanna Summa, Bilal Nasser,
 Josefina Gutierrez Martinez and Muthukumaran Thangaramanujam
- 12 BMIs for Motor Rehabilitation: Key Concepts and Challenges** . . . 235
 Magdo Bortole, Marco Controzzi, Iolanda Pisotta and Andrés Úbeda
- 13 Virtual Reality** 249
 Max Ortiz-Catalan, Sharon Nijenhuis, Kurt Ambrosch,
 Tamar Bovend'Eerd, Sebastian Koenig and Belinda Lange
- 14 Surface EMG in Neurorehabilitation and Ergonomics: State of the Art and Future Perspectives** 267
 Filipe Barroso, Diana Ruiz Bueno, Juan Álvaro Gallego,
 Paola Jaramillo and Atilla Kilicarslan

Part IV Hands-on Guides

- 15 Introduction to Low-Cost Motion-Tracking for Virtual Rehabilitation** 287
 Sebastian Koenig, Aitor Ardanza, Camilo Cortes,
 Alessandro De Mauro and Belinda Lange

16 Human Movement Analysis with Inertial Sensors 305
Stefan Lambrecht and Antonio J. del-Ama

17 Design of Experiments for Bioengineers in Clinical Settings. 329
Juan-Manuel Belda-Lois and Helios De Rosario Martínez

Emerging Therapies in Neurorehabilitation

Pons, J.L.; Torricelli, D. (Eds.)

2014, X, 345 p., Hardcover

ISBN: 978-3-642-38555-1
