
Contents

1	Introduction	1
2	Introduction to Igneous Rocks	19
3	Phase Relations in Simple Systems: Key to Magma Generation, Crystallization, and Mixing	51
4	Phase Relationships in Ternary Systems	79
5	Magma Formation and Segregation	99
6	Igneous Rock Series: Basalt Magma Evolution	119
7	Basalt Magma Generation: Perspectives from Experimental Petrology	151
8	Basaltic Magmatism at Mid-Oceanic Ridges and Hawaiian Hot Spot	163
9	Large Igneous Provinces: Deccan Traps and Columbia River Basalts	189
10	Subduction Zone Magmas	209
11	Alkaline and Ultra-Alkaline Rocks, Carbonatites, and Kimberlites	243
12	Anorthosites and Komatiites	261
13	Sediments	277
14	Sedimentary Rocks	299
15	Metamorphism and Metamorphic Rocks	311
16	Metamorphic Facies, Reactions, and P-T-t Paths	325
	Appendix A: A Brief Introduction to Isotope Geochemistry	351
	Appendix B: Simplified CIPW Norm Calculation	357
	References	359

Petrology

Principles and Practice

Sen, G.

2014, VII, 368 p. 377 illus., 102 illus. in color.,

Hardcover

ISBN: 978-3-642-38799-9
