1	Introduction	1
1.1	Classical versus Quantum Black Holes	1
1.2	How, When and Where Black Holes Form	4
1.3	Black Holes as the Link Between Macrophysics and Microphysics	6
1.4	Conclusions	9
	References	9
2	Black Holes in General Relativity	11
2.1	Introduction	11
2.2	Four-dimensional Black Holes	12
2.2.1	Schwarzschild Black Hole	12
2.2.2	Reissner-Nordström Black Hole	14
2.2.3	Kerr Black Hole	15
2.3	Higher-dimensional Black Holes	17
2.3.1	Spherically Symmetric Higher-dimensional Black Holes	17
2.3.2	Higher-dimensional Rotating Black Holes	18
2.4	Brane Black Holes	19
2.4.1	Brane Worlds	19
2.4.2	Neutral Brane Black Holes	20
2.5	Black Hole Mechanics and Thermodynamics	21
2.5.1	Definitions	22
2.5.2	Black Hole Mechanics	23
2.5.3	Black Hole Entropy and Thermodynamics	24
2.6	Conclusions	25
	References	25
3	Hawking Radiation and Black Hole Evaporation	27
3.1	Introduction	27
3.2	Hawking Radiation	27
3.2.1	Black Hole Temperature	28
3.2.2	Black Hole Thermodynamics Revisited	29

3.2.3	Hawking Fluxes	30
3.2.4	Validity of the Semi-classical Approximation.	31
3.3	Stages of Evolution of a Microscopic Black Hole	31
3.4	Computation of Hawking Radiation	33
3.4.1	Teukolsky Formalism on the Brane	33
3.4.2	Bulk Fields	35
3.4.3	Greybody Factors	36
3.4.4	Emission of Particles, Energy and Angular Momentum	39
3.5	Emission of Neutral, Massless Particles	41
3.5.1	Emission from Four-dimensional Black Holes	42
3.5.2	Brane Emission from Higher-dimensional Black Holes	44
3.5.3	Bulk Emission from Higher-dimensional Black Holes . . .	46
3.6	More General Hawking Emission	47
3.7	Conclusions	48
	References	49
4	Primordial Black Holes	51
4.1	Introduction	51
4.2	Formation, Consequences and Abundance of PBHs	52
4.2.1	How PBHs Form	52
4.2.2	What PBHs Do.	54
4.2.3	Mass and Density Fraction of PBHs	55
4.3	PBHs as a Probe of Inhomogeneities	58
4.3.1	Simplistic Analysis	58
4.3.2	Refinements of Simplistic Analysis	60
4.3.3	PBHs and Inflation	61
4.4	Evaporation of Primordial Black Holes	63
4.4.1	Lifetime.	63
4.4.2	Particle Spectra.	65
4.4.3	Photosphere Effects.	66
4.5	Constraints on PBHs from Big Bang Nucleosynthesis	68
4.5.1	Historical Overview	68
4.5.2	Revised Constraints on $\beta'(M)$ Imposed by BBN.	69
4.6	Constraints on PBHs from Extragalactic Photon Background . . .	70
4.6.1	Historical Overview	70
4.6.2	Expected EGB from PBHs.	71
4.6.3	Limits on $\beta'(M)$ Imposed by Observed EGB	72
4.7	Other Constraints on Evaporating Black Holes	74
4.7.1	Galactic Gamma-Rays	74
4.7.2	Galactic Antiprotons	75
4.7.3	PBH Explosions	76
4.7.4	CMB Anisotropy.	77

4.7.5	Planck Mass Relics	77
4.8	Conclusions	78
	References	78
5	Black Hole Formation in High Energy Particle Collisions	83
5.1	Introduction	83
5.2	Classical Black Holes	85
5.3	Semi-classical Black Holes	90
5.4	Planckian Quantum Black Holes	91
5.5	Conclusions	92
	References	92
6	Black Holes and Low Scale Quantum Gravity	93
6.1	Models of Low Scale Quantum Gravity	93
6.2	Microscopic Black Holes at Colliders	95
6.3	Microscopic Black Holes in Cosmic Ray Experiments	98
6.4	Conclusions	100
	References	100
7	Conclusions	101
