

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Some Solution Schemes and Game Properties</b>	<b>7</b>
<b>3</b>	<b>The Shapley Value and (Pre-)Kernel as a Fairness Concept</b>	<b>17</b>
3.1	The Shapley Value as a Standard of Fairness	17
3.2	The (Pre-)Kernel as a Standard of Fairness	20
<b>4</b>	<b>Fair Division in Cournot Markets</b>	<b>27</b>
4.1	Oligopoly Situation and Games	27
4.1.1	Characteristic Functions	28
4.1.2	Some Properties of Cooperative Oligopoly Games	30
4.1.3	Computing the Cooperative Oligopoly Game	31
4.2	Axiomatic Treatment of the Shapley Value	33
4.2.1	Computing the Shapley Value	34
4.3	Axiomatic Treatment of the (Pre-)Kernel, and Nucleolus	36
4.3.1	Computing the Kernel/Nucleolus	38
4.3.2	Alternative Approach to Compute the Kernel/Nucleolus	40
4.4	General Discussion of the Fair Division Rules	45
<b>5</b>	<b>Some Preliminary Results</b>	<b>47</b>
5.1	The Moore-Penrose Matrix	48
5.2	The Fenchel-Moreau Conjugation	49
5.3	An Over-Determined System of Non-linear Equations	52
5.4	Identifying Equivalence Relations on the Payoff Space	57
<b>6</b>	<b>A Pre-Kernel Characterization and Orthogonal Projection</b>	<b>63</b>
6.1	A First Dual Characterization of the Pre-Kernel	64
6.2	Essential Properties of the Quadratic Function Induced	68
6.3	An Orthogonal Projection: A General Discussion	77
6.4	An Orthogonal Projection: A Formal Analysis	79
6.5	Vector Space of Balanced Excesses	87
6.6	Group Actions on the Bargaining Situations	99

6.7	Invariance Against a Change of Basis .....	107
6.8	Pre-Kernel Results w.r.t. the Orthogonal Projection .....	109
6.9	Application of the Results: Some Examples .....	113
<b>7</b>	<b>Characterization of the Pre-Kernel by Solution Sets .....</b>	<b>121</b>
7.1	The Minimum Value Function and the Fenchel Transform.....	122
7.2	Directional Improvement Property.....	127
7.3	A Dual Representation of Pre-Kernel.....	136
7.4	Vector Spaces of Balanced Excesses Reconsidered.....	138
7.5	A Non-replication Result.....	150
7.6	A Replication Result .....	153
7.7	Replication of the Covariance Under Strategic Equivalence Property .....	165
7.8	Results on the Structure of the Pre-Kernel .....	166
<b>8</b>	<b>Algorithms for Computing the Pre-Kernel .....</b>	<b>169</b>
8.1	A First Algorithm to Compute a Pre-Kernel Element .....	170
8.2	A Modified Algorithm to Compute a Pre-Kernel Element .....	187
8.3	A Directional Improvement Algorithm.....	190
8.4	Maximum Number of Iteration Steps.....	193
8.5	A Comprehensive Numerical Example.....	200
8.6	General Discussion of the Algorithms.....	207
8.7	Computing the Kernel of Zero-Monotonic Games.....	209
<b>9</b>	<b>An Upper Dimension Bound of the Pre-Kernel .....</b>	<b>217</b>
9.1	New Upper Dimension Bound of the Pre-Kernel .....	218
9.2	Refinement Result on the Maximum Number of Iteration Steps ....	222
<b>10</b>	<b>Concluding Remarks .....</b>	<b>223</b>
<b>A</b>	<b>Pre-Kernel Computation: Empirical Results.....</b>	<b>225</b>
	<b>Bibliography .....</b>	<b>231</b>
	<b>Author Index.....</b>	<b>235</b>
	<b>Subject Index .....</b>	<b>237</b>

The Pre-Kernel as a Tractable Solution for Cooperative  
Games

An Exercise in Algorithmic Game Theory

Meinhardt, H.I.

2014, XXXIII, 242 p. 8 illus., 3 illus. in color., Hardcover

ISBN: 978-3-642-39548-2
