

Contents

Part I Design

1	A Power-Optimized High-Speed and High-Resolution Pipeline ADC with a Parallel Sampling First Stage for Broadband Multi-Carrier Systems	3
	Yu Lin, Athan Zanakopoulos, Kostas Doris, Hans Hegt and Arthur H. M. van Roermund	
2	Design of Power, Dynamic Range, Bandwidth and Noise Scalable ADCs	29
	B. Bakaloglu, S. Kiaei, H. Kim and K. Chandrashekar	
3	Current and Emerging Trends in the Design of Digital-to-Analog Converters.	83
	Sidharth Balasubramanian, Vipul J. Patel and Waleed Khalil	
4	Digitally-Based Calibration Techniques for RF $\Sigma\Delta$ Modulators	119
	Jose Silva-Martinez, Fabian Silva-Rivas, Cho-Ying Lu, John Mincey and Sebastian Hoyos	
5	Incremental and Extended-Range Data Converters	143
	Gabor C. Temes	
6	Event-Driven Successive Charge Redistribution Schemes for Clockless Analog-to-Digital Conversion	161
	Dariusz Kościelnik and Marek Miśkiewicz	
7	Time-to-Digital Converters	211
	Ryszard Szplet	

Part II Modeling

- 8 Look-Up Tables, Dithering and Volterra Series
for ADC Improvements 249**
Henrik Lundin and Peter Händel
- 9 A/D Conversion with Non-uniform Differential Quantization 277**
Dušan Agrež

Part III Testing

- 10 Dynamic Testing of Analog-to-Digital Converters by Means
of the Sine-Fitting Algorithms. 309**
Dario Petri, Daniel Belega and Dominique Dallet
- 11 Histogram-Based Techniques for ADC Testing 341**
Antonio Moschitta, David Macii, Francisco Corrêa Alegria
and Paolo Carbone
- 12 DAC Standardization and Advanced Testing Methods. 379**
Eulalia Balestrieri, Domenico Luca Carnì, Pasquale Daponte,
Luca De Vito, Domenico Grimaldi and Sergio Rapuano
- 13 Uncertainty Analysis of Data Converters Testing Parameters. . . . 405**
Andrea Zanobini, Lorenzo Ciani and Marcantonio Catelani

Design, Modeling and Testing of Data Converters

Carbone, P.; Kiaei, S.; Xu, F. (Eds.)

2014, IX, 430 p. 261 illus., 76 illus. in color., Hardcover
