

Contents

Part I Context

1	Introduction	3
1.1	An Example of a Verification Problem	3
1.2	Business Rules Management Systems	6
1.2.1	From Business Policies to Business Rules	6
1.2.2	A Brief Genealogy of Business Rules Management Systems	7
1.2.3	Industrial Context.....	9
1.3	Motivation	10
1.4	Summary of Contribution	12
1.5	Structure of This Book	14
	References.....	15
2	Related Work	19
2.1	Rule-Based Paradigms: Model vs. State	19
2.1.1	Model-Oriented Rules	20
2.1.2	State-Oriented Rules.....	20
2.1.3	Combining the Two Approaches.....	21
2.2	Formalization and Verification of Rule Programs	22
2.2.1	Formalization	22
2.2.2	Verification of Model-Oriented Rule Programs	23
2.2.3	Verification of State-Oriented Rule Programs.....	24
2.3	Verification of Pointer and Concurrent Programs.....	25
	References.....	26

Part II Rule Programs

3	Syntax of Rules and Rule Programs	33
3.1	Signature.....	33
3.2	Symbols.....	34

3.3	Expressions and Formulas	35
3.3.1	Parameterized Languages of Expressions and Formulas.....	35
3.3.2	Well-Typed Expressions and Formulas	37
3.3.3	Formulas Are Flat	38
3.3.4	Theory Used in Examples	38
3.4	Assignment	39
3.5	Rules	40
3.5.1	Rule Variables	40
3.5.2	Rule Guard	41
3.5.3	Rule Action	42
3.6	Rule Programs	42
	References	43
4	States and State Assertions	45
4.1	States Are First-Order Logic Structures.....	46
4.1.1	Domain	46
4.1.2	Variable Valuations	47
4.1.3	Interpretation of Expressions.....	47
4.1.4	Interpretation of Formulas	49
4.1.5	States	52
4.2	State Assertions	53
4.2.1	Assertions	53
4.2.2	Global Assertions.....	53
4.2.3	Assertions Focused on a Rule	54
4.3	Transition Assertions.....	54
4.3.1	Forward Transition Assertions	54
4.3.2	Backward Transition Assertions	56
4.3.3	Global Transition Assertions	56
4.4	Semantics of Assignment	57
4.4.1	Update of an Attribute	57
4.4.2	Executing an Assignment	58
4.4.3	Assignment as a Relation Between States	59
4.5	Rule Guard and Action.....	59
4.5.1	Rule Guard	59
4.5.2	Rule Action	59
	References	60
5	Operational Semantics of Rule Programs	63
5.1	Rule Program Execution, Informally	63
5.2	Working Memory	67
5.2.1	Type-System Compliant States	67
5.2.2	Objects as Instances of Types	68
5.2.3	Preservation Properties	69
5.3	Rule Execution	71
5.3.1	Rule Instance.....	71

5.3.2	Applicability of a Rule Instance	71
5.3.3	Application of a Rule Instance	72
5.3.4	Execution of a Rule Instance	73
5.3.5	Executions of a Rule	74
5.4	Rule Program Execution	76
5.4.1	Configurations	76
5.4.2	Initial Configuration	76
5.4.3	Transition Between Configurations	77
5.4.4	Executions of a Rule Program	78
5.5	Selection Strategies	81
5.6	Eligibility Strategies	82
5.6.1	Identity Eligibility Strategy	83
5.6.2	Refraction Eligibility Strategy	84
5.6.3	Sequential Execution Strategy	86
5.6.4	One-Shot Eligibility Strategy	87
	References	89

Part III A Hoare Logic for Rule Programs

6	Correctness of Rule Programs	93
6.1	Preliminaries	93
6.1.1	Fixing the Execution Strategy	93
6.1.2	Correctness Formulas, Proofs, Proof Systems	94
6.2	Correctness Formula for a Single Rule	95
6.3	Rules Compared to Conditional Statements	98
6.3.1	Loop-Free Programs	98
6.3.2	Rules vs. Conditional Statements	100
6.4	Correctness Formula for a Rule Program	102
6.4.1	Syntax and Semantics	102
6.4.2	From Rules to Rule Programs	104
	References	106
7	Correctness of Programs: A Comparison	107
7.1	Correctness of Loop-Free Parallel Programs	107
7.1.1	Loop-Free Parallel Programs	108
7.1.2	Loop-Free Parallel Program Derived from a Rule Program	110
7.1.3	Rule Programs vs. Loop-Free Parallel Programs	112
7.2	Correctness of Parallel Programs	113
7.2.1	Ghost Variables	113
7.2.2	while Programs	115
7.2.3	Parallel Programs	116
7.2.4	Parallel Program Derived from a Rule Program	116
7.2.5	Rule Programs vs. Parallel Programs	120

7.3	Correctness of Nondeterministic Programs	122
7.3.1	Nondeterministic Programs	123
7.3.2	Nondeterministic Program Derived from a Rule Program	125
	References	127

Part IV Proof Rules for Rule Programs

8	Main Steps in Rule Program Verification	131
8.1	Interference Cases in Rule Programs	132
8.1.1	Cross-Rule Interference	132
8.1.2	Interference Due to Aliasing	133
8.2	Unary Rules	135
8.3	A First Proof Rule	136
8.4	Usage	141
8.4.1	Use the Proof Rule Bottom-Up	141
8.4.2	What to Look for	142
8.4.3	Application of the Verification Method	143
8.5	Incompleteness	145
	References	148
9	A Verification Method for Rule Programs	149
9.1	Taking Eligibility into Account	149
9.1.1	Eligibility Ghost Variables	149
9.1.2	Eligibility-Aware Assertions	151
9.1.3	Eligibility-Aware Execution	152
9.1.4	Eligibility-Aware Correctness Formulas	156
9.2	Interference Freedom	158
9.2.1	Cross-Rule Interference	158
9.2.2	Interference Due to Aliasing	159
9.3	General Proof Rule	160
9.4	Relative Completeness	165
9.5	Application of the Verification Method	173
9.5.1	Approach	173
9.5.2	Example	175
	References	183
10	Specialized Proof Rules	185
10.1	Eligibility-Aware Unary Rules	185
10.1.1	Proof Rule	186
10.1.2	Example	189
10.2	Aliasing-Free n-ary Rule Programs	194
10.3	Disjointness in Rule Programs	196
10.3.1	Disjoint Unary Rules	196
10.3.2	Disjoint Rule Programs	200
	References	201

11 Conclusion	203
11.1 Modeling an Industrial Product	204
11.2 Local vs. Global: What Is a State?	204
11.3 Are Rule Programs Magical?	205
11.4 From Local to Global	206
11.5 Possible Directions of Extension	207
11.5.1 Propose an Algorithm	207
11.5.2 Study More General Rule Programs	207
11.5.3 Study Other Properties	208
11.5.4 Leverage Program Analysis and Verification Techniques	209
References	209
 A Verification in an Industrial Business Rules Management System	 211
A.1 Preliminaries	211
A.1.1 Rule Static Analysis Features	211
A.1.2 Notations	212
A.2 Rule Applicability	214
A.2.1 Rule May Apply When...	214
A.2.2 Rule Is Never Applicable	216
A.3 Impact Analysis	216
A.3.1 Rule May Lead to a State Where...	217
A.3.2 Rule May Enable...	218
A.3.3 Rule May Become Applicable When...	220
A.4 Redundancy	221
A.4.1 Equivalent Rules	221
A.4.2 Redundant Rules	221
A.5 Confluence and Completeness	222
A.5.1 Conflicting Rules	222
A.5.2 Completeness Analysis	224
A.6 Safety	225
A.6.1 Rule May Have an Unsafe Execution	225
A.7 Discussion	226
