

Contents

1	Lévy Processes and Their Characteristics	1
1.1	Lévy Processes	1
1.2	The Lévy-Itô Decomposition.	2
1.3	The Strong Markov Property for Lévy Processes.	3
1.4	Subordinators	5
1.5	Spectrally Positive Processes.	7
1.6	Examples of Spectrally Positive Processes	12
1.7	The Compensation Formula	15
1.8	Non-homogeneous Lévy Processes	16
1.9	Potentials	17
	References	22
2	Degradation Processes	23
2.1	Introduction	23
2.2	Basic Definitions and Results	25
2.3	Life Distributions of Devices Subject to Degradation.	30
2.4	Control-Limit Maintenance Policies for Continuously Monitored Degradable Systems.	34
2.5	One-Level Control-Limit Maintenance Policies for Non-Continuously Monitored Degradable Systems	41
2.6	Multi-Level Control-Limit Maintenance Policies for Non-Continuously Monitored Degradable Systems	59
2.7	Examples	62
2.8	Inference for the Parameters of the Degradation Process	65
	References	73
3	Storage Models: Control of Dams Using $P_{\lambda, \tau}^M$ Policies.	77
3.1	Introduction and Summary	77
3.2	Basic Definitions and Results	78
3.3	The $P_{\lambda, \tau}^M$ Control Policies and Their Associated Cost Functionals	80
3.4	Subordinator Input.	83

3.5	Spectrally Positive and Spectrally Positive Reflected at its Infimum Inputs	92
3.6	Examples	100
	References	108
Appendix: Preliminaries		109
Index		115

Lévy Processes and Their Applications in Reliability and
Storage

Abdel-Hameed, M.

2014, XIV, 116 p., Softcover

ISBN: 978-3-642-40074-2
