<b>1 Introduction: Ultra-Fast Response of Ultra-Thin Materials on Solid Surfaces</b>	<b>1</b>
Ken-ichi Shudo	
1.1 Introduction	1
1.1.1 Photoabsorption	1
1.1.2 Electronic Bands	5
1.2 Surface Systems	9
1.2.1 Surface Reflectance	12
1.2.2 Calculation	13
1.2.3 Example and Interpretation	16
1.3 Ultrafast Measurement	18
1.3.1 Monolayer Film of Organic Molecule	18
1.3.2 Experimental example	19
1.4 Summary	21
1.5 Acknowledgment	22
References	24

## Part I Reflectance Spectroscopy

<b>2 Real-Time Analysis of Initial Oxidation Process on Si(001) by Means of Surface Differential Reflectance Spectroscopy and Reflectance Difference Spectroscopy</b>	<b>29</b>
Shin-ya Ohno, Ken-ichi Shudo and Masatoshi Tanaka	
2.1 Introduction	29
2.2 Experimental	30
2.2.1 SDR Measurement	30
2.2.2 RDS Measurement	32
2.2.3 Formulation of the Reflectance in a Three-Phase Model	33
2.2.4 Advantages of the Use of SDR and RDS	35

2.3	Analysis of Initial Oxidation Reaction on Si(001) . . . . .	36
2.3.1	SDR Results. . . . .	36
2.3.2	RDS Results. . . . .	38
2.3.3	Comparison of the Results Obtained with SDR and RDS . . . . .	39
2.3.4	Origin of the Activation Energy . . . . .	40
2.3.5	Qualitative Aspects of the Reflectance Spectra. . . . .	41
2.3.6	Adsorption Structure, Identification of the Adsorption Sites, and Characterization of the Interface Structure. . . .	42
2.4	Summary and Outlook . . . . .	43
2.5	Acknowledgement . . . . .	43
	References . . . . .	43
<b>3</b>	<b>Development of In-Vacuum Microscope Under High Pressure and Its Applications . . . . .</b>	<b>45</b>
	Takao Nanba	
3.1	Introduction . . . . .	45
3.2	Development of In-UHV Microscope. . . . .	47
3.2.1	Why In-UHV Microscope . . . . .	47
3.2.2	Specifications of In-UHV Microscope . . . . .	48
3.2.3	Diamond Anvil Cell . . . . .	49
3.2.4	Spatial Resolution. . . . .	49
3.2.5	Available Spectral Regions . . . . .	50
3.3	Optical Properties of Solids Under Pressure . . . . .	51
3.3.1	Hydrogen Order-Disorder Transition of Ice . . . . .	51
3.3.2	$\text{Nd}_2\text{Ir}_2\text{O}_7$ . . . . .	55
3.3.3	$\text{Pb}_2\text{Ir}_2\text{O}_7$ . . . . .	59
3.4	Conclusions . . . . .	60
	References . . . . .	61
<b>4</b>	<b>Infrared and Terahertz Synchrotron Radiation: Optics and Applications . . . . .</b>	<b>63</b>
	Shin-ichi Kimura	
4.1	Introduction . . . . .	63
4.2	Principle of Three-Dimensional Magic Mirror Optics for THz/IR SR . . . . .	64
4.3	IR/THz Beamline Optics at UVSOR-II . . . . .	68
4.4	IR/THz Beamline Optics at UVSOR-II . . . . .	69
4.4.1	THz/IR Reflection/Absorption Spectroscopy Using SR . . . . .	72
4.4.2	THz/IR Microspectroscopy Using SR . . . . .	73
4.5	Application of THz Spectroscopy Using SR: Temperature-Dependent THz Spectra of $\text{SmB}_6$ . . . . .	75

4.6	Applications of THz Microspectroscopy Using SR . . . . .	77
4.6.1	Experimental Procedure of THz Spectroscopy Under High Pressure . . . . .	77
4.6.2	Electronic Structure of SmS Under High Pressure. . . . .	78
4.7	Conclusion and Outlook . . . . .	80
	References . . . . .	80

## Part II Ultrafast and Coherent Measurement

<b>5</b>	<b>Time-Resolved X-Ray Diffraction Studies of Coherent Lattice Dynamics Using Synchrotron Radiation . . . . .</b>	<b>85</b>
	Yoshihito Tanaka	
5.1	Introduction . . . . .	85
5.2	Synchrotron Radiation . . . . .	86
5.2.1	Present Status of SR Facilities . . . . .	86
5.2.2	Characteristic Features of SR . . . . .	87
5.3	Time-Resolved X-Ray Diffraction . . . . .	88
5.3.1	Time-Resolved Measurement Method . . . . .	89
5.3.2	Observation of Lattice Dynamics with X-Ray Diffraction . . . . .	90
5.4	Equipment Components and the Techniques . . . . .	93

### Part III THz-Technology

<b>10 Terahertz Light Source Based on Synchrotron Radiation . . . . .</b>	<b>187</b>
Masahiro Katoh	
10.1 Introduction . . . . .	187
10.2 What is a Synchrotron Radiation Source?. . . . .	188
10.3 Characteristics of Synchrotron Radiation . . . . .	189
10.4 CSR. . . . .	190
10.4.1 What is CSR?. . . . .	190
10.4.2 CSR from a Linear Accelerator . . . . .	191
10.4.3 CSR from an Electron Storage Ring . . . . .	192
10.5 Summary . . . . .	194
References . . . . .	196
<b>11 Single-Photon Counting and Passive Microscopy of Terahertz Radiation. . . . .</b>	<b>197</b>
Kenji Ikushima	
11.1 Introduction . . . . .	197
11.2 Challenges in Passive THz Sensing . . . . .	198
11.3 Photon Counting of THz Radiation . . . . .	199
11.3.1 Sensitivity of Conventional Detectors . . . . .	199
11.3.2 Charge-Sensitive Single THz Photon Detectors. . . . .	200
11.4 Photon-Counting THz Imaging . . . . .	205

11.4.1 Scanning Confocal THz Microscope . . . . .	205
11.4.2 THz Imaging of Quantum Hall Effect Devices . . . . .	206
11.5 Future Perspectives . . . . .	211
References . . . . .	211
<b>12 Material Evaluation with Optical Measurement Systems:</b>	
<b>Focusing on Terahertz Spectroscopy . . . . .</b>	<b>213</b>
Keiko Kitagishi	
12.1 Introduction . . . . .	213
12.2 Terahertz Spectroscopic System . . . . .	213
12.2.1 Terahertz-Time Domain Spectroscopic System for the Transmission Measurements . . . . .	213
12.2.2 Terahertz-Time Domain Spectroscopic System for the Reflection Measurements. . . . .	217
12.2.3 Optical Modification for the Transmission Measurements of the Samples with High Refractive Indices . . . . .	219
12.3 Material Evaluation with Visible, NIR, and Light-Scattering Spectrophotometers . . . . .	221
12.3.1 Color Evaluation and Estimation of Membrane Thickness with a Fiber-Coupled Spectrophotometer in the Visible and NIR Region . . . . .	222
12.3.2 Inspection of Gas Regarding Production of Semiconductors with FT-IR . . . . .	223
12.3.3 Light-Scattering Spectrophotometers . . . . .	223
References . . . . .	223
