

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Brief History of LP	2
1.2	From Practical Issue to LP Model	5
1.3	Illustrative Applications	8
1.4	Errors of Floating Point Arithmetic	12
1.5	The Standard LP Problem	15
1.6	Canonical Form of $Ax=b$	18
 <b>Part I Fundamentals</b>		
<b>2</b>	<b>Geometry of the Feasible Region</b>	27
2.1	Polyhedral Convex Set and the Feasible Region	28
2.2	Geometric Structure of the Feasible Region	36
2.3	Optimal Face and Vertex	49
2.3.1	Graphic Approach	51
2.4	Feasible Direction and Active Constraint	52
2.5	Heuristic Characteristic of Optimal Solution	56
<b>3</b>	<b>Simplex Method</b>	61
3.1	Simplex Tableau	61
3.2	Simplex Method: Tableau Form	63
3.3	Start-Up of the Simplex Method	71
3.4	Revised Simplex Tableau	78
3.5	Simplex Method	80
3.6	Degeneracy and Cycling	85
3.7	Finite Pivot Rule	88
3.8	Computational Complexity	95
3.9	On Features of the Simplex Method	98
<b>4</b>	<b>Duality Principle and Dual Simplex Method</b>	101
4.1	Dual LP Problem	101
4.2	Duality Theorems	104

4.3	Optimality Condition.....	107
4.4	Dual Simplex Method: Tableau Form .....	110
4.5	Dual Simplex Method .....	114
4.6	Economic Interpretation of Duality: Shadow Price .....	118
4.7	Notes .....	119
<b>5</b>	<b>Implementation of the Simplex Method.....</b>	<b>123</b>
5.1	Miscellaneous .....	123
5.2	Preprocessing: Scaling .....	125
5.3	LU Factorization of Basis .....	127
5.3.1	Use of LU Factorization .....	128
5.3.2	Sparse LU Factorization .....	131
5.4	Updating LU Factors .....	134
5.5	Crashing for Initial Basis .....	137
5.6	Harris Rule and Tolerance Expending.....	140
<b>6</b>	<b>Sensitivity Analysis and Parametric LP.....</b>	<b>143</b>
6.1	Change in Costs .....	144
6.2	Change in the Right-Hand Side.....	146
6.3	Change in Coefficient Matrix .....	148
6.3.1	Dropping a Variable .....	148
6.3.2	Adding a Variable.....	150
6.3.3	Dropping a Constraint .....	152
6.3.4	Adding a Constraint .....	154
6.3.5	Replacing a Row or Column .....	159
6.4	Parametric LP .....	162
6.4.1	Parameterized Cost .....	162
6.4.2	Parameterized Right-Hand Side .....	166
<b>7</b>	<b>Variants of the Simplex Method .....</b>	<b>169</b>
7.1	Primal-Dual Simplex Method .....	169
7.2	Self-Dual Parametric Simplex Method .....	175
7.3	General LP Problems.....	179
7.4	Generalized Simplex Method .....	180
7.4.1	Generalized Phase-I .....	187
7.5	Generalized Dual Simplex Method: Tableau Form .....	188
7.5.1	Generalized Dual Phase-I .....	192
7.6	Generalized Dual Simplex Method.....	193
7.7	Bound Flipping .....	201
<b>8</b>	<b>Decomposition Method.....</b>	<b>205</b>
8.1	D-W Decomposition .....	206
8.1.1	Generalization of D-W Decomposition.....	211
8.2	Start-Up of D-W Decomposition .....	211
8.3	Application of D-W Decomposition .....	212
8.4	Economic Interpretation of D-W Decomposition.....	218
8.5	Benders Decomposition.....	221

8.6	Application of Benders Decomposition .....	228
8.7	Primal Benders Decomposition .....	234
<b>9</b>	<b>Interior-Point Method</b> .....	<b>239</b>
9.1	Karmarkar Algorithm .....	240
9.1.1	Projective Transformation .....	241
9.1.2	Karmarkar Algorithm .....	242
9.1.3	Convergence .....	244
9.2	Affine Interior-Point Method .....	249
9.2.1	Formulation of the Algorithm .....	249
9.2.2	Convergence and Start-Up .....	252
9.3	Dual Affine Interior-Point Method .....	253
9.4	Path-Following Interior-Point Method .....	256
9.4.1	Primal-Dual Method .....	258
9.4.2	Infeasible Primal-Dual Method .....	262
9.4.3	Predictor-Corrector Primal-Dual Method .....	264
9.4.4	Homogeneous and Self-Dual Method .....	266
9.5	Notes .....	269
<b>10</b>	<b>Integer Linear Programming (ILP)</b> .....	<b>275</b>
10.1	Introduction .....	276
10.1.1	Graphic Approach .....	277
10.2	Branch-and-Bound Method .....	277
10.3	Cutting-Plane Method .....	285
10.4	Controlled-Branch Method .....	288
10.5	Controlled-Cut Method .....	293
 <b>Part II Advanced Topics</b>		
<b>11</b>	<b>Pivot Rule</b> .....	<b>297</b>
11.1	Partial Pricing .....	298
11.2	Steepest-Edge Rule .....	300
11.3	Approximate Steepest-Edge Rule .....	302
11.4	Largest-Distance Rule .....	304
11.5	Nested Rule .....	306
11.6	Nested Largest-Distance Rule .....	308
<b>12</b>	<b>Dual Pivot Rule</b> .....	<b>311</b>
12.1	Dual Steepest-Edge Rule .....	312
12.2	Approximate Dual Steepest-Edge Rule .....	315
12.3	Dual Largest-Distance Rule .....	317
12.4	Dual Nested Rule .....	318
<b>13</b>	<b>Simplex Phase-I Method</b> .....	<b>321</b>
13.1	Infeasibility-Sum Method .....	321
13.2	Single-Artificial-Variable Method .....	327

13.3	The Most-Obtuse-Angle Column Rule .....	332
13.4	Perturbation of Reduced Costs .....	336
<b>14</b>	<b>Dual Simplex Phase-I Method .....</b>	<b>341</b>
14.1	Dual Infeasibility-Sum Method .....	341
14.2	Dual Single-Artificial-Variable Method .....	345
14.3	The Most-Obtuse-Angle Row Rule .....	351
14.4	Perturbation of the Right-Hand Side .....	354
<b>15</b>	<b>Reduced Simplex Method .....</b>	<b>357</b>
15.1	Derivation .....	357
15.2	Reduced Simplex Method .....	363
15.3	Reduced Phase-I: Single-Artificial-Variable .....	367
15.4	Dual Reduced Simplex Method .....	370
15.5	Dual Reduced Phase-I: The Most-Obtuse-Angle .....	378
15.6	Notes .....	384
<b>16</b>	<b>Improved Reduced Simplex Method .....</b>	<b>387</b>
16.1	Variation of the Reduce Simplex Method .....	387
16.2	Phase-I for Improved Reduced Simplex Method .....	391
16.3	Dual Improved Reduced Simplex Method .....	394
16.4	Phase-I for the Dual Improved Reduced Simplex Method .....	398
16.5	Bisection Reduced Simplex Method .....	402
<b>17</b>	<b>D-Reduced Simplex Method .....</b>	<b>409</b>
17.1	D-Reduced Simplex Tableau .....	409
17.2	Dual D-Reduced Simplex Method .....	412
17.3	Dual D-Reduced Phase-I .....	418
17.4	Dual D-Reduced Phase-I: Single-Artificial-Variable .....	421
17.5	D-Reduced Simplex Method .....	424
17.6	D-Reduced Phase-I: The Most-Obtuse-Angle .....	431
17.7	Dual Bisection D-Reduced Simplex Method .....	435
<b>18</b>	<b>Criss-Cross Simplex Method .....</b>	<b>441</b>
18.1	Most-Obtuse-Angle Criss-Cross Method .....	442
18.2	Perturbation Simplex Method .....	445
18.3	Criss-Cross Reduced Simplex Method .....	449
18.4	Perturbation Reduced Simplex Method .....	453
18.5	Mixed Two-Phase Method .....	457
<b>19</b>	<b>Generalizing Reduced Simplex Method .....</b>	<b>461</b>
19.1	Generalized Reduced Simplex Method .....	461
19.2	Generalized Reduced Phase-I .....	469
19.3	Generalized Reduced Phase-I: Single-Artificial-Variable .....	476
19.4	Generalized Dual Reduced Simplex Method .....	482
19.5	Generalized Dual Reduced Phase-I .....	486
19.6	Generalized Dual D-Reduced Simplex Method .....	490

<b>20</b>	<b>Deficient-Basis Method</b>	503
20.1	Deficient-Basis and Tableau	503
20.2	Deficient-Basis Method: Tableau Form	505
20.3	Deficient-Basis Method	509
20.4	Phase-I: Single-Artificial-Variable	514
20.5	On Implementation	519
20.5.1	Initial Basis	519
20.5.2	LU Updating in Rank-Increasing Iteration	520
20.6	Deficient-Basis Reduced Method	521
20.6.1	Starting-Up	528
20.7	Further Phase-I	529
<b>21</b>	<b>Dual Deficient-Basis Method</b>	535
21.1	Dual Deficient-Basis Method: Tableau Form	535
21.2	Dual Deficient-Basis Method	540
21.3	Dual Deficient-Basis D-Reduced Method: Tableau Form	544
21.4	Dual Deficient-Basis D-Reduced Method	553
21.5	Deficient-Basis D-Reduced Gradient Method: Tableau Form	556
21.6	Deficient-Basis D-Reduced Gradient Method	567
21.7	Notes	568
<b>22</b>	<b>Face Method</b>	571
22.1	Face Method Using Cholesky Factorization	572
22.1.1	The Steepest Downhill	572
22.1.2	Updating Solution	574
22.1.3	Face Contraction	575
22.1.4	Optimality Test	578
22.1.5	Face Expansion	579
22.1.6	Face Algorithm	580
22.2	Face Phase-I: Single-Artificial-Variable	583
22.3	Generalizing the Face Method	586
22.4	Affine Face Method	588
22.5	Notes	591
<b>23</b>	<b>Dual Face Method</b>	595
23.1	Dual Face Method Using Cholesky Factorization	595
23.1.1	The Steepest Uphill	596
23.1.2	Updating Dual Solution	598
23.1.3	Dual Face Contraction	599
23.1.4	Optimality Test	600
23.1.5	Dual Face Expansion	601
23.1.6	Dual Face Algorithm	602
23.2	Dual Face Phase-I	604
23.3	Dual Face Method Using Gauss-Jordan Elimination	608
23.4	Variant of the Dual Face Algorithm	618

<b>24</b>	<b>Pivotal Interior-Point Method</b> .....	623
24.1	Pivotal Affine Interior-Point Method .....	623
24.2	Pivotal Affine Face Interior-Point Method .....	628
24.3	Pivotal D-Reduced Gradient Interior-Point Method .....	631
24.4	Feasible-Point Simplex Method .....	639
24.4.1	Column Pivot Rule and Optimality Condition .....	640
24.4.2	Search Direction .....	641
24.4.3	Stepsize and Row Pivot Rule.....	642
24.4.4	Formulation of the Algorithm.....	643
24.4.5	Phase-1 and Purification.....	645
24.4.6	Computational Results .....	645
<b>25</b>	<b>Special Topics</b> .....	647
25.1	Special Forms of the LP Problem .....	647
25.1.1	Reduced Problem .....	648
25.1.2	D-Reduced Problem .....	649
25.1.3	Dual Elimination .....	649
25.1.4	Reduced Dual Elimination .....	655
25.2	Intercepting of Optimal Set and Bilevel LP .....	656
25.3	Pricing Scheme .....	660
25.4	Relaxation Principle.....	664
25.4.1	Illustrative Application: Partial Pricing.....	665
25.5	Local Duality .....	668
25.6	Decomposition Principle.....	670
25.6.1	Subprograms and Algorithms .....	670
25.6.2	The Basic Idea: “arena contest”.....	673
25.6.3	Practical Remarks .....	675
25.6.4	Illustration on the Standard LP Problem .....	676
25.6.5	Illustration on the Bounded-Variable LP Problem .....	679
25.6.6	Illustration on the ILP Problem .....	680
25.7	ILP: Based on the Reduced Simplex Framework .....	682
<b>Appendix A</b>	<b>MPS File</b> .....	697
<b>Appendix B</b>	<b>Test LP Problems</b> .....	703
<b>Appendix C</b>	<b>Empirical Evaluation of Nested Pricing</b> .....	709
<b>Appendix D</b>	<b>Empirical Evaluation of Face Methods</b> .....	727
<b>Appendix E</b>	<b>Empirical Evaluation of the Feasible-Point Simplex Method</b> .....	733
