

# Contents

<b>A Personal History of Virus-Based Vector Construction . . . . .</b>	<b>1</b>
William O. Dawson	
<b>Virus-Derived ssDNA Vectors for the Expression of Foreign Proteins in Plants . . . . .</b>	<b>19</b>
Edward P. Rybicki and Darrin P. Martin	
<b>Plant Viral Epitope Display Systems for Vaccine Development . . . . .</b>	<b>47</b>
Denis Leclerc	
<b>Applications of Plant Viruses in Bionanotechnology . . . . .</b>	<b>61</b>
George P. Lomonossoff and David J. Evans	
<b>Milestones in the Development and Applications of Plant Virus Vector as Gene Silencing Platforms . . . . .</b>	<b>89</b>
Christophe Lacomme	
<b>Emerging Antibody-based Products . . . . .</b>	<b>107</b>
Kevin J. Whaley, Josh Morton, Steve Hume, Ernie Hiatt, Barry Bratcher, Victor Klimyuk, Andrew Hiatt, Michael Pauly and Larry Zeitlin	
<b>Production of Recombinant Antigens and Antibodies in <i>Nicotiana benthamiana</i> Using ‘Magnifection’ Technology: GMP-Compliant Facilities for Small- and Large-Scale Manufacturing . . . . .</b>	<b>127</b>
Victor Klimyuk, Gregory Pogue, Stefan Herz, John Butler and Hugh Haydon	
<b>Plant Viral Vectors for Delivery by <i>Agrobacterium</i> . . . . .</b>	<b>155</b>
Yuri Y. Gleba, Daniel Tusé and Anatoli Giritch	
<b>Index . . . . .</b>	<b>193</b>

Plant Viral Vectors

Palmer, K.E.; Gleba, Y. (Eds.)

2014, X, 194 p. 33 illus., 19 illus. in color., Hardcover

ISBN: 978-3-642-40828-1
