

Contents

1	Tracks in the Cloud Chamber	1
1.1	The Wilson Cloud Chamber	1
1.2	The Birth of Quantum Mechanics	2
1.3	The Debate at the Fifth Solvay Conference	6
1.4	Heisenberg's Chicago Lectures	8
1.5	Towards a Purely Wave-Mechanical Approach	12
1.6	Mott's Analysis	13
1.7	Successive Investigations	20
1.7.1	Models of Quantum Measurement Devices	21
1.7.2	Decoherence Induced by Scattering	24
	References	28
2	A Time-Dependent Analysis of Mott's Model	31
2.1	The Three-Particle Model Revisited	31
2.2	Time-Dependent Formulation and Results	36
2.3	Representation Formulas by Oscillatory Integrals	39
2.4	Proof of Mott's Result	42
2.5	Asymptotic Dynamics in Presence of One Model-Atom	52
2.6	Outline of the Proof	57
	References	61
3	Modeling Atoms as Multi-Channel Point Interactions	63
3.1	Multi-Channel Point Interactions	63
3.2	A Model of Cloud Chamber	69
3.3	The Case of a Macroscopic Array of Spins	76
3.4	The Spherical Wave Amplitudes	81
	References	86
4	Concluding Remarks	87
	References	90
	Appendix A: Point Interaction Hamiltonians	91
	Appendix B: The Spherical Wave	99

Quantum Dynamics of a Particle in a Tracking Chamber

Figari, R.; Teta, A.

2014, IX, 101 p., Softcover

ISBN: 978-3-642-40915-8
