

Contents

1	Ferroelectricity and Ferroelectric Phase Transition	1
1.1	Landau-Ginzburg-Devonshire Mean Field Theory	1
1.2	<i>Ab Initio</i> Theory of the Ferroelectric Phase Transition	6
	References	8
2	Thin Ferroelectric Films and the Finite-Size Effect	11
	References	15
3	Critical Size in Ferroelectricity	17
3.1	LGD Mean Field Theory and Boundary Conditions in the Vicinity of the Critical Size	19
3.2	<i>Ab Initio</i> Theory of the Critical Size	22
3.3	Ginzburg Soft Mode Conception and Ferroelectricity at the Nanoscale	23
3.3.1	Ginzburg Soft Mode Conception	24
3.3.2	Dielectric Resonance Dispersion in the Ultrathin Films	25
	References	26
4	Ultrathin Ferroelectric Films	29
4.1	Ferroelectric Polymers Vinylidene Fluoride Copolymers	30
4.2	Langmuir–Blodgett Ferroelectric Films: Critical Size and Coercive Field	32
4.3	Two-Dimensional Ferroelectric Films	44
4.4	Ultrathin Perovskite Films: Critical Size and Coercive Field	51
4.5	The Scaling of the Polarization in the Ultrathin Ferroelectric Films	56
4.5.1	LGD Theory with Mismatched Boundary Conditions in Application to the Scaling Polarization in Ferroelectric Polymers	57
4.5.2	The Scaling of the Polarization in PbTiO_3 Superlattices	61
	References	62

5	Ferroelectric Nanocrystals and Nanodomains	67
5.1	The Growth and Switching of Perovskite Nanocrystals	67
5.2	The Growth and Switching of Ferroelectric Polymer Nanocrystals	70
5.3	PFM Application and Nanoscale Imaging of Ferroelectric Langmuir–Blodgett Polymer Films	74
5.4	Nanodomains in the Ferroelectric Langmuir–Blodgett Polymer Films	79
	References	84
6	Switching Kinetics at the Nanoscale	87
6.1	The Homogeneous Landau-Khalatnikov Switching Kinetics of the Ultrathin Ferroelectrics Films	89
6.2	The Homogeneous Switching in the Ultrathin Ferroelectric Copolymer LB Films	91
6.3	The Homogeneous Intrinsic Switching in the BaTiO ₃ Condenser at the Nanoscale	102
6.4	The Homogeneous Switching in the Ferroelectric Liquid Crystals	109
6.5	Switching in the Ising Model	110
6.6	Conclusion: Domains and Switching in Ferroelectricity	116
	References	118

Ferroelectricity at the Nanoscale

Basics and Applications

Fridkin, V.; Ducharme, S.

2014, XII, 122 p. 81 illus., 8 illus. in color., Hardcover

ISBN: 978-3-642-41006-2
