Part I Fundamentals of LIBS

1	Laser–Matter Interaction in LIBS Experiments	3
	Andrea Marco Malvezzi	
1.1	Introduction	3
1.2	Laser Interaction with Gases	6
1.2.1	Multiphoton Ionization	7
1.2.2	Cascade Ionization	10
1.3	Laser Interaction with Solid Materials from Milliseconds to Nanoseconds	14
1.3.1	Heating and Melting	15
1.3.2	Vaporization	18
1.4	Laser Interaction with Solid Materials: Ultrashort Laser Pulses	24
1.5	Conclusions	27
	References	28
2	Physical Processes in Optical Emission Spectroscopy	31
	Mario Capitelli, Gianpiero Colonna, Giuliano D’Ammando, Rosalba Gaudioso and Lucia Daniela Pietanza	
2.1	Introduction	31
2.2	LTE Plasmas: The Few Level Approximation for the Partition Function and Thermodynamic Properties of Atomic Species	34
2.3	Non-LTE Plasmas: Collisional Radiative Models Coupled with Electron Energy Distribution Function and Radiation Transfer	38
2.4	Fluid Dynamics of Laser-Plasma Expansion in Gas and Liquids: Modeling and Validation	45
2.5	Conclusions and Perspectives	53
	References	55

3	LIBS Instrumental Techniques	59
	Sergio Musazzi and Umberto Perini	
3.1	Introduction	59
3.2	The Laser Source	61
3.2.1	Laser Sources Utilized in LIBS Systems	63
3.2.2	Laser–Matter Interaction: Dependence on Wavelength and Pulse Duration	65
3.3	The Focusing Optics	67
3.4	The Target Container	70
3.5	The Light Collection System	72
3.6	Spectral Detection Systems	73
3.6.1	Wavelength Selectors	74
3.6.2	Detectors	79
3.6.3	Spectrometer-Detector Combination: The Right Trade Off	82
3.7	Control Electronics	85
3.8	Conclusions	85
	References	86
4	Influence of Atmospheric Pressure and Composition on LIBS	91
	Jill R. Scott, Andrew J. Effenberger and Jeremy J. Hatch	
4.1	Introduction	91
4.2	Spectral Features	94
4.2.1	Resolution	95
4.2.2	Signal Intensity	97
4.2.3	Signal-to-Noise Ratio	102
4.3	Material Ablation	103
4.4	Experimental Issues	106
4.4.1	General Considerations	106
4.4.2	Field of View	107
4.4.3	Multiple Pulse Configurations	108
4.5	Overview of Applications	109
4.5.1	Isotope Measurements	109
4.5.2	LIBS in Space	110
4.5.3	Process Monitoring	110
4.6	Conclusions	111
	References	112
5	Double and Multiple Pulse LIBS Techniques	117
	Stefano Legnaioli, Giulia Lorenzetti, Lorenzo Pardini, Gildo H. Cavalcanti and Vincenzo Palleschi	
5.1	Introduction	117

5.2	Double Pulse Experimental Configurations	119
5.2.1	Collinear Configuration	119
5.2.2	Orthogonal Configuration	120
5.2.3	Other Configurations	121
5.3	Double Pulse LIBS with Different Wavelengths and Pulse Lengths	122
5.3.1	Double Pulse LIBS with Different Wavelengths	122
5.3.2	Double Pulse LIBS with Different Pulse Durations	125
5.4	Physical Principles Underlying Double Pulse LIBS Analysis	127
5.5	Multiple Pulse LIBS	132
5.6	Double Pulse Instrumentation	133
5.7	Applications of Double and Multiple Pulse LIBS	135
5.7.1	Stand-Off Detection of Hazardous Materials	135
5.7.2	Double Pulse Analysis of Soils	136
5.7.3	Double Pulse Analysis of Biological Tissues	137
5.7.4	Double Pulse LIBS of Archaeological Objects	138
5.8	Conclusion	139
	References	139
6	Femtosecond Laser Ablation: Fundamentals and Applications.	143
	Sivanandan S. Harilal, Justin R. Freeman, Prasoon K. Diwakar and Ahmed Hassanein	
6.1	Introduction	143
6.2	Femtosecond Laser System	145
6.3	Laser–Matter Interaction	147
6.4	Femtosecond Laser Absorption: Energy Transport	148
6.5	Ablation Mechanisms	150
6.6	Ablation Threshold	152
6.7	Plasma Characterization: Comparison Between ns and fs LIBS Plumes	154
6.7.1	Plume Hydrodynamics	155
6.7.2	Plasma Spectral Features	156
6.7.3	Plasma Characterization	160
6.8	Conclusions	163
	References	164

Part II Applications of LIBS

7	Applications of LIBS to the Analysis of Metals	169
	Stefano Legnaioli, Giulia Lorenzetti, Lorenzo Pardini, G. H. Cavalcanti and Vincenzo Palleschi	
7.1	Introduction	169

7.2	Laser Ablation of Metals.	171
7.2.1	Optimization of Laser Pulse Energy	172
7.2.2	Choice of Laser Wavelength and Pulse Duration	175
7.3	Applications.	177
7.3.1	LIBS Analysis of Aluminium Alloys	177
7.3.2	LIBS Analysis of Iron-Based Alloys.	181
7.3.3	LIBS Analysis of Copper-Based Alloys.	185
7.3.4	LIBS Analysis of Precious Alloys	187
7.3.5	LIBS Analysis of Molten Metals	189
7.3.6	Other LIBS Application on Metal Alloys	189
7.4	Conclusion.	191
	References	191
8	LIBS Analysis of Liquids and of Materials Inside Liquids	195
	Violeta Lazic	
8.1	Introduction	196
8.2	Sampling of Liquid Surface, Droplet and Aerosol	198
8.3	Analysis of Ice and of Liquid Inclusions	202
8.4	Underwater Analysis of Solid Targets with Gas Flow	203
8.5	Laser Induced Cavitation Inside Liquids	204
8.6	Comparison Between Single and Dual Pulse LIBS Inside Liquids	207
8.7	Analysis of Bulk Liquids.	210
8.8	Direct Analysis of Submerged Solid Samples	217
8.9	Underwater Analysis of Sediments	222
	References	223
9	Laser Induced Breakdown Spectroscopy for Analysis of Aerosols	227
	Prasoon K. Diwakar and Pramod Kulkarni	
9.1	Introduction	227
9.2	Direct/Free Stream Analysis: Discrete Nature of Plasma-Particle Interactions	229
9.3	Localized Plasma Particle Interactions: Implications to Matrix/Fractionation Effects.	237
9.4	Single Droplet Sample Introduction System.	243
9.4.1	Calibration Curves and Limits of Detection for Ca and Au	244
9.5	Substrate Based Analysis or Indirect Analysis	250
9.6	Laser Ablation-LIBS.	254
9.7	Conclusion.	254
	References	255

10 Space Applications of LIBS.	257
David A. Cremers	
10.1 Introduction	258
10.2 Review of Prior Missions and Conventional Analysis Methods	259
10.2.1 Objectives of Space Exploration.	259
10.2.2 Overview of Missions to the Moon, Mars, Venus. . . .	260
10.2.3 Overview of Instrumentation Used on Planetary Surfaces	264
10.2.4 Some LIBS Capabilities Compared to Prior Instrumentation.	264
10.3 LIBS Deployment Scenarios for Space Missions	267
10.3.1 Lasers in Space for Elemental Analysis.	267
10.3.2 Interrogation Geometries Using LIBS	268
10.3.3 Considerations for Instrument Design	270
10.4 Review of LIBS Laboratory Studies Related to Space Applications	272
10.4.1 Plasma Characteristics at Different Pressures.	272
10.4.2 LIBS Studies for Mars	273
10.4.3 LIBS Studies for Venus	279
10.4.4 LIBS Studies for the Moon/Airless Bodies	282
10.5 ChemCam Instrument	283
